Commencement

M A Y 2 0 1 5

WELCOME FROM THE PRESIDENT

Dear Friends:

This is a momentous day for graduates, families and the entire UConn community. To our graduates, I offer my warmest and most sincere congratulations on your success and your achievements, which each of you worked hard to earn. Today's commencement exercises are the culmination of your time as a student and the fulfillment of our mission as a university when it comes to your education.

I share the pride, excitement and immeasurable hopes for the future that I know each of you feel today. Your education is a great credit to you, and to us; you exemplify the very best we have to offer as you prepare to enter the next chapter of your lives.

Today, a degree will be conferred upon you from one of this nation's truly great public universities. UConn takes great care to ensure that our students are able to receive an education from outstanding faculty on a campus that is home to many exceptional facilities. It is also vital that each of our students gain the kind of experience they desire on a thriving campus where as much can be learned and enjoyed outside the classroom, as in it.

Whatever your plans for the future may be, I hope that your time here has helped give you the knowledge, experience, and confidence that you will need to excel in every aspect of the life you will lead.

The goal of higher education is not confined to academic achievement alone; it is also intended to draw from within you those essential qualities that make each of us an educated, well-rounded individual – and a good citizen. That is one of the simplest, but most important titles we can merit in life and I know each of you will exemplify it, every day. You are a class – and a generation – who will go on to do extraordinary things.

Please enjoy yourselves today and celebrate the honor and distinction that you have earned. And whatever path you choose, I hope you will always carry with you the very fondest memories of your days here at the University of Connecticut.

Congratulations and very best wishes,

A handwritten signature in black ink, appearing to read "Susan Herbst".

Timothy “Scott” Case

Timothy “Scott” Case, an alumnus and Connecticut native, is an innovative entrepreneur, humanitarian and technology pioneer.

He graduated from UConn with a bachelor’s degree in Computer Science and Engineering in 1992. It was here where his entrepreneurial days began. As a senior, Mr. Case co-founded Precision Training Software, which launched the world’s first PC-based simulated flight instructor and photo-realistic flight simulator.

In 1996, he became the founding CTO of Priceline, popularly known as the "Name Your Own Price" company. It was one of only a handful of startups in U.S. history to reach a billion dollars in annual sales in less than 24 months. As Chief Technology Officer, he was responsible for building the technology that drove Priceline’s incredibly fast growth as a business.

In 2006, he joined the Malaria No More team to inspire individuals and institutions to end deaths caused by malaria. The nonprofit organization has distributed malaria nets - the surest way to prevent malaria - to more than 5 million people 17 African countries. It has also launched a campaign to deploy rapid diagnostic tests and artemisinin-based combination treatments to reduce malaria deaths in children.

In 2011, Scott was named founding CEO of the Startup America Partnership, an independent alliance of entrepreneurs, corporations, universities, foundations, and other leaders who

work together to fuel innovative, high-growth U.S. startups. It now operates as Up Global, where Scott invests his energy to support high-growth startup communities in the U.S. and around the world. Celebrating entrepreneurship as a core American value, the organization gives startup companies access to valuable relationships, opportunities, and information.

Most recently, Scott co-founded Main Street Genome, a startup focused on developing a software representation of the entire Main Street Economy. It is a first-of-its-kind simulation of the ‘main street’ economy, designed to provide insight about how owners and their businesses truly function. With this knowledge, they aim to reduce failure rates and produce better results for the millions of business owners that fuel the economy.

Scott also serves as the Chairman of Network for Good, a national nonprofit that has distributed more than \$475 million to 60,000 nonprofits and provides online fundraising and communications services to over 5,000 nonprofit organizations.

The University’s honorary degrees are to be bestowed in “recognition of extraordinary and lasting distinction,” representing the “highest intellectual and moral values.” Scott embodies these qualities in a way that few do, having spent his career proving that entrepreneurship - combined with working for social good - can be a powerful force to improve our world. He can motivate, inspire and challenge the students and is a model for the entire UConn community.

Dr. Barbara Medoff-Cooper

Dr. Barbara Medoff-Cooper, PhD, RN, PNP-BC, FAAN is the Ruth M. Colket Endowed Chair in Pediatric Nursing at the University of Pennsylvania, Philadelphia, PA. She is also a board-certified Pediatric Nurse Practitioner and has continued her clinical practice alongside her teaching and research.

