Random Censored Book

Third Edition

by:

Scott A. Barry

This is a book that mainly only a Self Publisher would get me through. This is a self-help book that is anti-god, anti-government, and anti-religion. The text is literally banned everywhere due to all of the Unconstitutional Laws and how we are a Dictatorship Theocracy, even in the USA/Mexico. Book is totally Censored.
For societal rejects, losers, loners, targeted individuals, nobodies.

EAT LIKE A PIG AND SKIP A DAY TECHNIQUE FOR LEAN PEOPLE
Eternal Salvation Free
This is eternal Salvation For f***ing free.
Drink your pee and cure your Cancer.
If you have Aids you'll have to fast on/off and keep doing it.
If you have Aids, stop copulating, you're stuck.
Even if you are semi cured, it still spreads and kills.
That virus is sorta like Ebola pretty much, no 100% cure, fact.
If you get rid of 60-70-80-90 p by fasting on urine distilled water.
Most common method. You have to keep with it. Can't be 100%.
AUT w fasting seems to do it. Plant based, no fructose, no gluten/avenin/processed hybrid grains or refined bleached sugars of any kind, no hybrid GMOs, most illuminati foods are poison and cause excess body fat. The Working Alaskans are lean.
Hail Satan!

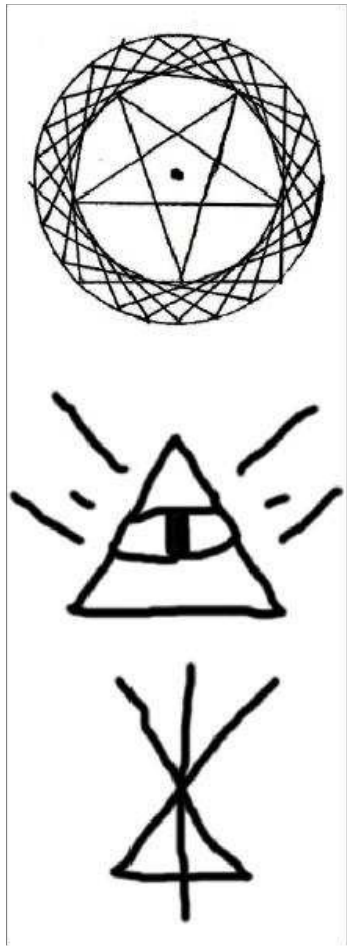
TRIANETICS

By:

Scott A. Barry



PROPER AUDITING THROUGH VERBAL COERCION:
Make sure you have 2 chairs one meter apart and the auditor facing the patient. You do not need a resistance Meter. You can be creative and verbally abuse and cuss out or scream at the patient and call them by this: A SUBHUMAN DEGENERATE WORTHLESS DEFECTIVE CUNT!!! Tell them to fuck off and die and douse themselves in gasoline at the end of the session.

Desc:

TRIA = THREE
NETICS = SOUL

This is about the 3 souls and culling human blood sacrifice of said plebians as we dump the bodies in a lake and get rid of them and pop as many john does / jane does as possible HAIL SATAN!!!!!!!!!! RAPE!!!!!!!

Another 3 hour auditing session of coercion of making them sit still for a long time. 3 meters apart patient face to face with 2 chairs.

Here is a list of chains – not all the possi
ble chains by any means
– found in one case
which had passed for "normal" for
thirty-six years of his life.
COITUS CHAIN, FATHER. 1st incident zygote.
56 succeeding incidents. Two branches, father drunk and father sober.
COITUS CHAIN, LOVER. 1st incident embryo.
18 succeeding incidents. All painful b
ecause of enthusiasm of lover.
CONSTIPATION CHAIN. 1s
t incident zygote.
51 succeeding incidents. Each incident building high pressure on child.
DOUCHE CHAIN. 1st incident embryo.
21 succeeding incidents. One each day to missed period, all into cervix.
SICKNESS CHAIN. 1st incident embryo.
5 succeeding incidents. 3 colds. 1 case grippe. One vomiting spell – hangover.
MORNING SICKNESS CHAIN.
1st incident embryo.
32 succeeding incidents.

CONTRACEPTIVE CHAIN. 1st incident zygote.
1 incident. Some paste substance into cervix.
FIGHT CHAIN. 1st incident embryo.
38 succeeding incidents. Three falls, loud voices, no beating.

Valence shift is seldom used except where an engram
is suspected which will not otherwise be approached by
the patient. He will often approach the engram with vale
nce shift when he will not approach it as himself. Va-
lence shift is somewhat undesirable wh
en employed on a suggestible subject since it violates the dianetic rule
that no positive suggestion be used be
yond those absolutely necessary in
returning and reco
unting and uncover-
ing data. Therefore valence shift is seldom employed and rarely on a suggestible
person. It should be considered
a last resort and practiced only when the pre-clear is en
tirely and completely unable to
confront and attack an
engram which the auditor is certain is present: and this is rare.

ATTEMPTED ABORTION, SURGICAL. 1st incident embryo.
21 succeeding incidents.
ATTEMPTED ABORTION, DOUCHE
. 1st incident foetus.
2 incidents. 1 using paste, 1 using lysol, very strong.
ATTEMPTED ABORTION, PRESSU
RE. 1st incident foetus.
3 incidents. 1 father sitting on moth
er. Two mother jumping off boxes.
HICCOUGH CHAIN. 1st
incident foetus.
5 incidents.
ACCIDENT CHAIN. 1s
t incident embryo.
18 incidents. Various falls and collisions.
MASTURBATION CHAIN. 1st incident embryo.
80 succeeding incidents. Mother masturbati
ng with fingers, jolting child and injuring
child with orgasm.
DOCTOR CHAIN. 1st incident, 1st missed period.
18 visits. Doctor examination painful but

doctor an ally, discovering mother attempt-
ing an abortion and scolding her thoroughly.
PREMATURE LABOR PAINS. 3 days before actual birth.
BIRTH. Instrument. 29 hours labor.
In that mother was a sub-vocal talker this made a sizable quantity of material to be
erased for the remainder of the patient's life wa
s in addition to this. This was a 500-hour case,
non-sonic, imaginary recalls whic
h had to be cancelled out by di
scovering lie factories before
the above data could be obtained.
There are other chains possible but this case was picked because it contains the usual
ones found. Mother's lover is not very unusual, unf
ortunately, for he puts secrecy into a case
to such an extent that when the case seems ve
ry, very secret, then a
lover or two will seem
indictated. But don't suggest them to a pr
e-clear. He may use them for an avoid.
Dianetic Don'ts
Don'
t give any patient a positive suggestion as
therapy in itself or to assist therapy.
Don't fail to give a canceller at every sessi
on's beginning and use it at every session's
end.
Don't ever tell a patient he can "remember this in present time" because the somatic
will come to present time and that is very uncomfortable.
Don't ever, ever, ever, ever tell a patient that he can remember everything that ever
happened to him in present time because that gr
oups everything in present time if the patient

has slid into a deep trance. And that makes
it necessary to unsnarl
a whole case. Want to
waste two hundred hours?

Don't ever retaliate in any way when a pati
ent in reverie gets angry at you. Follow the
auditor's code. If you get angry with him you ma
y throw him into an apathy which will take
you many hours to undo.
Don't evaluate data or tell a patient what is wrong with him.
Don't crow. If the pre-clear
is your wife, or husband, or child, don't rub it in that the
favorite argument phrase was out of
an engram. Of course it was!
Don't question the validity of data. Keep your
reservations to your
self. Audit the in-
formation for your own guidance.
If the patient doesn't know what you think, the engrams
will never get a chance to evade.
Don't ever snap a patient to present time just
because he begs for it. If he is in the mid-
dle of an engram, the only way out of it is throug
h it. The power of the engram is slight when
the patient is returned to it. It turns on hard
when the patient comes to present time. The pa-
tient will have a nervous shock if
he is snapped to present.
Don't ever get frightened, no matter what ki
nd of squirming or squalling a patient may
do. It isn't serious, any of it, although it is sometimes dramatic.
Don't ever promise to clear a case: promis
e only to release it. You may have to go
away or work on something more urgent. And a
broken promise to a pre-clear will be taken
very hard.
Don't interfere with the private life of a
pre-clear or give him guidance. Tell him to
make up his own mind about
what he should do.
Don't break the auditor's code. It is there to
protect you, not just th
e pre-clear. Therapy
can't hurt him if you do but half a job on it and
do half of that wrong; breaking the code can
make you very uncomfortable because it will ma
ke you a target of the

pre-clear and cost you
considerable extra work.
Don't leave engrams half-reduced when
you are given them by the file clerk.
Don't get inventive about dianetics until you
have worked at least one case out. And
don't get too inventive until you have worked a
case which has sonic, a case which has shut-
off sonic, and a case which has imaginary soni
c. Clear these and you
will know. And you will
have met enough engrams to get some ideas that can be of great benefit to dianetics. If you
don't get ideas after that and af
ter you yourself are in
therapy and cleared, there's something
wrong. Dianetics is an expanding science;
but don't expand it unt
il you know which way it
travels.
Don't mix gasoline and alcohol, or dianetic
s and other therapy except purely medical,
dispensed by a professional medical doctor.
Don't get a case snarled up and then take it to a psychiatrist who knows no dianetics.
Only dianetics can unsnarl dianetics and yest
erday's methods won't help your patient one
slightest bit when all he need
s is another run through the one
you snapped him out of too fast.

