siesta < labs >

Laboratory

Having our wonderful space, Siesta Casa, for optimized, speedy, affordable, and high-quality innovation creation.

Scientists

We create mind-blowing ideas and release them with advisors, developers, project managers, marketers, and designers.

Equipment

We have our internal secret tools for easier and fast professional work.

Who we are

We offer our expertise, gained by launching and growing our startups, to companies who want to create impactful & innovative products.

01

A group of creative people

02

Ability to see the challenges holistically and communicate about them

03

Experience with all steps which idea needs to be born

04

A powerful software house

Which one is you?

Let's define the stage of your idea. How would you describe the stage of your project?

You see a gap in the market and you need help with an idea

We understand that the urge of starting a project might be frustrating. We will help you to define the idea clearly, make a research, prove that your idea is valid, and launch the project with you.

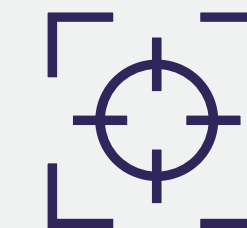

You already have an idea but you need more powers to bring it to life

As you have the idea defined and research done, we will help you to create a business architecture and marketing strategy to bring the product/service to the customer.

You already have launched the project but you seek for rapid growth

Having project launched, sometimes it's not that easy to achieve growth. We will help you define the problems and come up with solutions in order to reach the sustainable growth of a product or a service.

You know exactly what you want and need, but nobody is offering it

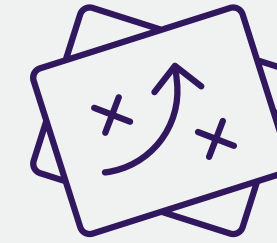

Specific challenges call for specific approaches. We are aware that both IT and Business carry certain specifics which often result in frictions. Among our powers is the ability to bridge any of such dichotomies and to facilitate success via cooperation.

How our cooperation would look

We are aware that a solid cooperation stands on good mutual understanding of aims and paths towards them.

This is the reason why we start every project by putting cards on the table and taking a mind tour through all that should and need to be done for the success of the project.

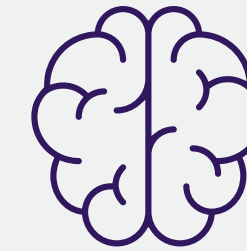

01

We will listen to your problem statement

The first stage is to understand your problem deeply and make sure that we are on the same page regarding the further process.

02

We will have a workshop together

The workshop session will help us to brainstorm together on possible solutions for your project and deliver the right further results.

03

We will present our understanding

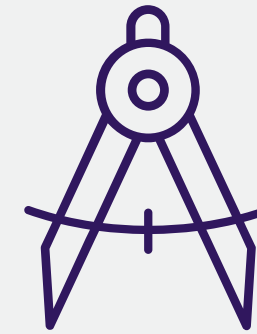

A part of our job is to translate business idea and objective into actual actions steps. In this phase we'll brief you with how we would approach the challenge ahead.

Here are a few reasons for considering us as special

We have solid internal standards for agile world

The change has been our constant for years. The experience with delivering even quite huge projects in less than a month makes us used to bringing value effectively in a short time.

TOGAF, MIFID, PCI DSS, C, NN, ASAP, DIDACHE, GT? We are not afraid of any of those nor of many more.

We have experience with different concepts and standards and are utilising them in practice.

A team hardened by action

Our team members carry a strong and diverse experiences from previous projects alongside ability to work well together.

We know how it feels to wear your shoes

We are able to understand your needs and style of work together. That makes us able to deliver what you actually need within the promised time scope.

areas of < cooperation >

What can we do for you?

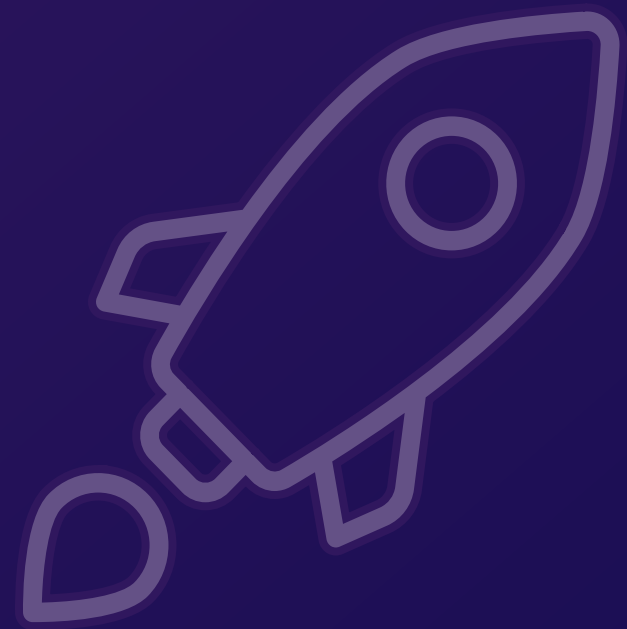

Bringing idea to life typically needs something of all these ingredients.

Our understanding is, that every project is a bit different and so is the range of things we can do together.

This is therefore just an initial sample.

Areas of cooperation

- I. Idea-making**
We build companies, products and digitize corporate businesses.
- II. Management and business architecture**
We are able to determine what needs to be done in each step of the project.
- III. Project management**
We deliver value for money by providing the highest standards of project management.
- IV. Software development**
Siesta Codes, our software house is experienced with comprehensive set of development tasks.
- V. Partnerships**
We can match you with people and organisations most relevant to your goals.
- VI. Online marketing**
Our toolbox of various analytical and tracking tools is able to build the paths between product and the customer.
- VII. Lead generation**
We are skilled in end-to-end inbound lead generation services for B2C and B2B businesses.
- VIII. Growth hacking**
The experience has taught us many tricks which can be used in order to speed up the project growth.