Dr. Medoff-Cooper is internationally recognized for her research on infant development, feeding behaviors in high-risk infants, and infant temperament. Most notably, she holds four patents for the instruments she has developed to measure infant nutritive sucking.

She has received numerous international and national awards for her contributions to nursing science. She received the Outstanding Nurse Research Award in 2012 from the Council for the Advancement of Nursing Science, one of the highest honors a nurse researcher can receive from her peer scientists. She was inducted as a Fellow into the American Academy of Nursing in 1989.

Dr. Medoff-Cooper has been a faculty member at the University of Pennsylvania for more than 30 years, where she has held

many different positions on the faculty and within the leadership team, including an endowed chair in Pediatrics, the Associate Dean for Nursing Research, Nursing Research Center Director, and Coordinator of the Neonatal Nurse Practitioner Program, among others.

She has published extensively both nationally and internationally, including book chapters, monographs, and peer reviewed journal articles. Her current research funding exceeds \$3.5 million. Her contributions to nursing science and research warrant recognition as a preeminent nursing researcher and clinician. She has always been an active practitioner and she believes that her clinical practice is the foundation for her research questions.

Dr. Medoff-Cooper is an accomplished nurse, teacher, administrator, mentor, author, leader, board member, and collaborator. She has impressive research to share. In addition, she is also an inspiring speaker and truly a marvelous human being.

Michael Melio

Mr. Michael Melio is a Waterbury, Connecticut, native who grew up with modest means and built two prosperous companies that provide jobs for people; and wealth that enables him to give back philanthropically to the institutions and communities he is connected to.

The two North Carolina-based companies, Western Piedmont Metal and United American Steel Company, were successful until, in 2008, the US metal market dried up during the recession. Mr. Melio reeducated himself, retooled his businesses, and then rebuilt their combined coffers to \$50 million. Mr. Melio's ambition wasn't to accumulate wealth but to triumph over adversity, to ensure that was the experience his young son would witness, and to protect the livelihoods of the men and women who work for him.

How Mr. Melio started out in the metal recycling business bespeaks his character and motivation. When he had his first

small business, he noticed a staff member struggling with drug addiction. Most small business owners would have fired her, but Mr. Melio's instinct was to help. He reached out with a helping hand and connected her with a program run by his longtime mentor and friend, Tony Robbins, the internationally known motivational speaker. Mr. Melio's bottom line wasn't about dollars, but humanity.

He didn't know that this act of kindness would lead to another mentor and a new career in metal recycling. With awe and gratitude for helping his daughter find the strength and courage she needed to enter recovery, the woman's father offered to take Mr. Melio under his wing to teach him the metal recycling business and stake the financing for Mr. Melio to go out on his own.

Mr. Melio embodies the fortitude, ingenuity and compassion UConn aspires for its graduates.

THE GRADUATE SCHOOL COMMENCEMENT SPEAKER AND HONORARY DEGREE RECIPIENT

Kerry Kennedy

Kerry Kennedy is the president of Robert F. Kennedy Human Rights. For more than thirty years, Ms. Kennedy has devoted herself to the pursuit of equal justice, the promotion and protection of basic rights, and the preservation of the rule of law. She has worked on a range of issues, including children's rights, child labor, disappearances, indigenous land rights, judicial independence, freedom of expression, ethnic violence, impunity, and the environment. She has concentrated specifically on women's rights, exposing injustices and educating audiences about women's issues, particularly honor killings, sexual slavery, domestic violence, workplace discrimination, sexual assault, abuse of prisoners, and more. She has worked in over 60 countries and led hundreds of human rights delegations. At a time of diminished idealism and growing cynicism about public service, her life and lectures are testaments to the commitment to the basic values of human rights.

Under Ms. Kennedy's leadership, RFK Human Rights has grown from a memorial organization dedicated to Robert F. Kennedy into a diverse human rights organization that seeks to

actively continue his unfinished work. Today, Robert F. Kennedy Human Rights partners with the bravest people on Earth to create lasting change. RFK Human Rights supports defenders in the field with advocacy, litigation, and training; brings human rights to students in the classroom with its innovative Speak Truth To Power curriculum; and engages the financial community about sustainable investing and the intersection between business and human rights.