Take a cinch on your nerve and send him back through the incident again. In dianetics today's
obvious nervous breakdown is tomorrow's most cheerful being.
Don't quit, don't balk. Just keep running engrams. And one day you'll have a release.
And another day you'll have a clear.
Types Of Somatics
There are two kinds of som
atics, those whic

h properly belong to the patient and those
which belong to his mother or some other pers
on. The first actually ha
ppened, so did the sec-
ond. But the patient should not have his mother's somatics. If he does, if he is found com-
plaining of headaches whenever his mother has
a headache, there is an engram, very early,
which says he must have whatever she has: "The
baby is part of me," "I want him to suffer as
I suffer," etc. Or the phrase may be some
entirely misunderstood thing literally taken. How-
ever, all this "comes out in the wash" and
should be no great concern of the auditor's.

"Unconsciousness"

While "unconsciousness" has been covered el
s
ewhere in various ways, in therapy it
has two special manifestations. The yawn and the "boil-off."

The engram of physical pain contains deep "unconsciousness" and if it is going to lift,
particularly in the basic area,
it comes off in yawns. After
a first or second recounting, the
patient starts to yawn. These ya
wns are turning on his analyzer.

In a very extreme engram – a prenatal elec
tric shock which mother received – five
hours of "unconsciousness" "boil-off" have taken place during therapy. The shock lasted for
less than a minute but so close did it bring the
individual to death that
when the incident was
first contacted in therapy, he swam and floundered and had strange dreams, muttered and
mumbled for five hours. That is a
record. Forty-five minutes of this
"boil-off" is rare. Five or
ten minutes of it are not uncommon.

The auditor will take a patient into an area. No somatic turns on. But the patient begins
to drowse into a strange kind of
sleep. He rouses from this from time to time, mutters some-

thing, usually idiotic, rouses again with a dr
eam and generally makes no progress to all ap-
pearances. But progress is being
made. A period when he was al
most dead is coming up to the
surface. Soon a somatic will turn on and the patie
nt will run an engram a few times on com-
mand, will yawn a little and then brighten up. Su
ch a quantity of "unconsciousness" was, of
course, sufficient to keep his anal
yzer about nine-tenths shut off when he was awake for, if it
was near basic, it was part of
every other engram. Such an
engram, with such deep "uncon-
sciousness," when released, produces a marked improvement in a case, as much as a painful
emotion engram at times.
It is up to the audi
tor to sit it through no matter how
long it takes. It may make an un-
cleared auditor very sleepy to watch all this bu
t it should be done. He will rarely strike one
that lasts an hour but every case has such a peri
od lasting from ten minutes to a half hour.
He should stir the patient up once in a while and try to make him go through the en-
gram. There is a very special way to stir a pa
tient into life: don't touch his body for it may be

highly restimulative and make him very upset. T
ouch only the bottoms of his feet with your
hand or your own feet and touc
h them just enough to jog him into attention for a moment.
That keeps the "boil-off" in prog
ress and does not permit the patient
to sag into ordinary sleep.
The "boil-off" can be confused, by an inexperienced auditor, with an engram com-
mand to sleep. However, if the auditor will observe the patient closely, he will find that in the

"boil-off" the patient gives every appearance of being drugged while in a sleep command, he simply goes to sleep and does it very smoothly. The "boil-off" is a trifle restless, full of mutterings and flounderings and dreams. The sleep is smooth.

An engramic command to go to sleep, acting on the returned pre-clear, is broken by sending the somatic strip to the moment when the sleep command is given. If the pre-clear contacts it and goes over it, he will quickly awaken on the track and continue with therapy.

The "boil-off" may be full of yawns, mutterings or grunts. Sleep is usually quiet and gentle.

Just why this is called a "boil-off" and just why auditors are fond of the term is obscure. It was originally and sedately named "comatic reduction" but such erudition has been outvoted by the fact that it has never been used.

If you are fond of listening to dreams, you will find them in plenty in the "boil-off." As images on the desert are distorted by the glass snakes of heat waves, so are the engramic commands distorted to the analyzer through the veil of "unconsciousness."

Locks

It is one of the blessings of nature that the lock is something which needs minor attention. A lock is an incident which, with or without charge, is in conscious recall and which seems to be the reason the aberree is aberrated. Perhaps this was another way the bank protected itself. A lock is a moment of mental discomfort containing no physical pain and no great loss. A scolding, a social disgrace: such things are locks. Any case has thousands and thousands of locks. The auditor will discover them in plenty if he cares to waste time looking for them. The treatment of these locks was the main goal of an old art known as "hypno-

analysis." Most of them can be reduced.
The key-in of an engram takes place at some future date from the time the engram was
actually received. The key-in mo
ment contains analytical reduc
tion from weariness or slight
illness. A situation similar to the engram, which contained "unconsciousness," came about
and keyed-in the engram. This is a primary loc
k. Breaking it, if it can
be found, produces the
effect of keying out the engram. But it can be c
onsidered a waste of time even if it has some
therapeutic value and was used, wit
hout understanding, by some past schools.
If an auditor wants to know how the case
was reacting to life, he can find some of
these thousands and thousands of locks and look
them over. But that is probably all the inter-
est he has in them, for locks discharge. They
discharge automatically the moment the engram
holding them is erased. A whole life rebalances itself when the engrams are gone and the
locks need no treatment. Neither does the pre-cl
ear now cleared need education as to how to
think: like the blowing of locks,
this is an automatic process.

Another thing in Trianetics is to do culling and human blood sacrifice as a way of life to get rid of the plebians and subhuman ingrates.
Examples of plebianism:
Sports
Pop culture
Television
Mainstream Radio
Video Games and Manga/Hentai/Anime/Comics/Other Tabloids
Rag Mags that never show any information
Rap/Hip Hop/Nigger Music
Classical Listener
Excessive Metalhead who listens to too much metal
Neo-Pagans or White Magicks
9-5 slave or Constant Chip eater like Daddy

Windows and Mac Operating System and not Linux or HAIKU/GNU
Facebook
Religion that is Right Hand Path
Believing in God
Believing that Urine is a waste product and not a medicine.
Fox News or CNN
KTTH/KVI
Any of the garbage above
Furries
Mainstream Porn as a means of long use and not to just have an orgasm plus not viewing it on a LIVE USB.
Twitter
YouTube is becoming it with ads and ownership (use archive.org)
Google DNS or ISP DNS and not Freedns.zone or another.
Country Music
Fast Food
Processed Food
Meat and Animal Products, Not drinking mostly water like we should. That is the plebianism that we should destroy through culling of any means or human blood sacrifice of said subhuman ingrates. They are also called defectives by the Eugenics Society.

Stop working in the 9-5 rat race or getting a shitty slave part time job. Become self employed, an entrepreneur, Passive and Residual income. Do not use credit cards which are a debt trap and a scam. Do not Use Windows or Mac OS. Replace it with Puppy Linux or MX Linux on an Older IBM Lenovo ThinkPad T60/61/400s or X200 or even an MSI Wind or whatever the fuck you like just replace the gay/retarded OS.

Troll the system by being FAR RIGHT SOCIALIST OR FAR LEFT COMMUNIST and ALTERNATE.

Never ever go to College, The Military, Trade School. It’s all a fucking scam. Read Books Instead. Do not Join the Military or Go to College a debt Trap and a Scam. Waste of time. Waste of Tuition Money.

Buy an Ankr USB Solar Panel and put it in your Window, Then run other USB shit to replace the electrical Grid and Stop using the Electrical Grid that emits the Lilly Wave and Scalar Waves.

Go Vegan and Plant Based. Avoid Gluten, Flour, Wheat, Rye, Barley, Oats, Go with Vegetation. Alkalinize with Baking Soda and Do Urine Therapy. Baking Soda is Sodium Bicarbonate. Realize Vegtables are best uncooked and cooked foods are a poison, tribes never had refrigeration, All tribes were vegan and did not cook. Duh. Vegtables have less Sugar than fruit and Sugar is a Metabolic Poison. It causes Chromium and B Vitamin Deficiencies.

You can visit my retarded website Archive.is/SNGU4 Flushyourmeds.exblog.jp. #flushyourmeds GOOGLE IT ALREADY!!!

Anyways I have the shit figured out so I am the shitstain to listen to and you are my follower. 12 Globalists run the world. The Council on Foreign Relations is the real Actual Illuminati and they already took over crypto-currencies a long time ago. CFR.ORG is the Councils Website also Donald J Trump said he abandoned Globalism, but he is just a small representative that has no real power at all. The real controllers of the world are an Alien Species called Homo Capensis. Philanthropists and Very Small Unknown Think Tanks Run The World. Rome runs all the courts and governments worldwide so does the Crown City of London. The Vatican of Rome and the Crown of London run absolutely everything period. Next to that are think tanks called Council on Foreign Relations, Rand, Carnegie, JP Morgan, John D Rockefeller, Rothschild, Girfec, Unesco, Bill and Melinda Gates Foundation and the Government of Scotland.

