National GEM Consortium Scholarship: *The National GEM Consortium is addressing the critical shortfall in the production of American engineering and scientific talent. The mission of The National GEM Consortium is to enhance the value of the nation's human capital by increasing the participation of underrepresented groups (African Americans, American Indians, and Hispanic*

Americans) at the master's and doctoral levels in engineering and science. Cadets compete for the MS Engineering Fellowship. Through the GEM Consortium corporations, universities, and U.S. government labs partner to provide GEM Fellows full tuition and fees as well as practical engineering summer experiences. Yenching Scholarship:

The Yenching Academy of Peking University builds bridges between China and the rest of the world through an interdisciplinary master's program in China Studies for outstanding graduates from all over the globe. This initiative brings together young people who show promise to lead and innovate in their fields in an intensive learning environment where they can explore China and its role in the world - past, present, and future. The Academy aims to thereby shape a new generation of global citizens with a nuanced understanding of China and its role in the world.

Founded on the ideal of fostering global connections and dialogue, the Yenching Academy is a fully funded residential program offering a wide array of interdisciplinary courses on China within broadly defined fields of the Humanities and Social Sciences. Working closely with their academic mentors, Yenching Scholars are granted the flexibility to create their own study paths by choosing from six academic concentrations and a variety of extracurricular activities. Studying at the Academy represents a unique opportunity not only for intercultural exchange and interdisciplinary learning, but also for personal and professional development.