She is the author of *Speak Truth to Power: Human Rights Defenders Who Are Changing Our World*, which features interviews with human rights activists including Marian Wright Edelman, the Dalai Lama, and Archbishop Desmond Tutu, and *Being Catholic Now*. She appears regularly on ABC, NBC, CBS, CNN and PBS as well as on networks in countries around the world, and her commentaries and articles have been published in *The Boston Globe*, *The Chicago Sun-Times*, *L'Unita*, *The Los Angeles Times*, *The Miami Herald*, *Marie Claire*, *The New York Times*, *El Pais*, and *the Yale Journal of International Law*, among others.

THE GRADUATE SCHOOL HONORARY DEGREE RECIPIENT

Peter J. Werth, Jr.

Peter J. Werth, Jr. has channeled his considerable intellect and ambition to improve health and well-being nationally through greater access to affordable medications. He founded ChemWerth, Inc. in 1982 to bring active pharmaceutical ingredients (APIs), the building blocks for generic drugs, to market.

After working in research and development in pharmaceutical giants including Upjohn Pharmaceuticals (now Pfizer) for 17 years, he traveled to China to lay the groundwork to bring Chinese APIs up to US standards and into the country. His work helped forge strong ties with the Chinese pharmaceutical industry and increase imports of APIs, which has lowered the cost of medications in the United States. Generic drugs cost approximately 80 percent less than brand name drugs, saving Americans up to \$10 billion a year, according to the US Food and Drug Administration. That cost-savings can mean the difference between treatment and going without for millions of Americans.

In addition to being a successful chemist and entrepreneur, Mr. Werth is an avid philanthropist, UConn parent (his three children attended) and Huskies fan. The Werth Family Foundation, which he established in 2001 to support Connecticut communities, focuses on higher education,

children's services, human series, the arts, and the environment. These include programs to provide solar energy to an isolated Himalayan village middle school, bringing students from Hartford and UConn to develop a plan and build out. There's the pledge for the Werth Center for Coastal and Marine Studies which will transform education and research at Southern Connecticut State University. A major gift to the Housatonic Community College Foundation supports art conservation and a docent program that introduces middle and high school students in Bridgeport to art and art history. Then there is the Werth Family Basketball Champions Center at UConn—the largest single gift ever received by the Division of Athletics—was a significant milestone in the campaign to fund the Center completely through private dollars.

Mr. Werth's passion is helping people. His immeasurable contributions to health care have benefited scores of Americans, as well as created jobs in the Chinese pharmaceutical industry. Through his philanthropy, he has touched the lives of thousands of citizens across Connecticut and around the globe. Mr. Werth's accomplishments and beneficence are the building blocks of a remarkable legacy, one that will be assuredly even more impressive when fully constructed.

THE GRADUATE SCHOOL STUDENT COMMENCEMENT SPEAKER

Margaret M. Luciano, Class of 2015

Lauded by her major advisor, John Mathieu, as the "... best Ph.D. student that he has ever worked with in his 30 year experience," Margaret Luciano exemplifies what makes University of Connecticut graduate students great. As a first generation college student, she has first-authored in premier academic publications, presented at leading conferences, and received well above average scores for her teaching skills.

Beyond her academic merits, she is a woman with grit and vision, two character traits that have carried her up many hills as she sought this academic career path. Her work ethic, supportive family, and cutting edge scientific research investigation have landed her a much sought after tenure track position at Arizona State University.

Leslie Uggams

Leslie Uggams is one of the leading actresses and most inspired singers of our time. Her work has put a sound track to our history and illuminated our struggles. As historian Bob McCann notes, "...her ability to make her extraordinary talent seem effortless is perhaps why this woman is a 'quiet' legend. But a legend she is." In the midst of the turbulent civil rights movement she used her art form as an eloquent declaration of equality and as protest. She has broken her share of racial barriers as the first African American to be featured regularly on a weekly, prime time television series in all 50 states, as the first African American woman host of a prime time television variety show, and only the second African American woman to win a Tony Award. Also an Emmy Award-winning performer, Ms. Uggams' stellar career brought her from Harlem to Broadway, from the big screen (*Skyjacked*, *Deadpool*) to

