

Watercolor Workshop in Paris with

Week 4

Paint an image with depth and a strong center of focus.

1. Depth -

Find a reference image that displays depth - utilizing either linear perspective or atmospheric perspective (or both)

2. Center of Focus -

Use the rule of thirds and the idea of contrasts and details to create a strong center of focus.

3. Make it awesome! -

Combine what we've discussed about how to create the illusion of depth, and the elements of creating a strong center of focus into one image.
