#### ABSTRACT

Local education agencies expended 36.5 billion for current operations for public elementary and secondary education for the 1970-71 fiscal year. This amount represents an increase of 12.7 percent over the 1969-70 fiscal year. Data for this report were furnished by the State education agencies, and were used to establish the "average per pupil expenditure in a State" as required under Public Laws 81-874 and 89-10 for administration of Title I, ESEA. This report has been expanded and includes data on revenues by source and those expenditure data that have been traditionally included in historical series of public school expenditure reports. A related document is EA 004 958. (Author/MLF)

#### INTRODUCTION

Because of interest expressed in more complete data on public elementary and secondary school revenues and expenditures, the State summary report <u>Current Expenditures</u> by Local <u>Education Agencies for Free Public Elementary and Secondary Education has been expanded. This report for the fiscal year ending June 30, 1971, includes data on revenues by source and those expenditure data which have traditionally been included in historical series of public school expenditure reports. These total data are comparable to data reported in Statistics of State School Systems, a</u>

biennial series published by the U.S. Office of Education.

Data for this report were furnished by the States and outlying areas on OE Form 2350-6, "State Fiscal Report for Fiscal Year 1971," Part B-2, Elementary-Secondary General Information System. This was an expansion of the previous form, OE 2302, "Certification of Current Expenditures Made by Local Educational Agencies," used in establishing the "average per pupil expenditure in a State," as required by Public Laws 81-874 and 89-10.

CURRENT EXPENDITURES ALLOWABLE FOR ADMINISTRATION OF PUBLIC LAWS 81-874 and 89-10

The report of current expenditures for public elementary and secondary day schools was originated for purposes of administration of Public Laws 81-874, School Assistance in Federally Affected Areas, and 89-10, the Elementary and Secondary Education Act of 1965. The definition of current expenditures set by law for these purposes includes expenditures at the local level for public schools through grade 12 for administration, instruction, attendance services, health services, pupil transportation services, operation and maintenance of plant, fixed charges, net expenditures for school lunch, net expenditures for student activities, and expenditures for free summer school. Excluded by law are expenditures for State and intermediate administrative units; expenditures from funds received under titles I, II, and III of Public Law 89-10; value of commodities received under the school lunch program, expenditure of funds received as tuition, transportation, and/or other fees or charges from patrons; and proceeds of sales in the school lunch programs.

Expenditures recognized for these purposes rose \$4.1 billion (12.7 percent) to \$36.5 billion from fiscal year 1970 to fiscal year 1971. During this time the number

of pupils in average daily attendance rose by 240,000 to 42.4 million, a 0.6-percent increase. At the same time, the expenditure per pupil went up from \$766.95 to \$859.89, a 12.1-percent increase (table 1).

The data in table A show that the average expenditure per pupil has in 6 years risen 80.7 percent from the \$476 reported for fiscal year 1965. As the U.S. average has risen, so has the range of expenditures per pupil among the States. In fiscal year 1965, State averages varied from \$260 to \$787 spent per pupil, a difference of \$527. In fiscal year 1971, they ranged from \$470 to \$1,487, or a \$1,017 difference --a 93.0-percent increase in the range. Although expenditures have increased in all the States, it is seen that the State with the lowest expenditure per pupil remains at an expenditure level of about one-third that of the State with the highest expenditure per pupil.

Data shown in table B were adjusted to compensate for the decreased purchasing power of the dollar. When expressed in constant 1970-71 dollars the U.S. average expenditure per pupil showed an increase of \$255, or 42.1 percent, from 1965 to 1971. When so adjusted, the average

1

Table A.--U.S. average and low and high State averages of current expenditures per pupil in average daily attendance reported for administration of Public Laws 81-874 and 89-10: 1964-65 to 1970-71

	<del>-</del> .		
1965	\$476	\$260	\$787
1966	511	270	833
1967	555	302	936
1968	612	313	1,013
1969	685	. 396	1.154
1970	767	431	1,265
1971	860	470	1,487
		• -	

for the State spending the least amount per pupil increased 42.4 percent, about equal to the U.S. increase, while the average for the State spending the largest amount per pupil increased 48.7 percent during this period. Thus, the disparity among the States in dollars expended per pupil is also increasing.

Data for earlier years were adjusted to constant (fiscal year 1971) dollars to compensate for changes in the Consumer Price Index (CPI) published by the U.S. Department of Labor, Bureau of Labor Statistics.