television (*The Leslie Uggams Show*, *Nurse Jackie*). Ms. Uggams made history with UConn's Connecticut Repertory Theatre as the first African American woman to play Mama Rose in the critically lauded musical *Gypsy*. Perhaps best known for her stirring portrayal of Kizzy in the landmark TV mini-series *Alex Haley's Roots* (Critics Choice Award, Emmy and Golden Globe nominations), Ms. Uggams has performed to critical and popular acclaim ever since her first professional appearances at the age of nine at the famed Apollo Theater. There she opened for such musical legends as Louis Armstrong, Ella Fitzgerald and Dinah Washington. Now, after six decades on stage and screen, Ms. Uggams is a legend in her own right. She is now on the Board of Directors of the Apollo Theater, and she was recently honored with the American Artist Award in a gala ceremony held at Arena Stage in Washington, DC.

The Honorable Joseph D. Courtney

Congressman Joe Courtney was first elected to the House of Representatives in 2006, and he is currently serving in his fifth term representing the Second Congressional District of Connecticut. He serves on the Armed Services and Education & the Workforce Committees. He is the Ranking Member of the Seapower and Projection Forces Subcommittee.

Courtney became the first Connecticut congressman since Henry Stevens in the 59th Congress more than 100 years ago to serve on the House Agriculture Committee, where he was a member from 2011 through 2014. During the three-year Farm Bill negotiation process, Courtney worked to ensure Connecticut farmers' voices were heard, influencing dairy reform, conservation improvement, local and organic initiatives, land grant-based research programs, and robust specialty crop funding.

Congressman Courtney is a vocal proponent for nearly 2,500 farmers across eastern Connecticut. He was instrumental in expanding specialty crop insurance benefits to oyster farmers along Connecticut's coastline and recently helped usher a new farm-to-school pilot program to the state. Courtney is also a founding co-chairman of the Congressional Dairy Farmers Caucus.

Before serving in the House of Representatives, Joe Courtney represented the citizens of Vernon in the Connecticut General Assembly from 1987 to 1994. Congressman Courtney is a 1975 graduate of Tufts University in Boston and earned a law degree from the University of Connecticut School of Law in 1978. He lives in Vernon with his wife, Audrey Courtney. They have two children, Robert and Elizabeth.

Harriet Sanford

Harriet Sanford has served as president and CEO of the NEA Foundation since 2005. Based in Washington, D.C., the NEA Foundation is committed to supporting the collaborative efforts of public school educators, their unions, school districts, and communities to focus on learning conditions that improve student performance.

An alumna of UConn, having earned a master's degree in public administration from the College of Liberal Arts and Sciences in 1979, Sanford stands out as a trailblazer in public education reform, devoted to the betterment of society through access to quality education, cultural competency, and the arts.

Sanford began her career as a public school classroom teacher, which led to a senior executive career that spans nearly 30 years, including 24 years spent directing such nonprofit, public organizations as the Arts and Science Council in Charlotte, N.C., and the Fulton County Arts Council in Georgia. She has

written extensively on issues of reform, imparting her wisdom to educators, administrators, academics, parents, and the public. She has also served as the architect behind innovative partnerships that are bridging the divides between constellations of education organizations. Here in Connecticut, Sanford was one of the earliest supporters and advocates for the Neag School of Education's CommPACT program, supporting our vision for partnership with urban communities and school systems and ultimately leading to reform initiatives in Hartford, New Haven, and numerous other urban communities across Connecticut.

The trajectory of Sanford's career as well as her dedication to public service and devotion to enhancing arts education and cultural understanding are laudable models for UConn students who endeavor to advance in their fields and make significant contributions to society.

Helen Hays

Helen Hays is an ornithologist and vertebrate zoologist at the American Museum of Natural History and director of the Museum's Great Gull Island Project. The initiative studies a group of threatened and endangered birds that nest on the island in eastern Long Island Sound, and is one of the largest and longest-term field biology studies still ongoing today. Hays, an internationally recognized expert on the biology of terns, has overseen the project since its inception in 1969.

Hays' dedication to ornithology and conservation biology began in her undergraduate career at Wellesley College, where she received a B.A. in biology in 1953. She did graduate work at Cornell University's Delta Waterfowl field station in Manitoba, and earned an M.A. studying the intricacies of ruddy duck breeding biology.