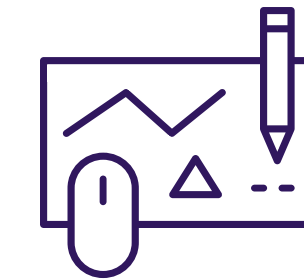

Idea-making

We build companies, products and digitize corporate businesses. We can help you to create and initiate cutting-edge idea in the fastest and high-quality way.

Analysis of assets

We are interested in examining which factors comprise tangible and intangible project management assets.

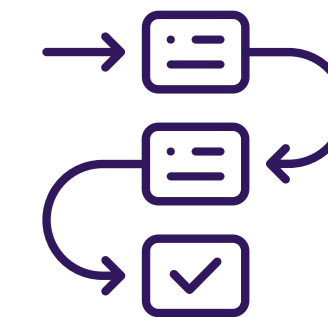

Proposing a spin off and new project ideas

We aim to provide quick, effective and comprehensive services to projects.

Idea iterations and validation

We can help you in finding out which ideas have a chance to succeed.

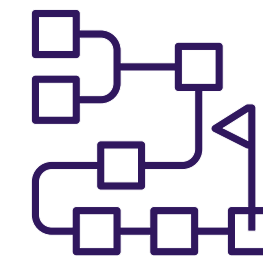

Idea specification and planning

Great plan is the foundation. We will prepare the project for its journey, using advanced methods of project planning.

Management and Business architecture

We are skilled in creating business architectures, mind maps, high-level and execution plans. Also, we are able to help with building your dedicated team, set up processes and frameworks for your daily work.

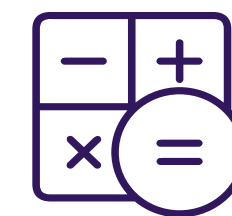

Strategy, overall project management

A great strategy & project management helps teams do much more than deliver what's been promised.

Planning, roadmaps, and validation

We offer a strategic overview of essential parts of a project.

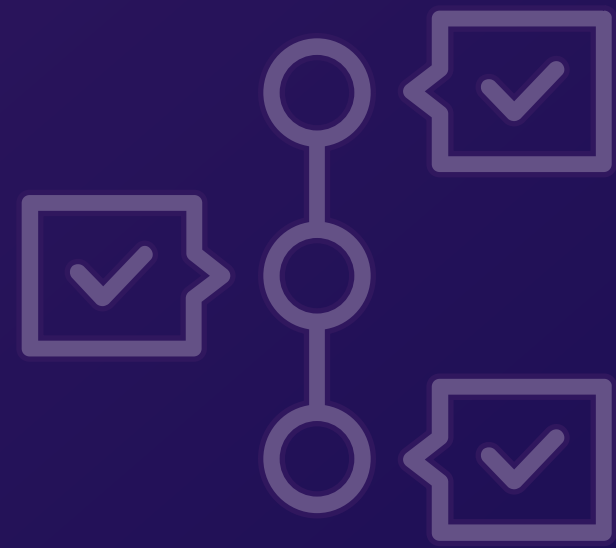

Finance planning, legal consultations

We provide a comprehensive range of corporate financial planning services to support your business.

Team formation

Team formation begins with an understanding about how individual people work

Project management

We deliver value for money by providing the highest standards of project management, utilising our experienced project managers to realise business benefits and deliver projects to time, cost and quality.

- Audit of processes
- Tools implementation
- Automated reporting
- Process automation
- Customer care setup

Tools

Project management tools allow you to plan and delegate work all in one place with tasks, subtasks, folders, templates, workflows, and calendars to upgrade the quality of your work.

success

< stories >

Nakup bezpečně

Nakup bezpečně was a platform that, during the first wave of COVID-19 epidemics, enabled customers to search for their favourite shops and order needed products immediately from the safety of their homes. After the order, the customer were able to easily pick the order up in the safest way possible on the set date and time.