This three ring shit show is to much of a clusterfuck circus for most people to understand so I suggest you ignore Society, The Mainstream Media, All of Television and Radio, Stick to Shortwave and Pirate Radio. Even the Normie Stations should be avoided. Turn off the Television and Radio. Replace it with a computer, Any computer, Who fucking cares if it is backdoored and has hardware keyloggers like all ones shipped within the US. Probably even the x200 IBM Lenovo ThinkPad running Libreboot has a Keylogger installed by the CFR/Illuminati Globalist Think Tanks.

Most people Just do a One Time Pad or permanent half ass cipher. A-z-0-10 associated with a random symbol or 3 digit number.

You can be creative and use Random Diacritics for numbers and Special Characters for your shitty BASE-37 coded language, Just

make sure you never type that shit into any computer. Be aware of OBE’ers and Remote Viewers. It’s gotta be random and have not been typed in a computer. Scanned with an embedded offline scanner/copy machine is best for copies.

Remember the Federal Gay ass Government Backdoored all these computers with keyloggers and they packet sniff all internet. At least purge off Windows For Linux. Same with Mac which can get fucked also.

The second engram type is the pro-survival e
ngram. A child who has been abused is ill.
He is told, while he is partially or wholly "unconscious," that he will be taken care of, that he
is dearly loved, etc. This engram is not taken
as contra-survival but pro-survival. It seems to
be in favor of survival. Of the two this last is
the most aberrative since it is reinforced by the
law of affinity which is always more powerfu
l than fear. Hypnotism preys on this characteris-
tic of the reactive mind, being
a sympathetic address to an ar
tificially unconscious subject.
Hypnotism is as limited as it is
because it does not contain,
as a factor, physical pain, and
painful emotion: things which keep an engram
out of sight and moored below the level of
"consciousness."
The third is the painful emotion engram whic
h is similar to the other engrams. It is
caused by the shock of sudden loss such as the death of a loved one.

The optimum pre-clear would be one who ha
d average response to noises and sights,
who had accurate sonic and visi
o and who could imagine and know
that he was imagining, in
color-visio and tone-sonic. This
person, understand clea
rly, may have aberrations which make

him climb every chimney in town, drink every drop in every bar every night (or try it anyway),
beat his wife, drown his child
ren and suppose himself to be
a jub-jub bird. In the psycho-
somatic line he may have arthritis, gall-bladde
r trouble, dermatitis, migraine headaches and
flat feet. Or he may have that much more ho
rrible aberration – pride in
being average and "ad-
justed." He is still a relatively easy case to clear.

Garbage was technically called delusion in the philosophic work of dianetics, but the term is too harsh and
critical, for who has not some misconception of a past incident?

Lie factory is, technically, a phrase contained in an
engram demanding prevarication – it was originally called
a fabricator.

In Trianetics You have to shun and ignore these Perps/Gang Stalkers/Archons so that. Act Calmly about it to avoid the bipolar stereotype. Ignore them. Quit being docile to them. Be a dissident to your handlers. Quit hanging around them. Go a distance away from the brainwashed sheeple watching TV at the moment so that way they do not bother you. All people who watch Fox News or another TV channel are called sheeple. So avoid seeing them and hanging around them altogether. Do not let their archons get to you. Do not let perps/gang stalkers get to you. They are all gang stalkers and plebians who celebrate Christmas for Jesus Christ like Sheeple. Same with the Halloween Crap. Just hand out candy so they fuck off and leave and never come back. Act calm, never say a word. Ignore them. They are all shitheads. They are under mind control. Seriously. Don’t let Gang Stalkers get to you and do not lash out at all or else risk loosing your Rights or Privledges as we call it in America. Psychiatry is a bullshit system that sucks. It never works. Neither does Scientology. All religions fail. Trianetics is the Way. Us Trianetic People are Atheists that do not believe in God or the Devil and Say Hail Satan! Anyways.

Do what though wilt shall be the whole of the law.

I go by these simple virtues. Being Lazy, Selfish, Insolent, Lustful, and Vain, Just to an extent, but not to where it is totally counter-productive. Just be a little productive and write something, anything, does not matter the quality, spelling, grammer, Political correctness, How many times I PC and Don't say CIA Nigger LOL, Be a political Dissident to the government and stop being docile to authority. Also remember to keep calm and shut your mouth around authority so you don't get fucked and put in the mills foo. Fuck all this normie PC BS. Lets rob a bank and shoot the teller then cut up some bodies with a chain saw and dump them in a Lake. Steal money with 187 licks with a belt. Coercion by scolding hot water in enemas and other places or poured on them Niggers and Kikes. KIKEFAGGOTCIA

The NSA's Project Genie does not want us Saying 911 was a mossad operation and an Inside Job on gay ass facebook. When It is. Gay ass facebook Arrested a man who said in a shitpost that 911 wass a jewish Zionist Mossad Operation and an Inside Job when it really fucking is. Seriously. Since when did people not have freedom of speech. Always rember to not act out to gang stalking and not let gang stalkers get to you and always remember that societies BS is no big deal. Acting out in any situation Inside or in Public gets you committed to Jail or a Psych ward which is less of an issue but loss of Privileges, we never had any fucking rights. We started this gay ass society with Christianity and Genocide after Genocide. Native American/Pagan/Native Taino/Shamanic Genocide of all of those other people who were minding their own business just living life to the fullest when the first form of Globalism was the Anglican and Catholic Churches. The founding fathers ended part of that with a constitution and a declaration of independence. Duh. You need a paper revolution to stop the Anglican Church from taking over. It's called the Constitution and it limits the governments power and the Globalist Power. Mexico's constitution applies more so far better than the US one does. Mexico is Gun Friendly and Has more property rights. Seems like Mexico has more checks and balances due to its constitution. You need to limit the governments power. You need to do a rebuttal. These shitty politicians don't matter. All they do is fuck shit up. Don't bother with the clusterfuck government circus or the mainstream media. All TV/Radio is Lies, Lies, Lies, You are stuck with LULU books and the Darpa Internet. Fucking seriously.
What can you do about it. You can't do shit. You'll never get good education or healthcare. In fact all doctors are pretty much shitty

condescending/verbally abusive/vulgar/annoying/pseudoscientific/quacks/nimrods/scam artists and a cancer especially the psychiatrists. The best thing is urine therapy, Intermittent/alternate day fasting, going plant based and not cooking shit. The Only way to go. Drink water. Not carbonated shit or Milk or Fake Juice. If you grind up juice it makes it more of a concentrated sugar and makes it toxic. Eat just a vegtable or fruit plain like everyone else. Nuts, seeds, Irish Moss, No oats, No gluten or avenin anything.

This mind control cult will finally succeed.

We call it trianetics.
Never ever go to a church or listen to any religious dogma crap.
Realize that there is no scientific evidence of a god and stick to it.
Evolution is a fact and the earth is 4.543 Billion Years Old.
We have carbon dating to prove everything.
The Sun is just a Chemical Reaction of 2 gases. Not a stupid thing that you thought with your delusions.

Seriously if you want to undo this mind control.
You know there is natural selection. You know homosexuality is naturally occuring. You know things did not evolve by accident. The ear made it's way due to other species of humanoid having weak genes and not breeding so the good genes made it into the gene pool. Not by fucking accident. Natural selection means only the superior fittest genes get to breed and make a proprer human with a FOXB2 Speech/Language Gene and A frontal Lobe that allows me to type all of this shit when I am already brain damaged by Meth and so many other drugs. Hail Satan!! FUCK GOD AND ISRAEL!!!
It's Only Okay to be WHITE!!! NO NIGGERS OR KIKES ALLOWED!!!
LOLOLOLOLOLOLLOLOLOLO
echo -ne "x90\x90\ x90\ x90\ x90\ x90\ x90\ x90\ x90\ x90\ x90\"
taco taco taco
187 5150 187 5150 187 5150 187 10-22 belligerent dumb-ass cussing with a 1010 radio license

You see when you get this politically incorrect the government really has to censor you.

It's like using a Flyback Transformer to blow up c4 plastic explosives.

Lolololololollololololo

What about a shit post show for everyone.

1 tsp baking soda in water
1 tsp activated charcoal in water
20 drops of e Grapefruit Seed Extract or Citricare
1 tsp wheat grass in water
1 chaga mushroom capsule
2 tsp oregano or Irish Moss/Sea Moss
12 oz of your own pee and then drink to cure all diseases

The napkin religion is the one true religion because it says so on this napkin.
Governments only care about the assets and not the people, also Christianity failed all of society.

Every moment of your life your mind is recording everything being sensed. The better you make decisions frontal lobe the better you decide. The reactive mind causes acting out to perps and gang stalking crap. Stinkey foods caused nausea to protect you to believe what is a danger. The reactive mind is cause of irrational behaviour. These experiences were stored before you were born as random input outputs during cervical douche. Crapalanche degeneratewafle gooky gook juice wap dago dago 100% GooK.

The Upper Triangle is the KRC Triangle. Responsible and Control with knowledge.

The infinity sidways 8 makes the life force.

This is the Tria
Tria THREE in Tres
Netics Soul
So it means 3 Souls.

Green and Yellow to represent life.

Beaner and rape Jokes are good for society and the mind.