Starting in 1956, Hays worked various jobs, including cataloguing avian specimens and secretarial work at the New York Hospital and the American Museum of Natural History. In 1964, she traveled to Great Gull Island for the first time, and observed the island's dwindling populations of common terns and endangered roseate terns as they nested in the crumbling battlements of the former U.S. Army fort that covered the 17-acre island.

Hays returned to observe the birds each summer, and by 1969, she and a growing group of volunteers began living there full-time from May to September each year. Hays was named Chair of the Museum's Great Gull Island Committee, and every summer since has led the effort to monitor the birds and improve their nesting habits, with the goal of increasing their population. Since 1969, she has recruited, trained, and managed hundreds of volunteers, many of whom return for years or decades.

When Hays began this work, the island was home to about 2,000 pairs of common terns, a threatened species in New York, and 1,500 pairs of roseate terns, an endangered species

worldwide. During Hays' 46 years of field work, both groups have become the largest populations of their species in the Western Hemisphere, totaling about 11,000 pairs.

Hays' work has produced the longest continuous life history data set on any North American bird, which will aid biologists in understanding the effect of climate change on Long Island Sound. She was among the first to discover the devastating effect of polychlorinated biphenyls (PCBs) on wild birds, work that contributed to the development of regulations protecting humans from this widespread pollutant.

In 1993, Hays and a team from the Great Gull Island project traveled to South America to search for the previously undiscovered wintering habitat of the roseate tern. They started in Argentina and worked their way north along the coast looking for the birds. After many weeks, the team observed a flock in southern Bahia, Brazil. For the next 16 years, Hays returned to South America, spearheading cooperative research projects with investigators in Brazil and Argentina, and the Azores in the eastern Atlantic. Her observations of banded birds in South America gave the first evidence of gene flow between populations across the Atlantic.

Through personal example and direct training, Hays has inspired and launched the careers of hundreds of students who have gone on to become biologists, natural history filmmakers, poets, and physicians, and to work for universities, for state, national, and international government agencies, and for non-profit organizations.

Hays' many publications have appeared in major North American ornithology journals. She has been recognized with Elective Membership and election as a Fellow in the American Ornithologists' Union; by a President's Volunteer Action Award from Ronald Reagan; a Conservation Service Award from the U.S. Department of the Interior; and an Alumni Achievement Award from Wellesley College.

Anne Tanner, B.D.S., Ph.D.

Dr. Anne Tanner is an internationally acclaimed scholar and researcher in the fields of dentistry and microbiology. Her pioneering work has led to major discoveries about the nature of childhood dental diseases and the microbiology of dental cavities. Dr. Tanner has had two oral bacteria named for her and her work has been recognized by being awarded a Medicine Hedersdoktor (M.D. Honorary) from Umeå University, Sweden, the International prize from the Swedish Dental Society.

Dr. Tanner's research has linked clinical aspects of dental diseases with the infection-associated bacterial species. She has described new candidates as pathogens for periodontitis and dental caries. In 1988, Dr. Tanner's group named an anaerobic bacteria from aggressive adult periodontitis as *Bacteroides forsythus*. This species is recognized as a major pathogen in adult periodontitis. In 2002, *B. forsythus* was reclassified to a new genus as *Tannerella forsythia* in recognition of Dr. Tanner's contribution in its original description. Another species named for her is *Prevotella tanneræ* which while detected infrequently is also linked with periodontitis. She has named several periodontal *Campylobacter* species, most notably *Campylobacter rectus*. Dr. Tanner's more recent studies in early childhood caries revealed a newly named species, *Scardovia wiggsiae*, as highly disease associated and a candidate pathogen for dental cavities.

Dr. Tanner completed her Bachelor of Dental Surgery (B.D.S.) at the University of London. She received her Ph.D. from London University, doing her research studies at the Forsyth Institute in Boston (now Cambridge), Mass. The Forsyth Institute is affiliated with Harvard University and is one of the world's leading independent organizations dedicated to scientific research into oral health. Her research career has been based in the microbiology department at The Forsyth Institute, including post graduate, junior and senior faculty positions, and she holds an associate clinical professor position at the Harvard School of Dental Medicine.

