HOSHIBOSHI INTRODUCTION:

INTRODUCTION

HOSHI BOSHI

HOSHIBOSHI will build the first web3 Vtuber ecosystem based on the NFT concept.

The NFT collection sales will act like a DAO pass allowing the audience and fans to be able to get involved and contribute to the future and growth of the Vtuber talent agency, as well as its decision making. This can help generate more ideas and content that the audience truly want, which will help build a better IP that caters to the fans' needs.

The NFT collection sales can also act as a seed funding for the company which can keep on bootstrapping for further growth of the business.

By receiving funds when streaming, selling merchandise, collaborating with both Web 3.0 and traditional businesses and Ips, plus other revenue streams, HOSHIBOSHI presents a more sustainable growth compared to other anime NFT collections.

By breaking into both Vtuber and NFT communities, attractive NFT profile picture collections can help kickstart a new Vtuber talent's career as an alternative against traditional Vtuber corporations.
