

# HMS VICTORY RIB ASSEMBLY PLAN

SHOWN FULL SIZE

Use this plan to assemble the ribs for HMS Victory's cross-section. As shown in the instructions, tape this plan to a board or other flat surface and cover with a plastic film to prevent the glue from sticking. Then carefully assemble the separate pieces so that they fit exactly over the plan. This will ensure that all your ribs are the correct shape and give you the perfect basis for assembling the hull.

**Note that (as explained in the instructions) some ribs do not form one continuous section, as they are split by the gun and entry ports.**