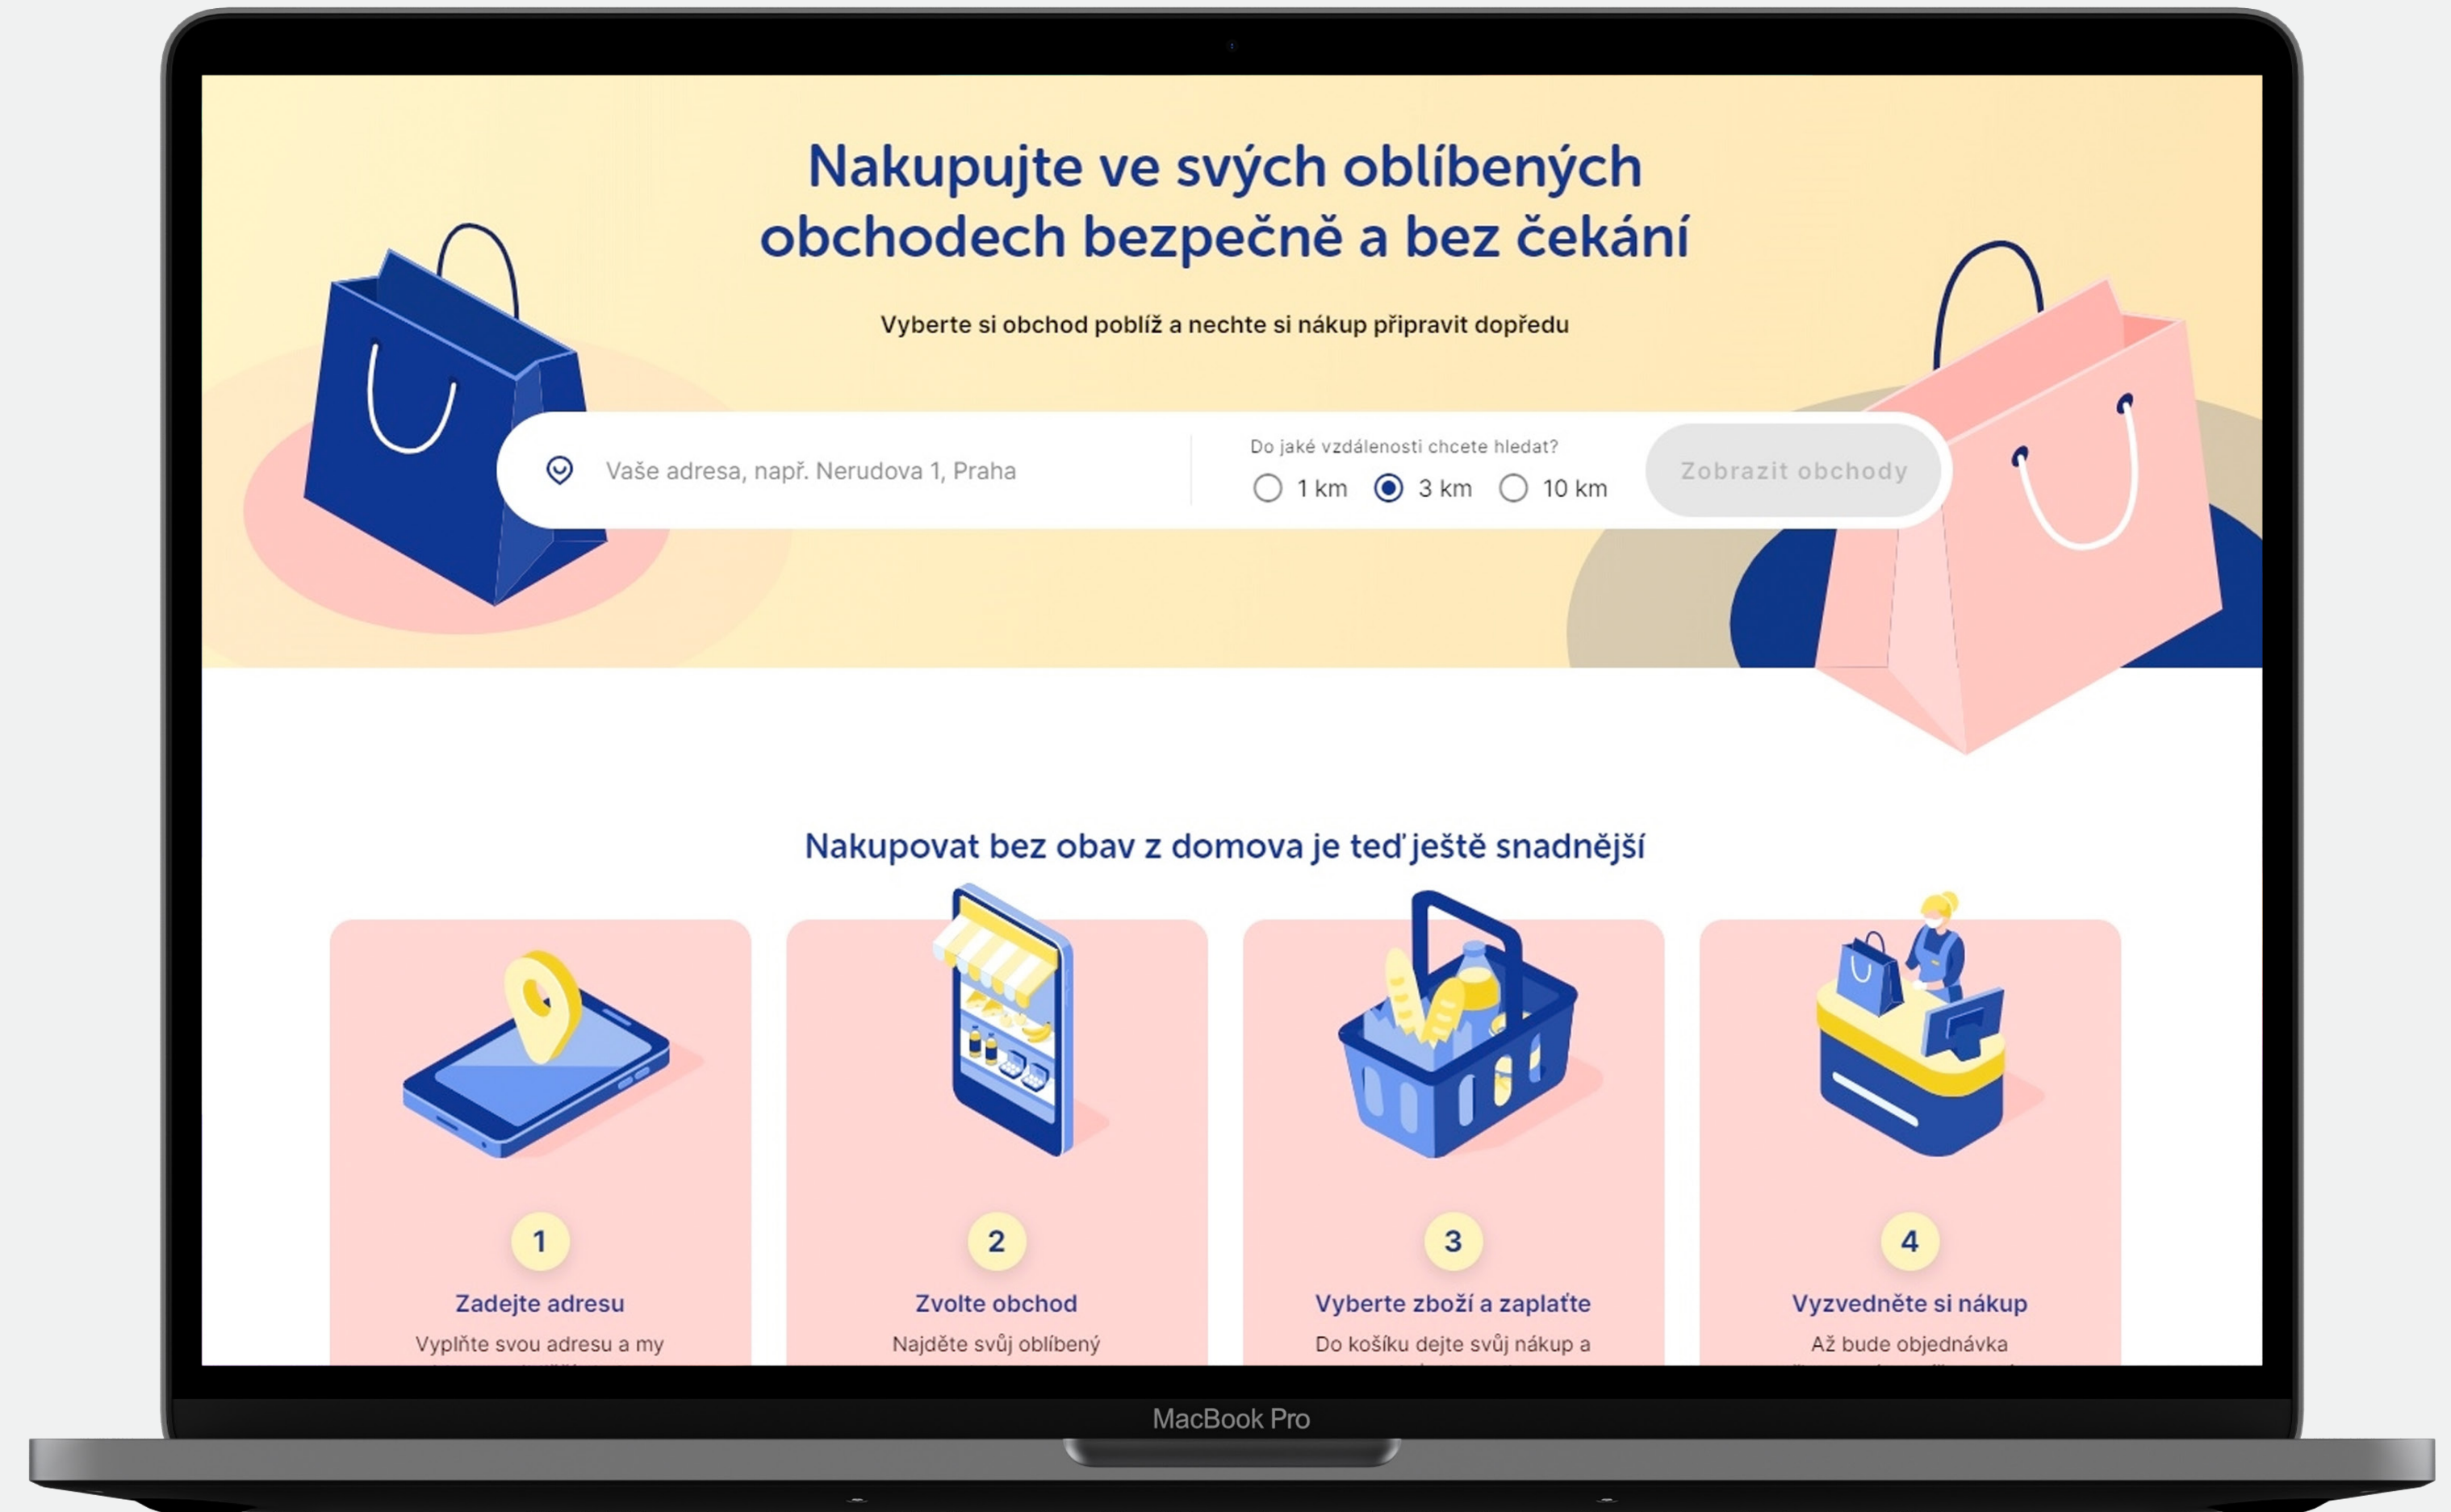

The value we brought to the client

1. A very short time needed for going live

The whole project was managed in hackathon style which resulted in it being successfully built and deployed within 7 days.

2. Fast growth within the first days after launch due to very simple but effective process

800 shops were registered in 2 days after launch.