CHART 1.-U. S. AVERAGE AND LOW AND HIGH STATE AVERAGES OF CURRENT EXPENDITURES PER PUPIL IN AVERAGE DAILY ATTENDANCE

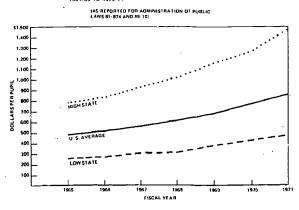

Table B.--Adjusted U.S. average and low and high State averages of current expenditures per pupil in average daily attendance reported for administration of Public Laws 81-874 and 89-10, in constant (1970-71) dollars: 1964-65 to 1970-71

Fiscal year ending June 30	U.S. average	Low State average	High State average
1965 1966 1967 1968 1969 1970	\$605 636 670 715 763 807 860	\$330 336 364 365 441 453 470	\$1,000 1,036 1,129 1,183 1,285 1,330 1,487

Charts 1 and 2 show graphically that the disparity between the high-spending State and the average or low-spending State is increasing. The data for chart 2 were adjusted for changes in the CPI, and the resultant graph indicates that current expenditures per pupil have been increasing at a faster rate than the CPI.

Chart 3 is a frequency distribution of statewide average expenditures per pupil recorded in \$50 intervals. This chart shows that the distribution is skewed to the high end.

CHART 2.-ADJUSTED U. S. AVERAGE AND 17W AND HIGH STATE AVERAGES OF CURRENT EXPENDITURES FOR PUPIL IN AVERAGE INIU.Y ATTENDANCE, IN CONSTANT (1970-71) DOLLARS 1964-65 TO 1970-71

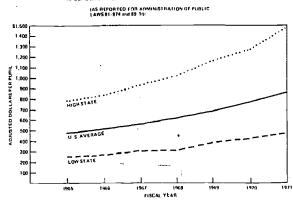

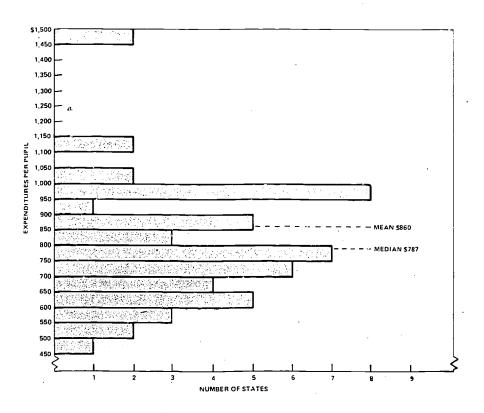

CHART 3.- FREQUENCY DISTRIBUTION OF STATEWIDE EXPENDITURES PER PUPIL IN AVERAGE DAILY ATTENDANCE: UNITED STATES, 1970-71

#### TOTAL EXPENDITURES

The total of expenditures for public elementary and secondary education during the year was \$45.5 billion. Of this amount, \$39.6 billion (87.1 percent) was for current operations (including all day school programs, other programs, community services, and State and intermediate administration), \$4.6 billion (10.0 percent) was for capital expenditures, and \$1.3 billion (2.9 percent) was for interest on long-term debt (table 2).

Expenditures at the local level for current operation of the regular day school program, including local expenditures excluded by Public Law 89-10 and excluding other services and programs, were \$36.9 billion.

As shown in table C the major portion (71 percent) of local day school expenditures were for instruction. Other current expenditures, \$2.7 billion, were for State and intermediate level administration and other school services and

programs such as evening classes, summer school, and community services.

Table C.--Expenditures at the local level for current operation of the regular day school program, by functional category:

<u> 1970-71</u>		
Functional category	Dollars, in billions	Percent
Total	\$36.9	100.0
Local administration Instruction Attendance and health services		3.6 71.0 1.0
Pupil transportation Operation and mainte- nance of plant	1.4 4.0	3.7 10.7
Fixed charges (includes employer share of retirement	3.7	9.9

Note.--Details do not add to totals because of rounding.

#### REVENUES

Revenue receipts are defined as additions to assets which do not incur an obligation that must be met at some future date, do not represent exchanges of property for money, and are available for expenditure. They should not be confused with entitlements, allotments, grant awards, etc. Since the revenues reported were those received during the fiscal year ending June 30, 1971, it is unlikely that the values reported would reconcile with allotments, entitlements, etc. for the same year. Revenue receipts for fiscal year 1971 totaled \$44.5 billion (tables 3 and D).

There was a continued high level of dependence on revenue from local sources, 50.1 percent, which in most States was provided by property taxes (table D). The fact that revenues were less than total expenditures indicates a continued use of deficit financing and results in an increasing amount of outstanding debt.