She has served on the National Institutes Dental and Craniofacial Research (NIDCR) grant review study sections, and is currently on the advisory board to the NIDCR. She was a former president of the Boston chapter of the American Association of Dental Research (AADR) and is currently on the editorial board for the association's journal, the *Journal of Dental Research*. Dr. Tanner is a founder member of American Association of Anaerobes and was a longstanding member of the Gram Negative Anaerobic Taxonomy Committee which oversees bacterial taxonomy for human, veterinary, and environmental microbes. She has presented seminars and research findings throughout the U.S. and internationally.

Kamran E. Safavi, D.M.D., M.Ed.

Dr. Safavi, an international leader in endodontology, has had a distinguished career over the last 37 years at the UConn School of Dental Medicine. He is currently Chair of the School of Dental Medicine's Division of Endodontology in the Department of Oral Health and Diagnostic Sciences and Director of the Advanced Education Residency Program in Endodontology.

Dr. Safavi's research towards better understanding of pulpal inflammation and pulpal-origin infection has resulted in more than 100 published manuscripts or abstracts, and more than 50 invited presentations.

The residency program which he leads is recognized as one of the strongest in the country and has produced many leaders in dental education, research and clinical dentistry. Beyond these academic accomplishments, Dr. Safavi is perhaps best known for his kind and calming demeanor, his compassionate approach to patient care, his deep interest in those he mentors, and for his affection for, and dedication to, the University of Connecticut which has been his academic home for his entire professional career.

Dr. Safavi received a DMD degree from the University of Tehran in 1966, a Certificate in restorative dentistry from the University of London in 1971, and a Master in Education degree and Certificate in Endodontology from the Medical College of Virginia in 1978. He then joined the School of Dental Medicine as Director of Advanced Education Residency Program in Endodontology, a position he has held continuously over the past 37 years. He became a diplomat of the American Board of Endodontics in 1984 and was named Chair of the Division of Endodontology in 2005.

In 2010, based on nominations by his faculty peers and staff, Dr. Safavi was recognized for his dedication to excellence and collaboration and received the Richard A. Garibaldi Doctor's Day Award.

For these remarkable contributions to education, research, administration and service, Dr. Safavi is this year's nominee for the Board of Directors Faculty Recognition Award.

Tim Wu

Tim Wu is the Isidor and Seville Sulzbacher Professor of Law at Columbia Law School, an author and policy advocate, and also the Director of the Poliak Center for the Study of First Amendment Issues at the Columbia University Graduate School of Journalism. He is known for his work on the early development of net neutrality and is the author of *The Master Switch: The Rise and Fall of Information Empires* and co-author of *Who Controls the Internet?: Illusions of a Borderless World*.

Although his best-known work is the development of net neutrality theory, Wu also writes about private power, free speech, copyright, and antitrust. He is a contributing writer for *Newyorker.com* and also writes for *T Magazine*, *The New York Times*, *Slate magazine*, and others, and has twice won the Lowell Thomas Award for travel writing. In 2013, the *National Law Journal* named Wu one of America's 100 Most Influential Lawyers and in 2006 *Scientific American* magazine recognized

him as one of 50 leaders in science and technology. In 2012, he was named a Young Global Leader by the World Economic Forum. In 2014 he ran in the Democratic primary for lieutenant governor of New York, and was endorsed by the *New York Times*.

After graduating from McGill University and Harvard Law School, Wu worked for the U.S. Department of Justice, Office of Legal Counsel, then served as a law clerk for Judge Richard Posner of the 7th Circuit Court of Appeals and for U.S. Supreme Court Justice Stephen Breyer. He worked for Riverstone Networks in the telecommunications industry in Silicon Valley before becoming a professor at the University of Virginia School of Law. In 2006 he joined the faculty at Columbia Law School as a full professor. He has served as a senior advisor to the Federal Trade Commission, as chair of the media reform group Free Press, and also as a fellow at Google.

COMMENCEMENT NOTES

Commencement Day at the University of Connecticut is a time of ceremony and pageantry, embracing traditions dating back to medieval times.

