

# Honda Aircraft HA-420 Maintenance Update

## Course Information

### Course Description – 4 Day Course

FlightSafety's Honda Aircraft HA-420 Maintenance Update Training Course meets the training requirements of technicians / engineers with actual experience on the airframe. System Reviews are provided on an as-needed-basis, as indicated by the specific clients.

The latest service information and operational aspects of a safe and efficient dispatch of the aircraft are reviewed and stressed. The technician will be required to utilize technical data as well as recall major system and sub-system normal operations, ground handling, safety precautions, and system self-test procedures.

Technicians attending the update course should have previously completed the Honda Aircraft HA-420 Maintenance initial course and be familiar with the day to day operation of the airframe and engine.

**Please contact your Regional Sales Manager or the Center Sales Manager for pricing.**