Revenue per pupil is a comparative expression of dollar resources available for education. When total revenue receipts were divided by average daily attendance (ADA), \$1,049 per pupil in ADA was found for the United States (table 4). Among the States, average revenue ranged from \$653 per pupil for Arkansas to \$1,725 per pupil for New York, a difference of \$1,072.

Revenue from Federal sources averaged \$88 per pupil and varied greatly among the States, ranging from \$41 per pupil for Wisconsin to \$347 per pupil for Alaska. Expressed as percents of total public elementary and secondary revenue for these two States, the Federal portions were 4.0 percent and 20.1 percent, respectively; however, Mississippi's \$186 per pupil from Federal sources represented 28.1 percent of the available revenues for that State.

Revenue from State sources showed similar variations. The U.S. average was \$414 per pupil, with New Hampshire reporting \$95 and Alaska reporting \$1,190, representing, respectively, 10.4 percent and 69.1 percent of public elementary and secondary school revenues for those States. Hawaii reported 87.1 percent of revenues

Table D.--Revenue receipts, by source, for public elementary and secondary education: 1970-71

	lars, in oillions	Percent
Total (all sources)	\$44.5	100.0
Local sources Intermediate sources State sources Federal sources	22.3 .9 17.6 3.8	50.1 2.0 39.4 8.4

Note.--Details do not add to totals because of rounding.

from State sources, and the District of Columbia reported 84.1 percent; however, chese are special cases with all local revenues considered as from State sources.

Intermediate revenue sources (those between the State and the local school system; e.g., counties in some States) vary widely according to the individual State's plan for financing education and may be obtained from property taxes. Revenue from intermediate sources was reported by 24 States. State average revenue per pupil from these sources ranged from \$0.09, less than 0.05 percent of total revenue per pupil, for Mississippi to \$437, or 31.4 percent. for Arizona. These revenues were for a range of purposes, from the operation of intermediate administrative agencies to approximately equal funding of local schools from the three sources: State, intermediate, and local.

Local revenue sources, which must furnish all revenues not provided from other levels, furnished for 1970-71 an average of \$526 per pupil, or 50.1 percent, for the 50 States and the District of Columbia.

These ranged from a low of \$113, or 12.8 percent, for New Mexico to \$980, or 69.2 percent, for Vermont; however, expressed as percents, the low was 10.8 percent for Alaska, and the high was 84.0 percent for New Hampshire.

# PLEASE READ THESE INSTRUCTIONS AND DEFINITIONS BEFORE COMPLET(%) THE FORM. DETACH THIS PORTION AND MAIL COMPLETED FORM TO U.S. DEFICE OF EDUCATION

#### SPECIAL DEFINITIONS FOR SECTION II

Local Education Agency, means a board of education or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent, or other school district located within a State. Such term includes any State agency which directly operates and maintains facilities for providing free public education (within a county, township or other political subdivision of a State).

Free Public Education, means education which is provided at public expense, under public supervision and direction, without tuition charge, and which is provided as elementary or secondary school education in the applicable State, excluding any education provided beyond grade 12.

Current Expenditures (Section II, Line A19), means expenditures for free public education, including expenditures for administration. instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities, but not including expenditures for community services, capital outlay, and debt service, or any expenditures made from funds granted under Titles!; II, or III of the Elementary and Secondary Education Act of 1965 (Public Law 89-10).

Average Daily Attendance. Should be reported in accordance with State law, except that the ADA for education beyond grade 12 and for adult education should be excluded; also, exclude the ADA of pupils for whom tuition payments are received from patrons. Where summer school expenditures are included, Average Daily Attendance (in full time equivalence) of pupils involved must be included.

#### SECTION I - REVENUE AND NONREVENUE RECEIPTS

Revenue receipts are additions to assets which do not incur an obligation that must be met at some future date, do not represent exchanges of property for money, and are available for expenditure by the board of education. State contributions to retirement systems, pensions funds, and social security are to be included. Do not include moneys that support or aid in expenditures for vocational rehabilitation and salaries of personnel for supplementary services such as State libraries and State museums, teacher retirement, teacher placements, etc.

Line A. Revenue from local sources. Enter the total of all revenue produced within the school district operating the schools and available, to the district in the amount produced. These school districts may be common school districts, elementary school districts, high school districts, community college districts, unified school districts, town school districts, city school districts, county school districts, divisions, reorganized school districts, cooperative school districts, dependent school districts, independent school districts, etc.