The University of Connecticut was founded as the Storrs Agricultural School in 1881 when the General Assembly accepted a gift of money and land from Charles and Augustus Storrs, natives of Mansfield. In 1893 when it became a land-grant college and officially opened to women, the name was changed to Storrs Agricultural College. As the mission of the institution grew, its name was changed in 1899 to Connecticut Agricultural College, and in 1933 to the Connecticut State College. At first a small but vigorous college with limited undergraduate offerings in agriculture, home economics and mechanical arts, with the development of a university program it became The University of Connecticut in 1939. The Graduate program began in 1935, and in 1949 the University awarded its first doctoral degrees. The regional campuses were established in 1946 to accommodate the influx of veteran students. Today, the University is made up of fourteen different schools and colleges. Through its administrative Divisions, Institutes, and Centers, the University is a Land Grant and Sea Grant College and a Space Grant Consortium Institution, privileged to serve the citizens of the State of Connecticut, and beyond.

Enormous expansion has taken place over the years together

with increased enrollment. Today, the University has an enrollment of over 31,120 students. At Storrs there are over 18,400 undergraduates and more than 8,150 graduate students, representing some 113 nations.

This May, the University will award over 8,220 degrees. Of these, approximately 6,000 will be Bachelor's degrees, 1,600 Master's degrees, 152 Juris Doctor degrees, 44 Master of Laws degrees, 94 Doctor of Pharmacy degrees, 46 Doctor of Dental Medicine degrees, 92 Doctor of Medicine degrees, 5 Doctor of Musical Arts degrees, 6 Doctor of Audiology, 3 Doctor of Education degrees, 6 Doctor of Nursing Practice degrees, 25 Doctor of Physical Therapy degrees, and 57 Doctor of Philosophy degrees. Also to be awarded are 68 diplomas in Professional Education and 24 Associate's degrees in the two-year Ratcliffe Hicks School of Agriculture.

The Commencement Ceremony, because of the large number of graduates, is divided into separate exercises, by college or school. The Schools of Dental Medicine and Medicine, located at the University's Health Center in Farmington, and the School of Law, located in Hartford, hold their own exercises. The Commencement procession in each of the exercises at Storrs is heralded by the ceremonial trumpets, acquired especially for the University's commencement.

The Academic Procession is led by the Bearer of the Mace, followed by the faculty. The University Marshal, identified by his Baton, follows the President, together with the speaker, the Board of Trustees, vice-presidents, deans, and other University officials. The Mace is presented at the center of the stage while members of the platform party enter and take their places. Once the Mace is placed on the stand, it signals the beginning of the ceremony.

The Academic Gowns, Hoods and Regalia represent more than elegance or colorful attire. Academic caps and gowns continue a tradition which reaches far back into the early days of the oldest universities of the Middle Ages. The early European universities were founded by the church; the students, being clerics, were obliged to wear prescribed gowns and caps at all times. Caps and gowns were once common forms of clothing and were retained by the clergy when the laity adopted more modern dress. Though some universities here and abroad have other colors, the usual color for gowns in America is black. Hoods are lined with the official color of the college or university which conferred the degree. The velvet edging of the hood varies in length for bachelors, masters, and doctoral degrees. The color represents the appropriate degree. Mortar boards (caps) are usually black. The tassel for the Bachelor's and Master's degree may be of color distinctive to the degree, and the tassel for the doctoral degree may be made of gold thread. The gown and hood of the University Marshal were made specifically for University ceremonies in the official colors of national flag blue and white. The Processional Marshals wear blue velvet "beefeater" berets.

The Mace is presented at all academic ceremonies. In medieval times maces were weapons of warfare, but today a mace is "a staff borne by, or carried before, a magistrate or other dignitary as an ensign of his authority." It is the emblem and symbol of the President's authority to administer the University. This mace was first used at the Inauguration of President Homer D. Babbidge, Jr. on October 20, 1962. It was designed by Nathan Knobler, former head of the Department of Art. The University's early seal, executed in beautiful wood carving, appears on both faces. A penny dated 1881 is affixed to it, to commemorate the date of the University's founding.

The Baton, carried by the University Marshal, was specifically designed for ceremonial activities at The University of Connecticut and was first used at the Commencement in 1968. The Office of Marshal can also be traced back to the medieval period, and the Baton is a symbol of the Marshal's authority. This Baton has silver mountings and is surmounted by a representation of the University's former seal in enamel, which

itself incorporates the coat of arms of the State of Connecticut. The University Marshal, carrying the Baton, follows the Mace Bearer as she leads the academic procession into and out of the place of ceremony.