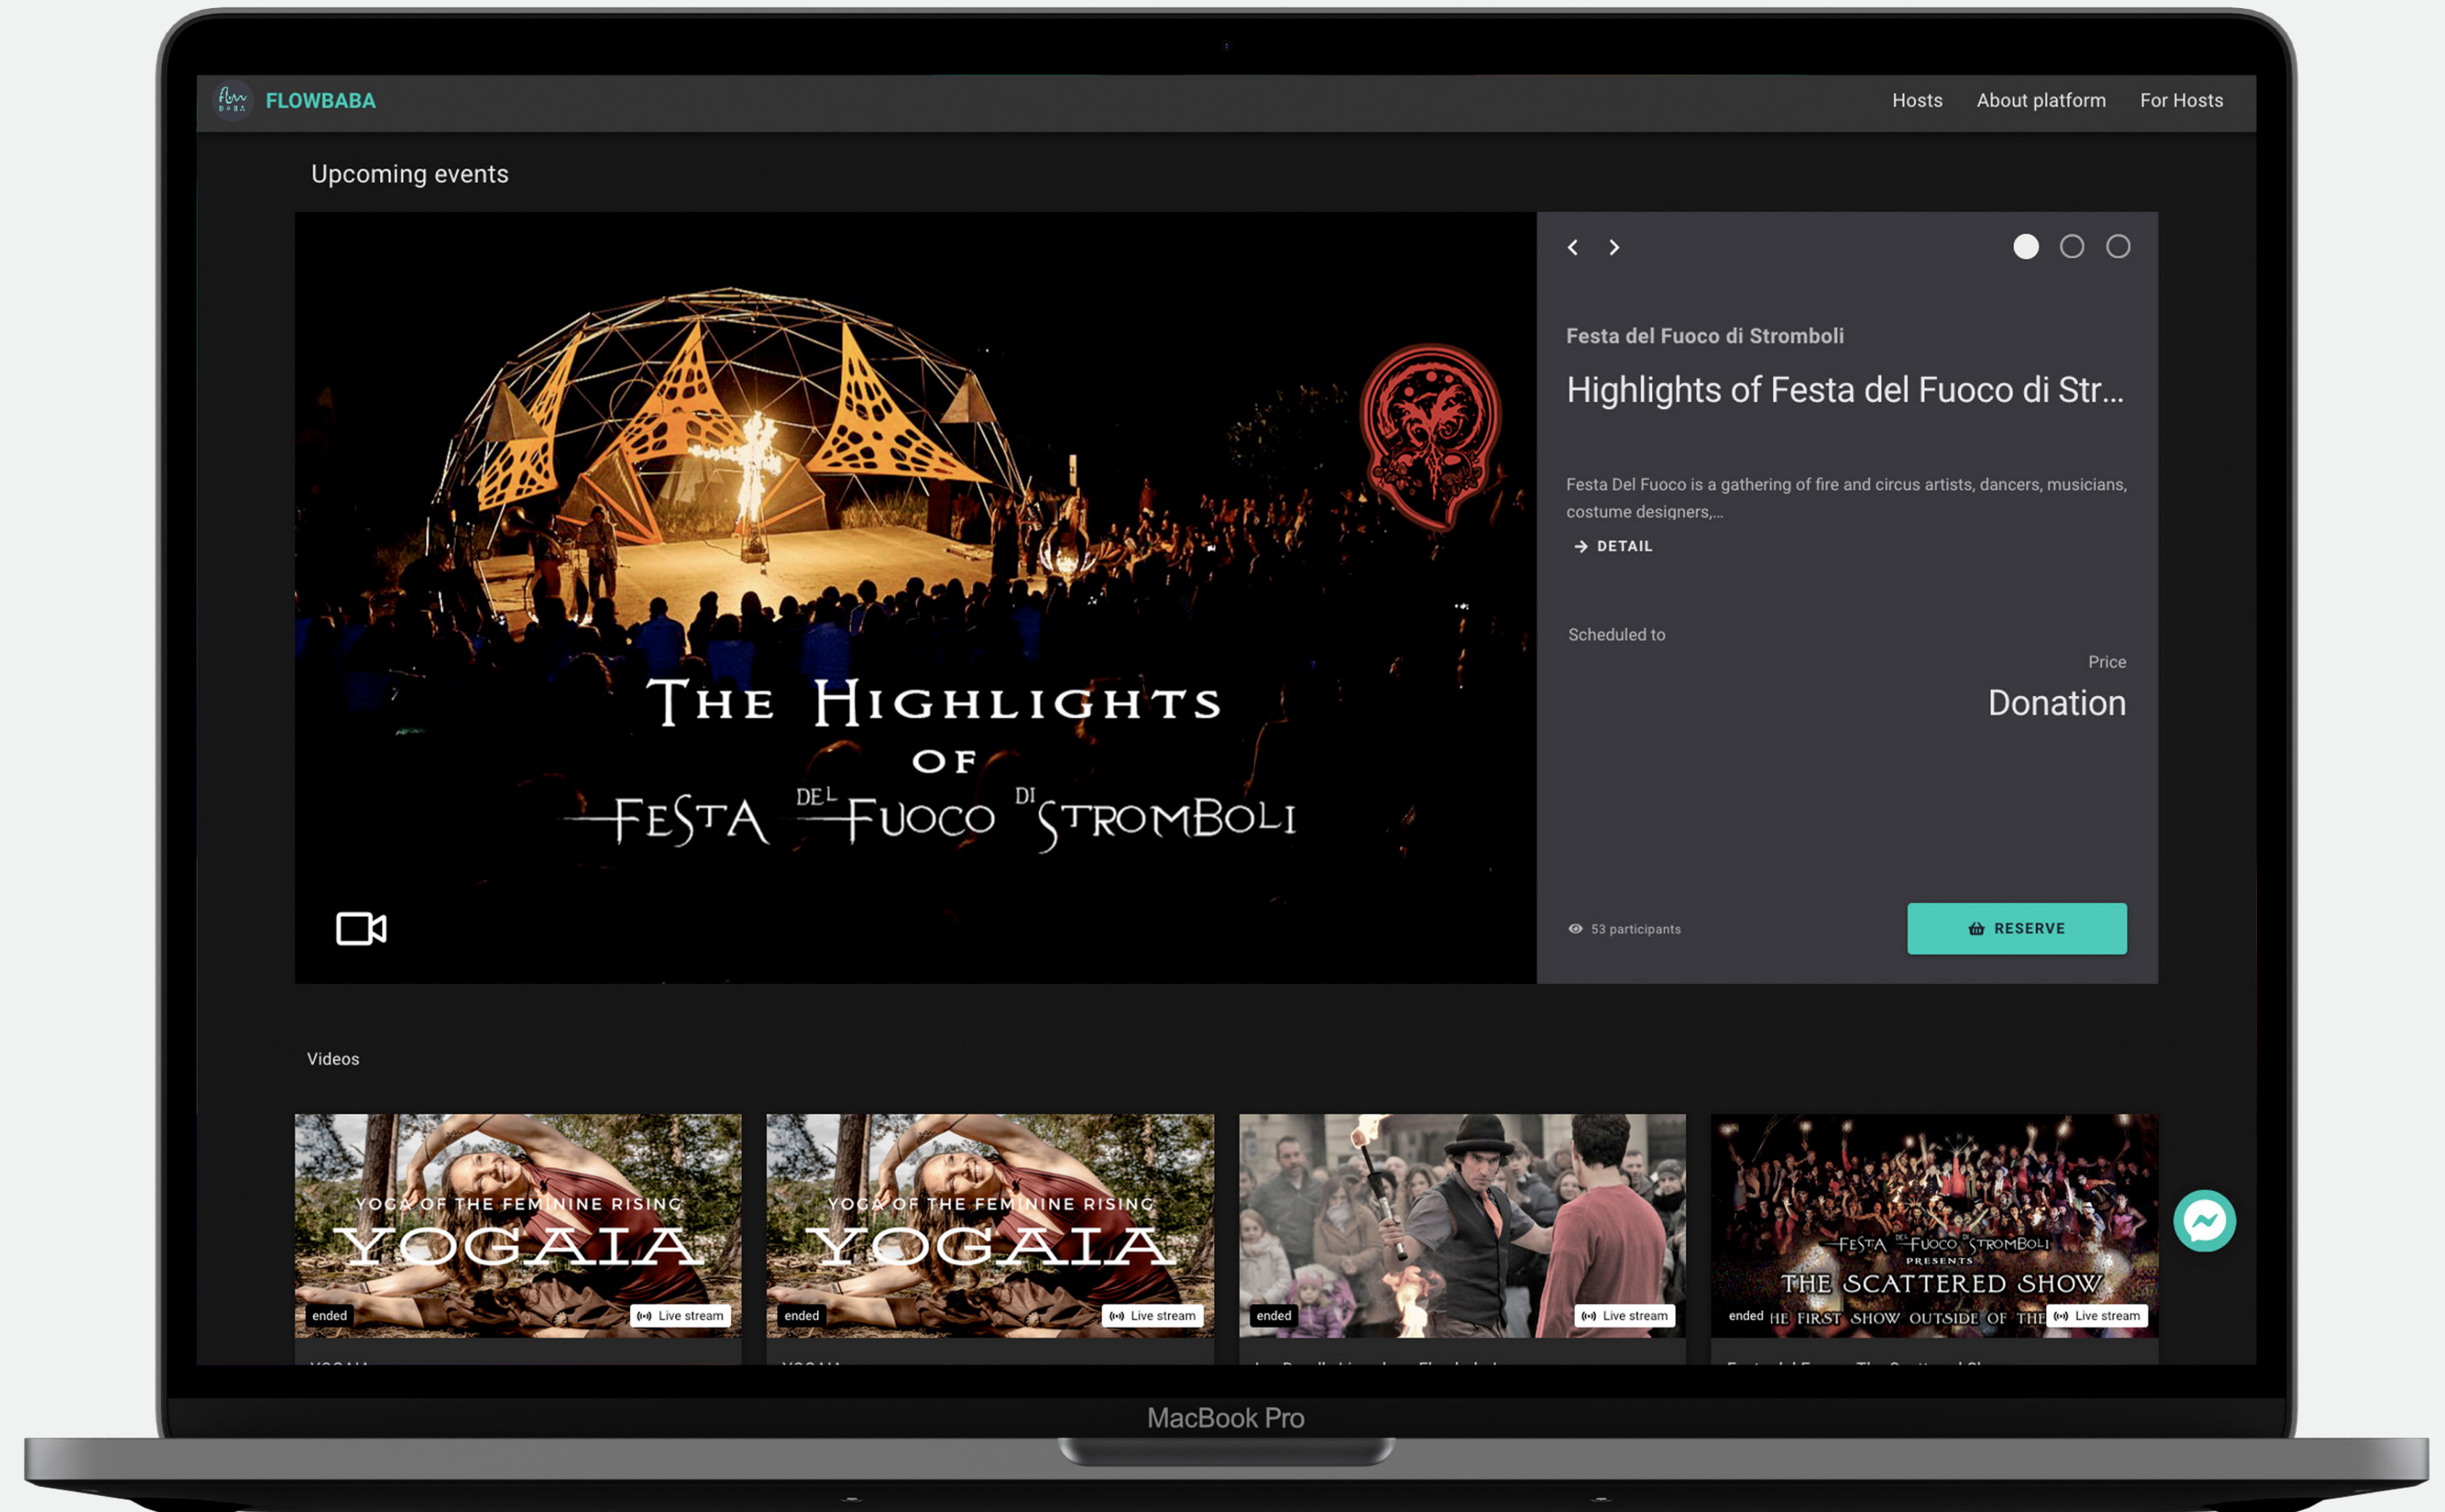

Flowbaba

Yoga and flow arts community platform that allows content creators to share their content via live streaming or pre-recorded videos. It also enables them to sell vouchers or tickets to their shows. The main goal of the platform is to bring as many types of skills as possible into one place.