Include taxation, appropriations, and income from permanent funds and endowments, receipts from the sale of junk, fines, interest on bank deposits and investments, temporary rents and any ohter revenue receipts from local governments not included elsewhere. Also include revenue from funds collected for tuition and transportation paid by patrons, gifts from philanthropic foundations and gifts from private individuals or organizations. Net receipts from food services, student body or other activities should also be included.

Line B. Revenue from intermediate sources. Include all funds collected by an intermediate administrative unit, or a political subdivision between school districts and the State, and distributed to school districts in a mounts different from those which were collected within such districts. Money collected by an intermediate unit as an agent for the local district, and returned to the local school district in the same amount as collected (or less only collection costs), is recorded as revenue from local sources. Funds from taxation and appropriation, income from permanent funds and endowments, and other cash and noncosh revenue receipts are to be included.

An illustration of revenue from intermediate sources is the case of a county intermediate administrative unit which collects taxes within the several local school districts in the county, and distributes the momey thus collected to the local districts on some flat-grant or equalizationaid basis. Another illustration is a county that is not a school unit of any kind, but which may collect and distribute money for school purposes as described in the preceding illustration. Other illustrations of intermediate administrative units are the supervisory or superintendency union units as found in some States.

If the school district operating the schools is on a countywide basis, the revenue from county sources, in such instances, is recorded as revenue from local sources.

Line C. Revenue from State Sources. Include revenues from the State for operation of the State board and State department of education and all funds collected by the State and distributed to intermediate and local school districts in amounts different from those which were collected within such local unit except State aid for Food Services. Examples of the kinds of revole recorded in the accounts under this classification are State grants of money for such things as: General school purposes, Vocational education, Transportation, Special education for exceptional children, Textbooks, Capital outlay, Debt service, Tuition, Consolidation aid, Mining camp aid, Aid for orphans, Library aids, Salaries of officials Cost-of-living adjustments, Visiting teacher programs, Driver education, Child care centers, and Evening school salaries.

Do not include moneys that support or aid in expenditures for vocational rehabilition and salaries of personnel for supplementary services such as State libraries and State musuems, teacher retirement, teacher placements, etc.

Enter the total of all State money collected by the State and distributed to local education agencies through State taxation and appropriation, State permanent funds and endowments, cash and noncash revenue receipts. Include receipts for school services that do not go through the books of the local school system; e.g., State contributions to employee retirement systems and value of textbooks furnished by the State.

DO NOT INCLUDE funds from Federal sources which are distributed through the State education agency. Such Federal funds are to be included in item D. This instruction is consistent with revision of Handbook II made by the U.S. Office of Education - Committee on Educational Data Systems (OE-CEDS) School Finance Standing Committee. The change was transmitted to the State education agencies by a memorandum dated February 16, 1966.

Line D. Revenue from Federal sources. Enter total of ALL Federal funds for State and intermediate administration AND those going to to local school systems either directly or through the State as a distribution agency. Do not include Federal funds going to agencies other than the local public school systems, e.g., that part of ESEA Title I dealing with programs for State operated or supported schools for the handicapped.

Line D1a. Enter cash receipts from U.S. Department of Agriculture for the National School Lunch and Special Milk Programs.

Line D1b. Enter value of commodities donated by the Federal government.

Line D2. Enter cash receipts for Public Law 81-815 to aid school districts in providing minimum school facilities in federally impacted and disaster areas.

Line D3. Enter total amount of all other revenues from Federal sources, other than those listed above. Some examples are:

ESEA Title I for the support of educational programs in areas waving high concentrations of children from low-income families and migrant children; ESEA Title II for school library resources,

textbooks, and other instructional materials; ESEA Title III for supplementary educational centers and services; ESEA Title VI (also known as the Education of the Handicapped Act, Part B2) for regional resource centers to improve education of handicapped children; ESEA, Title VII for bilingual education programs; ESEA Title VIII for dropout prevention programs; NDEA, Title III to strengthen instruction in critical subjects; Public Law 874 for for operational aid to school districts on which Federal activities or major disasters have placed a financial burden; Head Start programs operated directly by the school system; Follow Through programs operated by the local school system; receipts for Vocational Education; and all other receipts from Federal sources.

Line E. Selr-explanatory.

Line F. Enter the total amount received by local education agencies from the sale of bonds, real property and equipment, loans, and proceeds from insurance adjustments.

Line G. Self-explanatory.