The Silver Collar/Medallion, worn by Susan Herbst, President, was first used in 1964, at the time of the University's Silver Anniversary. Each link on the collar represents one of the University's Schools or Colleges and consists of a cloisonné circle engraved with an appropriate design for the particular school and enameled with its traditional school or college colors. Hanging from the chain is a large silver medallion containing the University's early seal.

The Awarding of Degrees at the University of Connecticut is accomplished by a twofold process. First, the candidates for degrees of each respective school or college are presented by the University Marshal. The candidates proceed to the front, receive their diplomas, are congratulated by their administrative officers and return to their seats. The School or College Marshal then officially presents the candidates to the Dean who acknowledges the candidates and *declares* the appropriate degree. Second, when all candidates have been duly presented, the President of the University formally *confers* the appropriate degree. This is accomplished verbally at the time that she speaks the words:

"By virtue of the authority vested in me by the Trustees of The University of Connecticut, and in accordance with the procedures and regulations of the University, I confer upon you the Associate's Degree, appropriate Bachelor's Degree, Master's Degree, Juris Doctor, Doctor of Dental Medicine, Doctor of Medicine, Doctor of Musical Arts, Doctor of Nursing Practice, Doctor of Education, or Doctor of Philosophy for which you have been presented at this One Hundred and Thirty-Sixth Commencement of The University."

The Recessional of the officials and faculty is once again led by the Mace Bearer and University Marshal. The graduates, along with the audience, are requested to remain seated until the recessional is concluded.

Out of respect and courtesy to all graduates, participants and guests are requested to remain in their seats until the ceremony is concluded.

The flowers displayed during the ceremonies are from the University's Plant Science Department greenhouses.

ACADEMIC HONORS

University Scholar

The University Scholar designation is the highest scholastic honor at the University. The individualized undergraduate programs of these students, which in some cases include work toward a graduate degree, are supervised by faculty committees. Up to thirty students are selected as University Scholars in the junior year. Candidates for the University Scholar designation wear medals on gold and blue ribbons at the Commencement exercises.

Honors Scholar

Honors Scholars are outstanding students who complete intensive two- or four-year programs, including Honors courses of unusual breadth and depth. Honors requirements include a senior thesis in the major field. Candidates for the Honors Scholar designation wear medals on blue and white ribbons at the Commencement exercises.

Please Note: An asterisk () after a graduate's name indicates that they are a candidate for dual degrees.*

THE GRADUATE SCHOOL

The parenthetical indication of a conferral date following a degree recipient's name signifies confirmed completion of degree requirements. If no conferral date is indicated, completion of degree requirements could not be confirmed at press time. Conferral of a degree is contingent upon verification by the Graduate School that a student has completed all requirements.

The official seal of the University of Connecticut depicts the ancient and mighty oak. Beautiful and sacred, the venerable oak symbolizes wisdom, longevity and hospitality. To Aristotle, the oak represented human potential.

The oak holds a special place in Connecticut's history. In a time long before statehood, the Connecticut colony's self-governing status was guaranteed by a charter issued by King Charles II of England. When, in 1687, his successor King James II attempted to reinstate the monarchy's authority, the Crown's emissary's efforts were foiled as the Royal Charter was secretly spirited to a temporary hiding place—a majestic oak in Hartford, forever after known as the Charter Oak. The oak became a symbol of freedom worldwide.

The oak has unique meaning for the University as well. In 1884, the commencement exercises of the second graduating

class of the Storrs Agricultural School were held in an oak grove on the Storrs campus. This grove, long a favorite gathering place for a variety of open-air meetings, served as the spiritual home to the growing community of scholars.

The University of Connecticut's graphic interpretation of the oak is a stylized synthesis of two acorns and three oak leaves, representing maturation, intellect and moral strength. The seal is the symbol of a large and diverse institution; it is used by all of the University's schools, colleges, regional campuses, professional schools and UConn Health. It communicates the broader mission of the University as a center for the pursuit, the creation, and the sharing of knowledge. The University of Connecticut, like the mighty oak, is rooted in a proud past and reaches toward a limitless future.