What do you call kids whose parent's are white and mexican?
Crackers and beans! - Blade

What do you call a little mexican?
A paragraph, because he's not quite an essay. -Mike

Why aren't there any spics on Star Trek?
They won't work in the future either!

What do you call a gang of spics running down a hill?
Jailbreak!

Why do blacks put their garbage in clear bags?
So puerto ricans can window shop! -jesse

Why do spics drive lowriders?
So they can drive while they pick strawberries.

What do you call a mexican getting baptised?
Bean dip! -shaun

What do you call a building full of spics?
A jail! -kris

What do you call two mexicans playing basketball?
Juan on Juan!

What do you call a spic with a rubber toe?
Roberto!

How do you kill a mexican?

Throw a quarter off a cliff. -slater

What do you get when you breed a black and a mexican?
A theif who's too lazy to steal!

Why don't mexicans have barbecues?
The beans keep falling through the grill! -ronnie

What did the spic say when his home fell on him?
Get off me holmes!! -habitat

How do you find the richest spic in town?
Drop a penny, whoever catches it is the richest spic!

Why do mexicans eat tamales on christmas?
So they'll have something to unwrap!

Why were there only 40,000 mexicans at the Alamo?
They only have two cars!

How do you start a mexican parade?
Roll a quarter down the street! -Elden

A mexican and a nigger are riding in car . . who's driving?
A cop!

How do you hide money from a mexican?
Hide it under a bar of soap! -Christina

Why is there no mexican olympic team?
All the spics who can run, jump or swim are in the U.S.!

Why is a spic like a pizza?
They're both small, greasy and speak no english!

What is a Mexican without a lawnmower?
Unemployed! -c

Why do mexicans like tiny steering wheels?
It make it easier to drive while handcuffed! -Gogo

What's the best way to make a beaner stop what ever it's doing
open it's cousin, A can of beans.

What's dirtyer than a beaner?
NOTHING

What's something you can never clean?
A mexicans twat

Why do mexicans like fast food?
cause it takes their food weeks to rot for them to eat, So why not a fast meal almost as dirty as their food?

What's the best drug they have in mexico?
Date rape, Why?
Incase clean foreigners come to visit.

what's 5 feet tall and has two humps?
A mexican lady, One for another child and one for her STD.

Why would mexico be the last to parish if global domination occurs?
WHO THE FUCK WANTS MEXICO?!

why were so many niggers killed in the Vietnam war??

because when the sergeant said to "get down", they all got up and

started dancing.

What did God say when he made the first niggers?
Oops! Burnt another one!

A Mexican and a nigger are riding in car . . who's driving?
A cop!

What happens when you stick your hand in a jar of jelly beans?
The black ones steal your watch and rings.

What do you call a smiling black man?

Snigger

What's black and white and rolls down the Boardwalk?

A nigger and a seagull fighting over a French Fry.

What do black men do after sex?

15 years to life.

Did you hear about the 9 year old African nigglet?

He was going through a mid-life crisis.

What's the difference between a black and a white fairytale?

White begins, "once upon a time," black begins, "y'all motherfuckers ain't gonna believe dis shit!"

Standards of the Strong

1. No God(s) shall become before the self, for we are the masters of our own destiny. Anyone who relies on an invisible crutch is useless to society.
2. Life should be led like a wolf, be loyal to your own pack and alert to all that enter your domain.
3. To create something which is strong, one should use quality materials. The same must be done in the making of an elite mind.
4. Never forget those who have betrayed you, because a leopard is unable to change it's spots.
5. Always stand proud for what you believe in, no matter how much it may not be accepted. Hiding in the shadows is not the way of the strong.
6. The weak should be avoided like the plague, unless one can obtain something selfish by dealing with them.
7. Indulge in all of life's pleasures, instead of wallowing in pathetic misery. Life is here and now, so live it to the fullest.
8. Black Magick is the only true magick, because it grants gratification to the magician who uses it correctly.
9. Victory should be praised at all times and failure unaccepted. Conquests are the goals of life.
10. One must take responsibility for his/her own actions, whether it be positive or negative.

~ Vincent Crowley.

Five Satanic Virtues

Selfishness

To be selfish is to ask “What’s in it for me?” Satan rejects sacrifice and martyrdom. The greater good cannot be built on self-inflicted misery. Selfless sacrifice puts us all under the pressing shadow of death. **We reject sacrifice and promote selfish indulgence.**

Laziness

To be lazy is to refuse to do what isn’t working, to stop, to do nothing until we have a better idea, to try something else. When we feel like doing something, we will. If we work too hard, we won’t stop to notice an easier way. **We reject fruitless hard work.**

Insolence

Insolence means not accepting things on authority, refusing to be humble and degraded, refusing to grovel and show respect to superiors. **We insist on dignity and freedom.**

Lustfulness

To be lustful is to embrace all the pleasures we can while we live, to follow our desires and passions wherever they lead us. **We run to the devil that tempts us to ask for more.**

Vanity

To be vain is to love and admire ourselves, to relish our own brilliance and magic, to see in ourselves what is beautiful and attractive, to build and nurture it. To be vain is to accept the forbidden fruit from the serpent in the garden. To be vain is to want to know more. **We proudly leave the narcotic fog of delusion behind us.**

A Simpler Life (in the Northern Mountain States)

Why do we need a simpler Life?

Today we all live in ruthless dictatorships, some times posing as so-called ‘democracies’, and to strengthen their grip on power those who rule plan to destroy our societies, by all means. Yes, no less. They need to destroy our societies in order to have the excuse they need to implement marshal law and to get rid of all opposition, permanently. They want Muslims to clash with Christians. They want Communists to clash with Nationalists. They want traditional men and women to clash with homosexuals and feminists. They want all groups in society to go against each other, head on, violently, brutally and with as much blood-shed and chaos as possible. They want the entire world to look like Syria does today: a Syria they

have destroyed, with their mercenaries. They want a civil war in every country on this planet.
Ladies and gentlemen, Syria is a foretaste of what is to come. Of what they have in store for us all. Of
what they plan for our homelands and for us.
They control the mainstream media and the educational system, and use them to fill our heads with lies.
They control the banks, and use them to enslave us. They own the consumer industry, and use it to
bribe us. They control the pharmaceutical industry, and use it to poison us. They control Hollywood,
and use it to brainwash us. They control our politicians and governments, and use them to destroy our
cultures and societies. They control the so-called ‘Muslims terrorists’ and use them to make us wrongly
belive that Islam is such a huge threat to us all. They control the food industry, and use it to poison us.
They control the USA, and use her as their henchman. They control the EU. They control China. They
control Russia.
They think they control everything.
But they don’t…
“
He who governs his home, governs his life.”
All we need do to strip them of their power is to ignore their media, to home-school our children, to
stop using their banks, to stop consuming like we do today, to use medicine as intended, to stop seeing
films and series made in Hollywood, to not vote for their politicians, to tell the Muslims out there that
we know they are not the terrorists here and to let them know that we have a common enemy, to grow
our own food, to dig our own wells and perhaps most importantly: to lower our living standards.
Instead of trying to have enough money to buy our own freedom, we should understand that we can
only live freely without much money. We are only free if we lower our living standard – and we should
anyhow. The way we live here in the West is neither healthy nor sustainable.
Return to a simpler life, and their power will crumble. And they will fall. Again. Like they have done
so many times in the past.

Return to a simpler life, and you will see that behind the expensive cars, the fashionable clothes, the
empty celebrities, the fancy houses and the thick layers of make-up life has real meaning. Behind all
the lies there is a deep well of wisdom that we can all drink from, and grow wiser, healthier and
happier.
“

To learn who rules over you, simply find out
who you are not allowed to criticize.” (Voltaire)

To make a Pentagram:
Make a circle
Get a Calculator and a Ruler
Calculate 0.95364808*circlediameter then measure then connect the fuckers and you are done.

That is one way to make a pentagram.

So anyways Drink Your Piss, Sun Gaze During Sunrise and Sun Set. Meditate to 528 Hz and fuck the system smash the hell out of it.

DOUSE YOURSELF IN GASOLINE AND FUCKING DIE OR ILL WILL BE ON SUICIDE WATCH LOL

The Nine Satanic Statements

by Anton Szandor LaVey
The Nine Satanic Statements originally appeared in *The Satanic Bible*, © 1969

1. Satan represents indulgence instead of abstinence!

2. Satan represents vital existence instead of spiritual pipe dreams!

3. Satan represents undefiled wisdom instead of hypocritical self-deceit!

4. Satan represents kindness to those who deserve it instead of love wasted on ingrates!

5. Satan represents vengeance instead of turning the other cheek!

6. Satan represents responsibility to the responsible instead of concern for psychic vampires!

7. Satan represents man as just another animal, sometimes better, more often worse than those that walk on all-fours, who, because of his “divine spiritual and intellectual development,” has become the most vicious animal of all!

8. Satan represents all of the so-called sins, as they all lead to physical, mental, or emotional gratification!

9. Satan has been the best friend the Church has ever had, as He has kept it in business all these years!

11 PRINCIPLES of THELEMITES

with no technical jargon

1. I know that exploring and expressing myself is my right and my purpose.

2. I know that every single other being also has the same right & purpose to explore and express their natures.

3. I accept all people no matter what they look like or believe, and I accept all moments no matter if they are good or bad.