The value we brought to the client

- 1. Agile solution of immitent problem**
We helped artists which woul
- 2. Affordable solution for niche markets needs**
- 3. Finding a gap on the market**
33 % of equity has been exited in 3 weeks after launch.

our own
< projects >

siesta < labs >

The experience with building four organisations has given us a chance to get to know the whole life-cycle of the company.

siesta < cloud >

Siesta Cloud is a cross-sell e-commerce platform for various services, where everyone can share their vision and bring it to life.

siesta < casa >

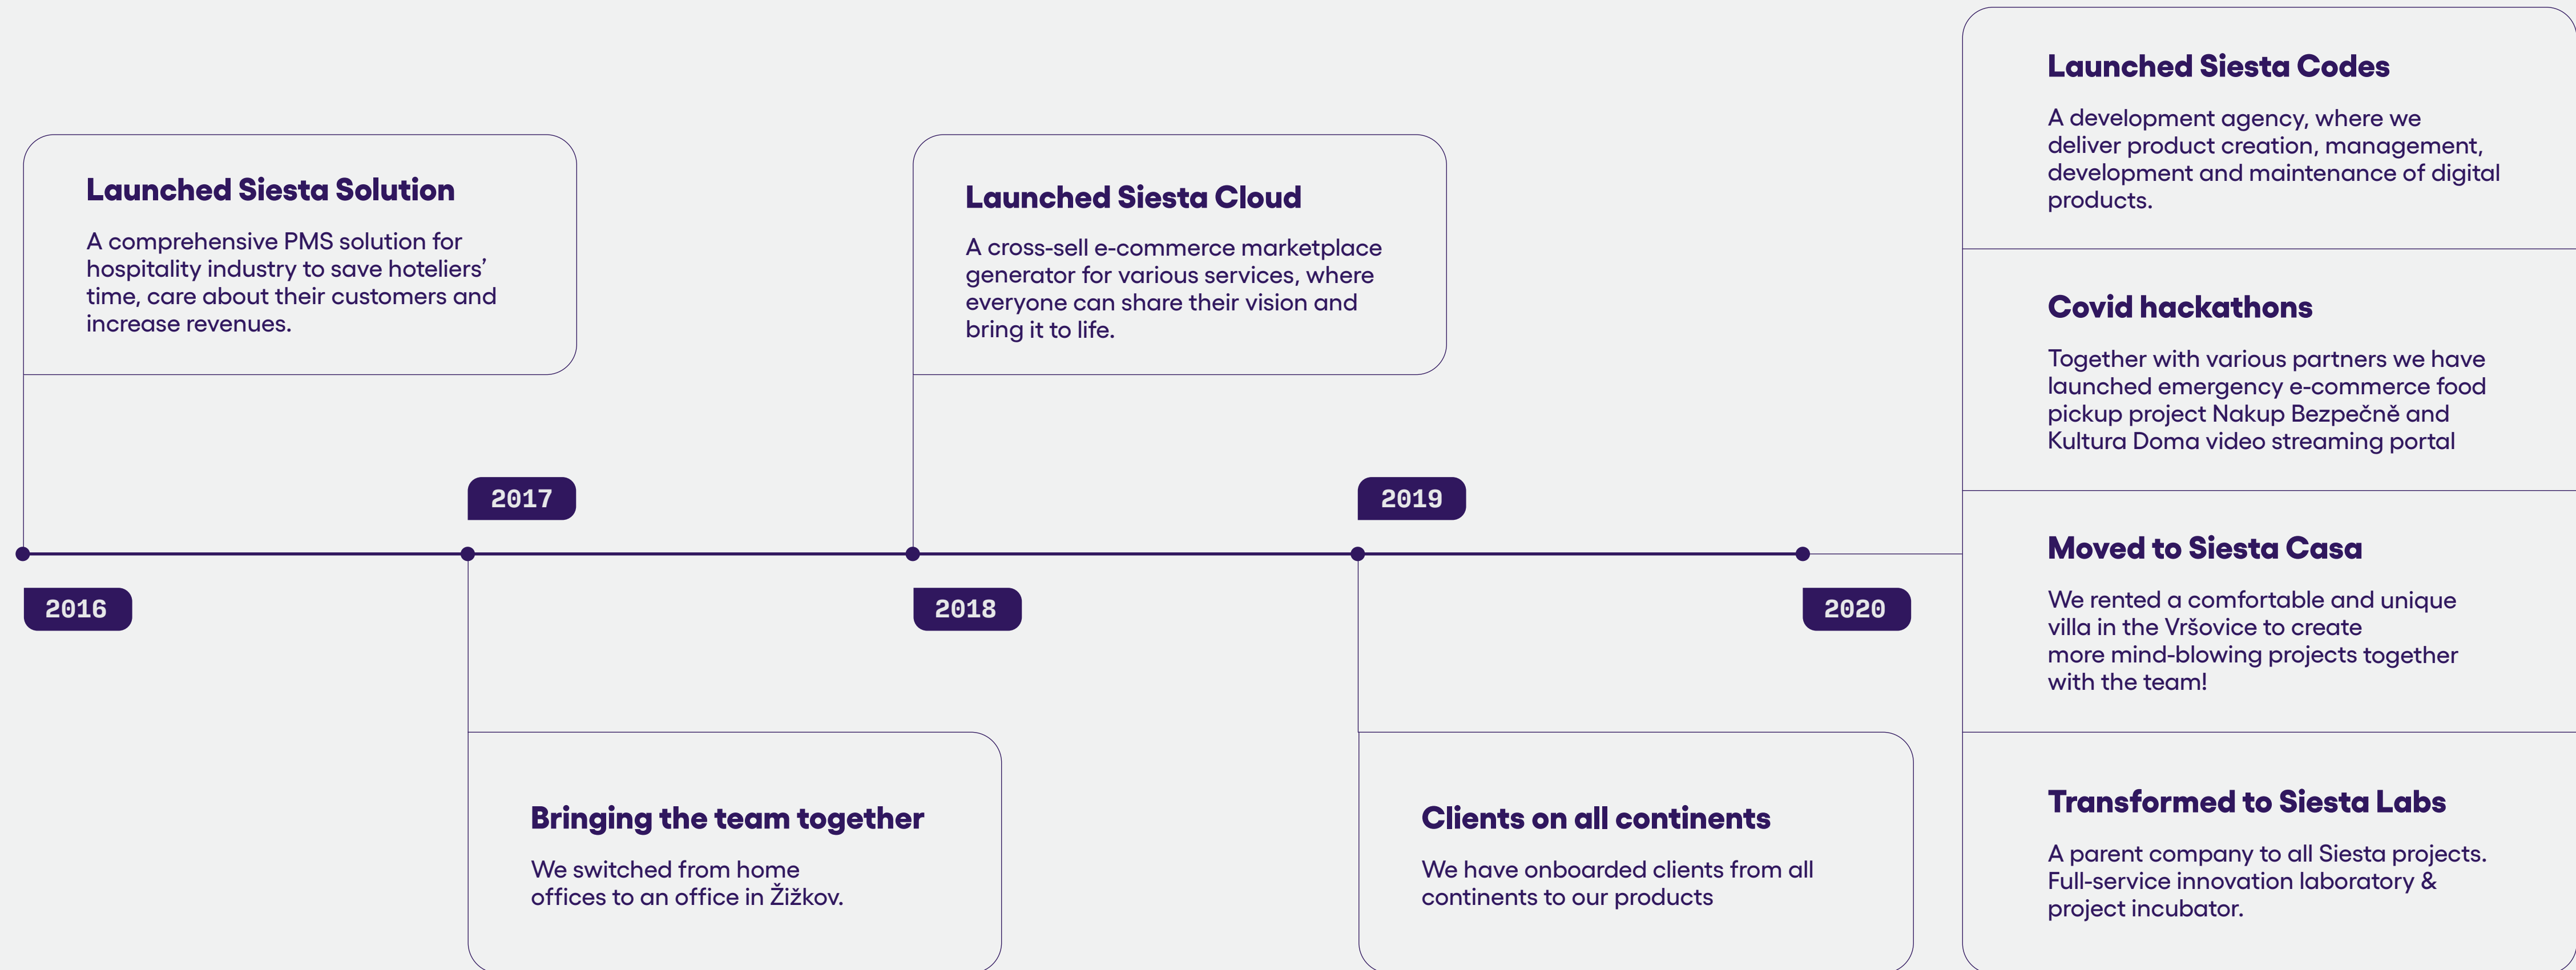

Siesta Casa is an innovative hub for creative open-minded ninjas who wants to make a positive impact on the world.

siesta < solution >

Siesta Extranet is a comprehensive solution for managing accommodation facilities. It is designed to increase efficiency & revenues.

siesta < codes >

Siesta Codes offers a variety of services related to product creation, management, and most importantly development and maintenance.

siesta < codes >

Dedicated < product > development team

Siesta Codes offers a variety of services related to product creation, management, and most importantly development and maintenance.

We started with the development of our own SAAS products. Since we have a really friendly working environment, over time more and more professionals joined our team and we got the idea to provide our service also to different startups and companies.

siesta < casa >

Comfortable and innovative < space >

Siesta Casa is an innovative hub for creative open-minded ninjas who want to make a positive impact on the world.

Casa is able to be used for various workshops, hackathons, birthday parties, clothes swaps or other creative events. Our vision is to empower our Siesta Casa members to have unlimited amounts of fun, to grow together in different fields and, also, to feel cozy even in the office space.

siesta <cloud>

< multipurpose > e-commerce marketplace generator

Siesta Cloud is a cross-sell e-commerce platform for various services, where everyone can share their vision and bring it to life. We offer different cross-sell portals: video portal, travel portal, ticket portal, crowdfunding portal, and voucher portal.

The portals are multifunctional marketplaces with the various customizable features, for example, live-streaming, payment gateway, booking system, multi-currency, distributed management, content administration, event registrations forms, confirmation emails, and many more features for effective functionality of diverse marketplaces.

siesta <solution>

< platform > for managing hospitality facilities

Siesta Solution is a comprehensive solution for managing accommodation facilities. It is designed to increase efficiency, save time, and most importantly to increase revenues. It contains all the important components that every modern hotel system should have. We have built a modern PMS software that allows processing reservations within moments.
