GENERAL INFORMATION

AVIONICS

The Aircraft's avionics suite will include a glass cockpit that provides **Primary Flight Display** (PFD) capability for both the pilot and the co-pilot. The PFD will display attitude, heading, airspeed, altitude, and vertical speed data, as well as flight director command bars, heading, and altitude pre-selects.

In addition, a **Multifunction Display** (MFD) will provide navigational information along with engine instruments. The MFD will have the capacity to display weather, traffic, and terrain data.

A dual solid-state **Attitude Heading Reference System** (AHRS) and dual **Air Data Computer** (ADCs) will provide attitude and air data information, while a three-axis digital autopilot, yaw damper, and flight management system functionality will also be included.