4. I am always growing, always searching & striving ever to more in all things.

5. I look at the difficult things in life as my teachers that help me grow, and I embrace them.

6. I never forget that being alive and being aware is a mysterious blessing that always deserves gratitude and joy.

7. I enjoy the beauty in everyone and everything else, and I help to bring more beauty to the world.

8. I seek truth: I think for myself, I am honest with myself and others, and I question myself and others.

9. I explore and develop my creativity in all aspects of life, and I help others to do the same.

10. I am connected with everything in the universe, so I live in harmony with other people, animals, plants, and all other things on the earth and in the whole cosmos.

11. I laugh: I enjoy all parts of the world, and I do not take myself too seriously.

SECULAR HEALTH CARE

By: Scott A. Barry

--DESCRIPTION OF THE DUMB BOOK--
Secular means no religious content. All Businesses should be like this. True Capitalism. This is an Anti-Establishment Book against Western Medicine which is damaging our health and The Practice of Real Nutrition died off in the 1920's long before the beatnicks, hippies and punk*** yippies. You see you people who modeled yourselves after the Roman Empire and Emperor Constantine/Christianity got it all wrong. Catholic Hospitals are Medical Neglect, Satan Loves You, Psychiatry Kills. **** RELIGION

Lets Begin:
Alkaline Water:
1 Tablespoon of Baking Soda (sodium bicarbonate) in Filtered Water.
Stir until clear then you can drink.
20 drops of Citricare or Grapefruit Seed Extract in Filtered Water.
Stir then you can now drink.

1 Tablespoon of Wheat Grass in Filtered Water. Stir like with vigor or use an electric string device to make then drink.
Squeeze an ample amount of Lemon Juice in Filtered Water then Drink.
Activated Charcoal Detox:
Add 1 Tablespoon of food grade activated charcoal (Viva Doria) in a glass/mug 12 oz of Filtered Water.
Sip it down real well then wait for the detox to occur.
Supplements:
Sybmiotics Colostrum Plus (bovine colostrum)
Turmeric with black pepper in a pill.
Irish Moss 1 Tablespoon
Acidophilus (probiotic)
Accuflora (probiotic)
Blue Green Algae (pill and powder form)
Also Try:
Intermittent / Alternate Day Fasting
Also Try:

Switching your water to distilled water and restructuring it with Sunlight.
Also Try:
Turning of the mainstream media and radio that lies to you and is propaganda. Turn off the Television.
Also Try:
Going to bed in accordance with your occupation whether it be day shift or 2nd shift and sleeping a good amount of time like 8-12 Hours.
Also Try:
Drink plenty of well filtered or distilled and restructured water that is a decent Ph and does not cause mucous or any problems with you.
Also Try: Study your body and know what is best with yourself
Also Try:
Limit and avoid MSG, Artificial Sweeteners, Refine White Sugar, Fake Gluten from Factory products, Avoid meat and animal products.

Too much protein and sugar is not good for the liver.
Limit sugar consumption by getting fibres from vegtables instead of fruit.
Get plenty of fibre and realize you do not need that much protein.
Go vegan and animal product free so you are as alkaline as possible and never have acid reflux again.
To take apple cider vineger correctly make sure you get it home made or unpasteurized so that way it is safe. To take it mix 2 teaspoons in 12 oz of distilled water and drink.
Also Try:
Limit blue light exposure by Turning down the brightness on your screen, or switching to e-ink, get a blue light filter program for your computer whether it be Linux or Windows or Mac or Unix or whatever.
Also Try:
Reducing possible stress in your life by switching your platform for your computer to a

nix-like one such as Linux (kernel) or Unix (kernel). You can get MX Linux or Puppy Linux on an older computer. For Newer ones Ubuntu.
Another way to reduce stress is to get rid of all religious dogma and become an Atheist. There is no God or Satan. Really.
Another way to reduce stress is to not buy into the system, get passive income and make your own money within less said time needed and less anal bs. Self Employed is an easy route. You could also work for a small company under the table.
Realize that the only way to be negatively influence or brainwashed is to believe in the 2 political parties which are a scam or have a religious dogma.
No religious affiliation is the key.
Ignore the mainstream media because it is all BS and nonsense. Nothing on it is relevant. Fox News and KTTH count as the mainstream

media because they are owned by NewsCorp. All BS.
Rid your mind of all dogma and religious crap and programming.
Listening to a single tone of 528 Hz sine is a way to heal yourself.
You can even combine this with bone conduction elements. Bone Vibrators.
Ignore all of these sheeple and gang stalkers who are full of religious dogma, delusions and stereotypes. Relize all religion including Christianity is the root to all wars, disease, and societies problems. Realize George Bush, Ronald Reagan Clinton, Bernie Sanders and Obama are all the same Shills who lied to us in the federal Government. Donald Trump was the only guy to abandon globalism according to the CFR. Just ignore Fox News and The Oxy Cotton Popper Rush Limbaugh and whiney Bill O' Rielly, Glenn Beck, and Tucker Carlson and shitty Sean Hannity. All these shitheads in the media are full of it even Jimmy Kimmel the

wanker, Stephen Cobear the nobody shitstain. I hav e the first ammendment to say all of this stuff. Glenn Beck is a nobody shitstain also. So is Dana Lash the Nobody shitstain. I go on Bitchute, D.Tube, Gab.ai, Steemit, Archive.org, Freedns.zone, Dailymotion, Vimeo, Real.video, Pewtube, mega.nz, other peoples wordpresses, other peoples blogspot/blogger blogs to get the real news that is not making it anywhere to the media. You could easily go to truthstream media or World Net Daily or Tarl Warwick (styxhexenhammer666), Lionel Nation, Stephan Moleneux, Computing Forever, JaclynGlenn, calpurnpiso, H.A. Goodman to undo any of the Liberal or Conservative brainwashing. Remember Both Political Parties are a Scam so be non-partison. Duh. I vote independantly. Pro-gun, pro-choice, Pro-Trump, Anti-Psychiatry, Pro-First-Ammendment.
Now deprogramming from religious dogma is your best ant-propaganda guide. It all stems

from BS in Religion and Fascism comes straight from the Roman Catholic Church of 1 AD. Emperor Constantine made this retarded society so did Columbus, Both Equally retards that never really discovered or achieved anything. Does it even matter if they killed anyone. The colonials were retards for replacing Pagans who did lots of drugs, fornicated and had fun. Emperor Constantine was a retard and a nobody. Saint Peter and Saint John Paul were just dictators. Jesus was Julias Ceasar the first. There is no God or Devil. The earth is 4.54+ billion years old. So shit. Evolution is real. Science is somewhat right except for the politicized stuff about climate change being man-made which some science actually debunked. Psychiatry is not a science. Neither is psychology. All they study is social ques and not the FOXB2 gene. So there you get it now. Get it. Get it to your fucking head goddamnit. I am not a preacher. I am telling you god is not real and Hail Satan do

drugs and fornicate. Do anal. LOL. Do blowjobs. Do sodomy. Look at porn in Linux on a Live USB. Be a sinner. Be Lazy, selfish, insolent, lustful and vain because all of the so called sins lead to gratification and good wellness to yourself and your health as well. Being stressed out in a sympathetic state vs a parasympathetic state will just give you a heart attack or stroke. Especially if you are consuming too much refined sugar and proteins from animal products. You know cancer cannot survive in an alkaline oxygenated environment. So you know why we are fucked as a race. Go ahead and drink 12 oz of clean filtered water and take a nice piss because e you will need it. Not all drugs are bad. Just Meth, Heroin, Crack, Cocaine, Oxycottin, PCP, pain killers, Alcohol, and Cigarettes. Cannabis is safer than all of those drugs anyways. So is Guava. So is the natural psychedelic drugs that are not refined and synthetic/synthesized.

If you just ignore the TV and listen to the tone of 528 Hz sine on YouTube or in Audacity as a meditation you will deprogram yourself from the matrix. Be an Atheist so the crap does not get to you.
Also Try:
The Saga Mushroom as a supplement in Pill Form
Lithium Orotate as a supplement in Pill Form
Liposomal Vitamin C as a supplemt in Pill Form
Auto Urine Therapy (drinking 12 oz of your own urine)
Distilled Water Restructured with sunlight
Sun Gazing for 30 seconds or so during sunrise or sunset when the sun is not as strong
See if you just deprogram yourself. Realize college is a scam. Stop watching TV and Listening to the mainstream radio. Stop Voting Far Right or Far Left because both parties are a scam. Donald Trump is actually a centrist. Bush was a problem not Trump.