SECTION II - CURRENT EXPENDITURES (On not include funds for State or intermediate administration)

Column (1). Report only expenditures by local educational agencies. Where the intermediate or State agency functions as a local educational agency, their expenditures for free public elementary and secondary education are to be included in this column.

Column (2). Report direct State and/or intermediate agency expenditures for operation of free public elementary and secondary schools at the local level, where such expenditures are not recorded in the regular accounts of the local educational agency; e.g., State contributions to employee retirement and textbooks furnished by the State, and therefore have not been reported in Column (1). Do not include expenditures for State institutional schools.

Line 1 through 9. Only the expenditures for operation of schools through grade 12 should be included. Exclude Outgoing Transfer Accounts, 1400 Series, except for the transfer of funds and pupils to local educational agencies in other States; in such cases, both the money AMOUNT transferred and the ADA should be included for the State of residence and excluded from the ADA and expenditures for the RECEIVING State.

Line 10. Report only NET cash expenditures made by the local education agencies from Federal, State, and local sources to cover the deficit for food services (including the special milk program, school lunch and related child feeding programs, but excluding the value of commodities received from the Federal government and income from sales). Net expenditures can be obtained by two methods, (1) subtracting income from sales of lunches from gross cash expenditures OR (2) reporting all tax dollars from Federal, State or local sources.

Line 11. Report only expenditures from public school funds to cover deficits for student-body activities (such as interscholastic athletics, entertainments, etc.) which are not part of the regular instructional program; exclude expenditures charged against receipts from the sale of tickets, student activity fees, etc.

Line 12. Include current expenditures for summer schools only when provided under public supervision and direction at public expense (without tuition charge). If these expenditures are already included in lines 1 through 9, do not enter a dollar figure here; instead, insert note "included in lines 1 through 9." If you cannot furnish ADA for summer school, do not report expenditures for summer school.

Line 14. Report tuition and transportation fees received from patrons which are a reimbursement for items of expenditure reported in lines 1 through 9.

Lines 15 thru 17. Report expenditures made from Federal funds granted under Title I for the education of children of low income families (line 15); under Title II for school library resources, text-

books, and other instructional materials (line 16); and under Title III for supplementary educational centers and services (line 17). Report only expenditures that have been included in the expenditures reported in lines 1 through 9. If these moneys do not go through the books of local school systems, please report the amount in parenthesis and explain.

## SECTION III - ATTENDANCE AND AVERAGE EXPENDITURE PER PUPIL DATA

Line A. Include average daily attendance for summer school pupils if line A12 in Section II is completed or if summer school expenditures are included on lines 1 through 9. Summer school average daily attendance should be adjusted to full-time equivalence of regular day school attendance.

Line B. Self-explanatory.

Line C. Include here any expenditures that are not reported in section II, lines 1 through 13. Enter expenditures for (a) services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc. Include expenditures for summer Head Start programs operated as part of the school system's program, (b) adult education programs, and (c) junior college programs (grades 13 and 14) operated by the local public school system.

Line D. Pursuant to Part B, Sections 121 through 123 of Public Law 91-230, in order to administer "Special Incentive Grants," it is necessary for the U.S. Office of Education to establish an effort index. To do this, information is needed on the amount of Federal funds fother than ESEA, Title I, II, and IIII included in the expenditures reported on line A19, Section II of this report. If actual expenditure data is not available, please report your best estimate of the expenditures that are included. For 1969-70, you reported this information on the margin of OE Form 2302.

# SECTION IV - EXPENDITURES FOR CAPITAL OUTLAY, DEBT SERVICE' AND STATE AND INTERMEDIATE ADMINISTRATION

Line a. Enter the amount spent by and for local education agencies to acquire and improve sites, construct and equip buildings, and purchase other aquipment (classified as capital outlay).

Line B1. Enter the amount spent by and for local education agencies for interest payments on bonds, and short-term and long-term loans. School-housing authority payments should also be included.

Line B2. Enter the amount spent by and for local education agencies for payments on principal to retire serial bonds, short- and long-term loans, warrants or bills; include payments on principal to school-housing authorities.

Line C. Include expenditures for administration by county or other intermediate administrative units.

Line D. Include expenditures for administration by State board of education and State department of education (excluding expenditures for vocational rehabilitation and salaries for personnel for supplementary services such as State library, State museum, teacher retirement, and teacher placement, etc.).

#### SECTION V - RECAPITULATION OF EXPENDITURES

Self-explanatory.

SECTION VI - END OF YEAR MEMBERSHIP

Self-explanatory.
