

# TieTite™ & HookTite™

Protective Cleaning covers for indoor units

coil cleaners  
leak detection & monitoring  
recovery machines  
weighing platforms  
acid treatment  
fragrances & odour control  
flame retardants  
tools & accessories

## KEY BENEFITS

Ideal for routine maintenance

Protects walls, carpets and surrounding equipment whilst cleaning

Perfect for use with Advanced Engineering coil cleaners

Easy to use - simply fix in place and clean using access holes

Time saving - no dust sheets, no cleaning up afterwards

Re-usable

## Protective Cleaning covers for indoor units

Spills and splashes are an inevitable part of coil cleaning, this problem is even more apparent when working in areas where equipment and property could be damaged.

Traditionally the conscientious engineer has had to lay dust sheets and tarpaulins, to provide protection, but this can be ineffective, time consuming and disruptive.

Advanced Engineering have developed TieTite and HookTite as a

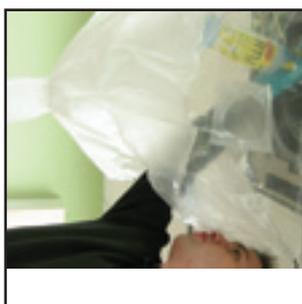

quick and easy solution enabling mess free cleaning.

HookTite is designed to provide protection to surrounding surfaces whilst cleaning Cassette units and is simply fixed to the adjacent ceiling grid.

TieTite has been designed to stop spills and splashes whilst cleaning wall mounted units and is fixed using a drawstring.

Both HookTite and TieTite have access

holes allowing the system to be easily cleaned. Any splashes are kept within the cover and are directed into a drain tube. The drain tube is placed in a bucket allowing run off to be caught and then disposed of. Both HookTite and TieTite are re-usable and are available in different sizes.

### FEATURES

**TieTite™ shaped for use on wall mounted units**

**HookTite™ shaped for use on ceiling units**

**Access holes to reach inside cover**

**Drain tube to direct run-off into bucket**