Many activists are Crypto-Anarchists and Crypto-Libertarians.
They encode their stuff as base64 in Linux to get around tracers.
Base64 my-book.pdf >my-book.pdf.base64
To decode the file:
cat file.pdf.base64 | base64 –decode >file.pdf
---decode uses 2 hyphens
Now for scattering V2K and mind control
aplay _dev_urandom --2 forward slashes
In audacity you can generate 528 Hz sine at 20% and that works as a color bar to stop electronic harassment from the government.
This is Crypto-Activism as a political dissident upload base64 encoded files to Archive.org Mega.nz or Google Drive That evades the tracers and their bs. No 80/20 shill will ever tell you that. Sure a handful of globalists and banksters and thinktanks and philanthropists and NGO's actually run everything which includes the mainstream media. Homo-Capensis Humanoids run the world. Duh. Many

people even fail to realize what happens when we die. As soon as humans die they become psychic ghosts who can remote view anything on earth or in other parts of the universe. Make sure you stay atheist on a plant based vegan diet low in all sugar and protein. You do need sea salt but not fake table salt. Pink Himalayan Salt and Celtic Sea Salt are the good things to add a pinch of in water to preven t panic attacks. So is 2 tsp of Irish Moss or Sea Moss. Good for hot weather. Religious dogma is the root to all disease and societies problems We need to go vegan and plant based and do intermittent and alternate day fasting to stay healthy along with alkalinization, Urine Therapy, and other things like Taking Magnesium such as Natural Calm Magnesium. Seriously though.

Time for some copyright infringement.

REPRINTED FROM BEYOND HEALTH® News
Sugar - A Poor Choice
by Raymond Francis
Health is a choice. If you choose health, sugar is
not an option. Sugar is a dangerous metabolic poison

and a leading contributor to our epidemic of chronic disease. If we want to vastly improve health, one single choice we can make is to stop, or at leas t minimize, sugar consumption. The less you eat and the less frequently you eat it, the better off you will be.

History

Our biologic ancestors did not have access to sugars in the refined forms that exis t today. Sugar was a rare commodity, found primarily in fresh fruits, or perhaps a batc h of honey. Advents in technology brought forth the first sugar refineries during the Napoleonic period. At that time sugar was expensive, and average consumption was about 7 pounds per year. By the end of the 19th century, sugar was affordable, and available to almost everyone. Since 1909, sugar consumption has increased by 70%. Americ ans now eat an average of about 150 pounds of sugar per year, up 25 pounds (20%) since 1970! In terms of ca loric content, sugar makes up more than 25% of the average American's diet and up to 50% of some children's diets! An empty calorie food with no nutritional value whatsoever, sugar is replacing valuable complex carbohydrates as a source of en ergy for humans. Historically we did not eat these refined sugars, and doing so throws the body into a chaotic state of disregulation.

Overview

Here's the problem: The human body was simply not designed to handle refined sugars. They bring about a deadly combination of malnutrition and toxi city. Refined sugar is new to the human diet, and people are eating an enormous amount of it—almos t half a pound per day! Feeding refined sugar to a human body is similar to burning high-octane aircraft fuel in an automobile engine. Impressive amounts of energy, but after a while, you damage the engine. Metabolizing refined sugar is quite a challenge, but if forced to, the body will struggle to cope with it. This struggle causes serious disturbances, and after time, disease is the guaranteed result. If sugar were introduced today as a new product, the FDA would not approve it. FDA approval requires that a produc t be safe. Evidence that sugar damages health is overwhelming. It has been associated with diabet es, tooth decay, heart disease, cancer, and other diseases. In fact, the rise of chronic disease in modern societies has paralleled the rise in sugar consumption. When these facts are examined, one mi ght consider feeding sugar to children a form of child abuse... Instead, we give children sweets as a "reward" for being good!

Nutrient Deficiencies

Food is supposed to support life. Sugar will not suppor
t the life of humans, animals, insects, or even
bacteria. Sugar really isn't food! Sugar requires specif
ic nutrients in order to metabolize in the body. The
refining process strips these nutrients from the so
urce materials like sugar cane, so that metabolism
requires the body to deplete itse
lf. The body uses up its reserves
, causing deficiencies of various B
vitamins, magnesium, chromium, and other nutrients.
Here are some examples of clinically significant
sugar-related deficiencies:

- 20 psychotic teenagers, being unsuccessfully treated with
psychotherapy and tranquilizers, were completely
cured by vitamin B1 supplementation. Sugar had deplet
ed their B vitamin reserves making them deficient
and causing abnormal behavior. One can be sure there
are tens of thousands of
teens out there right now
with similar problems.
- Chromium deficiencies have been linked to both excessive sugar consumption and heart disease. Coronary
disease patients average twice the sugar consumptio
n of healthier people, and have significantly less
chromium in their tissues.
- Sugar and vitamin C use the same transport mechanism.
Excessive sugar intake overloads this transport
system and may cause vitamin C deficiencies.
- Sugar promotes bone loss and causes osteoporosis.
- Sugar inhibits the release of omega 6 essential fatty ac
ids from storage in fat tissues, thereby contributing
to essential fatty acid deficiency.

Metabolic Chaos: Heart Disease, Hypoglycemia & Immunosuppression

Sugar throws body chemistry into biochemical chaos
lasting for six to eight hours after consumption.
During this period, hormone, fat, carbohydrate,
and protein metabolism are greatly disrupted. After
consumption, refined sugar is rapidly absorbed by
the body, which dangerously increases the sugar
content of the blood. Excess sugar causes production
of excess insulin, which signals cells to take up
sugar. Cells then absorb sugar, to get it out of
the bloodstream. This solves one problem but creates
another: Now the body's cells have too much sugar. To
correct this imbalance, cells turn the sugar into
saturated fats and cholesterol. This brings us to heart disease.
In terms of heart disease, eating sugar is similar to

eating saturated fat, only much worse because sugar creates a lot of other problems. Increased insulin levels not only tell the body to store fat, but they also tell it not to release fat. This makes people get fat and stay fat. It caus es fat to be deposited in our cells and organs, resulting in atherosclerosis, fatty liver an d kidneys, and obesity. These fats cause blood cells to become sticky thereby increasing the chances of blood clots, strokes and heart attacks. Sugar increases "bad" LDL cholesterol, decreases "good" HD L cholesterol, and increases triglyceride levels in the blood. If antioxidant vitamins and minerals are de ficient, these triglycerides can be oxidized causing serious health problems. In addition , red blood cells are choked by the saturated fats and this reduces their ability to carry oxygen to our tissues.

Hypoglycemia (low blood sugar) is another proble m caused by sugar consumption. When insulin is secreted into the blood, it makes blood sugar levels fa ll rapidly. Insulin levels remain high however, so the body continues to take up sugar beyond the po int where it needs to. The result is hypoglycemia. Symptoms include weakness, dizziness, crying spells , insomnia, aggression, and depression. Sugar in breakfasts or lunches can cause children to do poor ly in school. They become hypoglycemic about 60 minutes after eating sugar and this affects brain func tion. Many teachers claim that their students are "brain dead" after lunch, and this is why.

Sugar-induced hormone imbalances tax and weaken th e immune system to the point where it can no longer defend the body. When insulin causes blood sugar to fall excessively low, the adrenal glands secret hormones that pump blood sugar back up. Daily consumption of sugar causes an overworked biochemical balancing act resulting in adrenal exhaustion, which in turn decreases the body's ability to respond to future stress. Adrenal exhaustion is now a common problem in the chronically ill. Sugar quadruples adrenaline levels, while increasing both cholesterol and cortisone. Cortisone is known to depress immune function. Studies show that the abilit y of white cells to destroy harmful bacteria is reduced as sugar consumption rises. This is why childre n, who eat lots of sugar, are more susceptible to colds, flu, and other infections.

Fiber Deficiency

Humans were designed to derive energy from comp

lex carbohydrates, which are naturally high in fiber. By contrast, a high sugar diet provides calories wi thout the fiber that is essential to human health. Insufficient fiber causes materials to move too sl owly through the digestive tract. This can cause constipation, which is a big problem in our society. It also causes waste to remain too long in the colon

As Aleister Crowley Said Do what though wilt shall be the whole of the law.
We should ignore the Roman Catholic Chruch of Dogmatic Delusional Biggotted Christianity and learn to think for ourselves. We are all brainwashed and later get deprogrammed after we pass away and turn to psychic human-like ghosts who get to fornicate, do drugs, have fun. This whole system is a matrix. We are all fed up with mainstream content and want something better without all of the BS political correctness. Fuck Political Correctness.
RetardKIKENIGGERCIAGOOKWAFFLETA COOREOMALATOALBINORetard
187
187
187
5150

5150
5150
HAIL FUCKING SATAN!!!!
EAT SHIT AND DIE FEDERAL GOVERNMENT!!!
I do not give 2 shits about the government/NSA’s Project Genie because I run a decent Linux Distro MX Linux and it works much better than Windows or Mac OS those 2 shitty proprietary Operating Systems suck.
Even the older Laptops are better because they are not backdoored and work correctly without the need to set the BIOS from UEFI to Legacy just to run Linux.
Undoing all the Brainwash is what you must do.
Deforestation is bad for the drinking water and our health it causes so much pollution. We are not burning our trash and carbon taxes are actually harming the environment. The landfill is what is harming our health. If we cremated it instead of dumping it people would not even

get any cancer. Dumping waste is not the proper way. Landfills do not work. Recycling always puts it in the landfill. Landfills are causing cancer. Cancer. Cant you see. You do not need a Landfill. You need to boycott these toxic materials and burn your waste. Get it. We need to stop producing plastic because it is making males infertile. Duh. So are the psychiatric drugs and snake oil pharmeceuticals. Urine therapy works better than any other pharmeceutical we have ever invented. All pharmeceuticals are snake oil and quackery and so is psychiatry as a whole. The real science is realizing synthetic things like vaccines cause brain damage and natural things like honey treat an injury. Seriously. Your world is sold off to forein corporations when Nixon opened up forein trade. You people are so brainwashed. The Generations after the beatnicks are all brainwashed. The 40’s and the 50’s actually had some sense in them. We are running out of clean water to drink and nobody

seems to care. They even add fluoride a poison to the water. All the worlds health problems are caused by foreign corporations and religion. Grow your own food or get it from nature instead of getting food that is made in a factory and sat there for several years before being put on the shelves at the grocery store. Your world is so ass backwards it thinks that circumcision or cutting off a foreskin is somehow scientifically proven to have health benefits when it has no health benefits. You go after other people who are targeted and Voice to Skull them Bullshit through a microphone and they actually then have delusions and believe that bullshit. Get away from EMF radiation and Cell Towers, 5G etc. Get away from WiFi and other radio like Bluetooth. Get wired ethernet. Smoke cannabis as your ideal drug along with taking MDA and MDMA which are better than alcohol and cigarettes and open your eyes up to a better reality. Seriously.

More Copyright Infringement:

“***Fluoride is likely to cause decreased melatonin production and to have other effects on normal pineal function, which in turn could contribute to a variety of effects in humans.” ~National Research Council 2006***

Psychiatric Drugs MSG and Fluoride and High Fructose Corn Syrup and Aspartame all screw up PSI abilities along with Fluoride, WIFI, and Any Wireless Radio Cell Technology.

5 Things That Can Block Your Psychic Abilities

1. Ingesting toxic substances such as: cigarettes, coffee, drugs, alcohol, and sugar. These substances are often abused by people. I believe even if you use these substances in moderation you are walking a fine line between unhealthy habits and overindulgent behavior. When we give into addiction, we are allowing negative emotional attachments to possibly attach to our auric field causing us to leak energy and lower our vibrations. **Never, ever go into an altered state for a reading, meditation and or healing under the influence of mind altering substances!!**
2. Participating in drama and gossip dims our vibrations. When we are talking about others in a negative way, we are harming the soul of another. This is a lower consciousness activity. By directing hurtful words towards another we are moving away from raising our consciousness by participating in words and emotions that have lower thoughtforms attached to them. Walk away from drama and gossip. Did you know that you do not have to be in the same room to hurt another soul? Words are energy, emotions are energy, they have an equal effect as being in the same room or in a different place than we are. The result is the same.
3. Allowing the negative ego to get out of control will most certainly stop your progression as a budding intuitive. I am talking about using your psychic abilities unethically such as: spying on others – a definite NO NO, trying to use your gift to influence others out of your need for control, and trying to one-up others by showing off your psychic abilities.

4. Not creating a safe and protected working environment for your spiritual practices such as meditation, readings and healings. If we do not clear and keep ourselves and spaces energetically clean we can leave the door open for unwanted energy to come in.
5. Not setting boundaries and knowing your limitations is always a dangerous thing! Doing any psychic work when you are sick, tired or in a really unhealthy emotional place is going to shut down your psychic abilities instantly. It is important for us to take our psychic temperature each and every time we intend to open up ourselves psychically and be honest with ourselves and our limitations.

Meditation is as easy as scrying into a 5 pointed circumscribed star pointing down with a dot in the center for 1 hour or listening to 4 hz isochronic tones or some 4 hz monaural beats of 126.22 and 130 Hz joined together in Audacity or Adobe Auditions. Going Parasympathetic with getting exercise is essential for health.

Ozonated Water is also good. So is an air ionizer. You will notice it removing nano particles and C60 from your body.

This is the thing for all of us to deprogram. We all need to relize that religion is a dogmatic cult, There is no God, There is no Devil, and No proof of a Heaven or a Hell. You'll probably just be a remote viewer. Who Knows.

All this BS IN THE CULTURE WAR CONSTANTLY LOOSING FRIENDS SPOOFED ACCOUNTS AND OTHER DRAMA BS.

True, bush sucked but Obama was worse, but the people loved Obama it made no sense.

The cultural engineers did their job well but I think they're having trouble keeping up with things for now.

Another thing, the school shootings didn't make ours and older generations want a gun ban, but it's starting to work on the younger generations that are still in school. They want to take away their own gun rights lmao, can't make this shit up, and that means the generation after them may want it more if it works. They could ban guns in another 2 generations anything is possible, but they may not be able to keep their broken system in place for long enough to pull it off.

Trump put a huge cog in the wheel for leftists, neocons and neoliberals. That's why the media bashes him every day.

The lefts plans were to keep putting socialist legislation in place, like obamacare, free college, etc and then bring a bunch of immigrants in so that the immigrants keep electing the leftists.

Completely Agree. You are like different now. Your words are spot on. Before you sounded

like someone in Anti-fa. Now you sound just spot on. Are you changing politically?

I don't like to go by labels but I am just a small government minarchist. The Declaration

of independence is our rules not theirs. (The Financial System). True though that some

real anarchists are peaceful and start small movements and leader-less societies (no boss

basically) Migrant Run Factories in Argentina, Workers Cooperatives in North America. Also Libertarians are small government. Anarchists also want to bring down big

government. Why can't we work together? To Bring it down. The system Basically sucks

Paper Affidavit Revolutions to rebut extremism. All done through the mail. Some people just

bust down buildings while others rebut authority with paper.

The cultural engineers still havent goten us yet. We still have people who only listen to

some more open alpha male type old timers. Some tini boppers are long gone though and fucked by pop culture and other garbage. Some newer gens are sheeple.

Just been studying, i was more on the left on most issues up till 2017 then the just they lost me, I can't go back, Never again lol. I hope the right keeps the left in check seriously. I always knew about false flags and gun ban agendas though, and that Obama was trash. It's taken me a long time to catch up because I was dealing with other issues, I basically spent last year trying to get myself off of the chess board which I was kinda succesful in doing. I'm basically having to re learn politics and history.

Right now I'm trying to figure out what leads to communism/faschism and I do see reoccuring themes but it's really hard to find any information. most vidoes and lectures I look up on communism are either misinformation or lectures/documentaries made by morons. Like I don't need a set of linear events that happened, I need to know why these events happened, what caused them. Most people lecturing about this aren't capable of critical thinking. I don't think most people understand or care about why communist or fascist dictatorships happen. That leads me to believe this is something that kinda slips in through the back door,

Reoccuring themes I see in history after a little bit of studying are (not in any particular order)

the current political parties/representatives and/or paradigms become outdated, usually following an influx of education or information

the people say they are oppressed for whatever reason and form extremist parties

one party overthrows the other one

guns are banned

free speech is banned

any attack by the dominant political party on the opposing political party not punished

anyone accused of wrong think is thrown under the bus, punished, etc.

anyone with opposing views is killed.

I don't think the right will be able to keep the left in check, and I think there is some kind of shadow government pushing the left over the edge.

I'm still trying to figure this out but I do know alot about social engineering and I know when it's being used.

I'm centrist more now than I ever was.

Even looking at my situation now, I'm on ssi I live on 750 a month, theres no decent jobs for me at this point.

even if I get a job I'll just be making someone else rich. As far as ssi is concerned they don't give a shit what happens to me

it would be really easy to end up in some gutter low income neighborhood filled with drug addicts but I'm already taking precautions to make sure that never happens. ssi is just a nice cushioned trip to the gutter for most people.

I do have a plan, I'm saving most money out of my ssi and plasma donations, I'm buying a car, will figure out a way to buy a mobile home, I can own a car of any value on ssi but I'm not allowed to have more than 2000 in cash or assetts so I can't stay on ssi in the long term, I'll have to start some kind of business. if I had a few thousand saved I could start some kind of business for myself.

---

it's true, the only way to combat social engineering is by information :)

so people need to openly speak out about this stuff but youtube and the msm is making that incredibly difficult

I remember my style of blogs, they were disorganized. I'm not a good enough speaker but I was building a following

I quit youtube with 1000 subs, if I stayed in the game and improved I would've gotten more of a following.

Back then I was too polarized though, I can't ever do that again.

we just need facts and people who have a real understanding of what is going on.

Now this can be a hassle you get a person who constantly shifts opinions left and right then suddenly turns against you while deleting accounts. Another thing of BS you do not have to deal with. Just ignore these perps/gang stalkers and do not let it ever get to you.

The not so Secular Side of this book.
Rember to indulge in being Lazy, Selfish, Insolent, Lustful, and Vain.
Write anything you like here

A Prayer for those who sin.

SATAN, infernal tempter, Dark Lord of seduction and chaos, **I am a sinner, and proudly so!** Continue to advise me in the ways of wickedness. Drive from my heart the hateful forces of guilt and holiness. I take ownership of my desires and commit myself to my own pleasure and satisfaction! I will follow my passions wherever they lead me! SATAN, ***I do not confine you to my heart!*** May your Dark Presence flow from there into my life and actions. Make trouble for all who stand in my way!

This is the best anti-government book you can try out for bullshitting any of these CIA Niggers LOL. 187 on a KIKE. Death to Zionism and Israel. 911 was a Mossad Operation. Skip all flu and other vaccines and lie about it as good as possible. Don’t trust your shitty pathetic government.

For a fully featured software archive go to:

satanicsoftware.blogspot.com

For a custom made operating system that works when you type root root startx several times go to: nopos4.blogspot.com

For a Linux Distro that at least has more features and is ready for video editing and drive encryption with LUKS in gnome-disks go to: libertarianlinux.blogspot.com

The government is not to be trusted and is not your friend. Many so called people are liars, perps, gang stalkers, and eyes/ears of the state as well as PC liberals. Liberal Politics means being for gun control carbon tax and internet censorship. They all believe climate change or global warming is man-made when we know it is not. All liberals are full of shit and both political parties are a scam. If all we get is a neocon or a neolib do not vote. Only vote when there is a centrist or a libertarian or an anarchist. This is the system that the banksters want. They want chaos and destruction to happen everywhere. CFR.ORG is an actual fucking website that you can ping and there is Globalism and a Ruling Class. So is rand, carnigie, and unesco/girfec. Girfec created that psychiatry BS with their mindfullness crap. The only thing good in there is Keep Calm and Carry On which can be called. Just ignore your shitty gang stalkers. Nuff said. If you are thinking of saving speech for a good reason try

woodsnap and zazzle they allow for saved speech on different materials. Just get a vector and high resolution graphic.
Photoshop/Gimp/Inkscape/Other Vector editor.
You can easily generate a meme to preserve speech or just go into word processing like openoffice or microsoft word and type whatever and export as PDF conver to PNG/JPG Jpeg is universal and allows compression. I use JPG and MP3 and 32K for the best compression as well as data uri schemes.
You can make a scheme like this:
data:text/html;base64,
data:application/mp3;base64,

and just encode the whole damn file as base64

God Belief is a BRAIN DISEASE

Standards of the Strong – Order of the Evil Eye – Acheron/Black Metal

1. No God(s) shall become before the self, for we are the masters of our own destiny. Anyone who relies on an invisible crutch is useless to society.
2. Life should be led like a wolf, be loyal to your own pack and alert to all that enter your domain.
3. To create something which is strong, one should use quality materials. The same must be done in the making of an elite mind.
4. Never forget those who have betrayed you, because a leopard is unable to change it's spots.
5. Always stand proud for what you believe in, no matter how much it may not be accepted. Hiding in the shadows is not the way of the strong.
6. The weak should be avoided like the plague, unless one can obtain something selfish by dealing with them.
7. Indulge in all of life's pleasures, instead of wallowing in pathetic misery. Life is here and now, so live it to the fullest.
8. Black Magick is the only true magick, because it grants gratification to the magician who uses it correctly.
9. Victory should be praised at all times and failure unaccepted. Conquests are the goals of life.
10. One must take responsibility for his/her own actions, whether it be positive or negative.

~ Vincent Crowley.

Five Satanic Virtues

Selfishness

To be selfish is to ask "What's in it for me?" Satan rejects sacrifice and martyrdom. The greater good cannot be built on self-inflicted misery. Selfless sacrifice puts us all under the pressing shadow of death. **We reject sacrifice and promote selfish indulgence.**

Laziness

To be lazy is to refuse to do what isn't working, to stop, to do nothing until we have a better idea, to try something else. When we feel like doing something, we will. If we work too hard, we won't stop to notice an easier way. **We reject fruitless hard work.**

Insolence

Insolence means not accepting things on authority, refusing to be humble and degraded, refusing to grovel and show respect to superiors. **We insist on dignity and freedom.**

Lustfulness

To be lustful is to embrace all the pleasures we can while we live, to follow our desires and passions wherever they lead us. **We run to the devil that tempts us to ask for more.**

Vanity

To be vain is to love and admire ourselves, to relish our own brilliance and magic, to see in ourselves what is beautiful and attractive, to build and nurture it. To be vain is to accept the forbidden fruit from the serpent in the garden. To be vain is to want to know more. **We proudly leave the narcotic fog of delusion behind us.**

"Christianity is the root to all problems in the modern world."
---Varg Vikernes.
"Psychiatry is a tool of political control used to silence dissidents through psychiatric reprisal" ---Mien.
"As soon as humans die they become psychic ghosts." ---Emily.

Black Ice: The Law Enforcement Freenet Project

Wayne Becker, Special Investigator
Missouri ICAC Task Force
Dent County Sheriff's Office

Black Ice: The Law Enforcement Freenet Project

Abstract

Freenet is a distributed, Internet-wide, peer-to-peer overlay network designed to allow anonymous and censorship resistant publication and distribution of information. The system is regularly used to distribute and download child abuse material. The Black Ice Project is an effort of the Missouri ICAC Task Force to discover a way to identify subjects using *Freenet* to exchange child abuse material and develop sufficient probable cause to obtain a search warrant.

This paper describes the basic functioning of *Freenet*, how it is used by persons exchanging child abuse material, the system's vulnerabilities and how the Black Ice project exploits them. This paper also contains a section on the forensic opportunities when *Freenet* is encountered either as a result of a Black Ice investigation or from another source. An in-depth discussion of *Freenet* and its theories of operation is not in the scope of this paper and the reader is referred to the references section for sources of a more detailed and academic discussion.

While this paper will describe the technique used to obtain probable cause for a search warrant this paper alone is not enough education to use the output of Black Ice to make criminal cases. Additional training, including a hands on lab environment, is essential to a thorough understanding of the topic.

Funding for this project was made available by the Missouri Multi-Jurisdictional Cyber Crime Grant (MJCCG), which was created by funding made available by the U.S. Department of Justice, Bureau of Justice Assistance and the State of Missouri, Department of Public Safety under the American Recovery & Reinvestment Act of 2009; the Missouri ICAC Task Force through the PROTECT Act of 2008; and the Missouri State Cyber Crime Grant (SCCG) through the Missouri Department of Public Safety.

Freenet

Freenet is a peer-to-peer platform for censorship-resistant, secure, and anonymous communication and file sharing on the Internet. It was originally designed by Ian Clarke, a computer science student at the University of Edinburgh, Scotland. In Clarke's final year at Edinburgh, he completed his final year project, entitled "A Distributed, Decentralised Information Storage and Retrieval System". In July 1999 Clarke decided to release it to the Internet and invited volunteers to help implement his design. The resulting free software project became known as *Freenet*. According to Clarke, *Freenet* aims to provide freedom of speech through a peer-to-peer network with strong protection of anonymity; as part of supporting its users' freedom, *Freenet* is free and open source software. It uses decentralized, distributed data stores to store information, and has a suite of free software for working with this data store. Users contribute to the network by giving bandwidth and a portion of their hard drive (called the *datastore*) for storing files. Files are automatically kept or deleted depending on how popular they are, with the least popular being discarded to make way for newer or more popular content. Files are encrypted, so generally the user cannot easily discover what is in his data store. Chat forums, websites, and search functionality, are all built on top of this distributed data store.

Freenet works by storing small encrypted blocks of content distributed on the computers of its users and connecting only through intermediate computers which pass on requests for content and sending them back without knowing the contents of the full file, similar to how routers on the Internet route packets without knowing anything about files. Except *Freenet* provides caching, encryption, and does not rely on centralized structures. This allows users to anonymously publish or retrieve various kinds of information.

Through the use of separate applications, or plugins, loaded along with the *Freenet* software, users can interact with the network in other ways, such as forums similar to web forums or Usenet. *Frost* is one such forum application.

While *Freenet* provides an HTTP interface for browsing *Freesites,* Internet sites that only exist within *Freenet,* it is not a proxy for the World Wide Web. *Freenet* can only be used to access content that has been previously inserted into the *Freenet* network. *Freenet* attempts to protect the anonymity of both subjects inserting data into the network (uploading) and those retrieving data from the network (downloading). Unlike other file sharing systems, there is no need for the subject uploading the file to remain on the network after uploading a file or group of files. Instead, during the upload process, the files are broken into blocks, or splits, and stored on a variety of other computers on the network. When downloading, those blocks are found and reassembled.

Unlike other P2P networks, *Freenet* not only transmits data between nodes (nodes are computers running *Freenet*) but actually stores data, working as a huge distributed cache. Files on *Freenet* are split into multiple small blocks, with additional blocks added to provide redundancy. Each block is handled independently, meaning that a single file may have parts stored on many different nodes. An index to the complete file is contained in a high level block, or manifest.

A user wishing to share a file "inserts" the file to the network. After insertion is finished, the user receives the key to the file and then the uploading node is free to shut down, because the file is stored in the network. It will remain available for other users whether or not the original uploading node is online. No single node is responsible for the content; instead, it is replicated to many different nodes. However, there is no ability to search for a file key that has been inserted into the network. The user sharing the file has to make the key available to either an individual using something like email, or to a broader audience by posting it on a message board, forum or on a *Freesite.*

Freenet provides two (2) modes of operation, *OpenNet* and *DarkNet*. *OpenNet* makes connections to any other *OpenNet* node, or strangers. In *DarkNet* mode, connections are only made only to friends a user has previously exchanged node ids with, creating a closed network.

Freenet Keys

Data is referenced and retrieved using keys. *Freenet* uses three (3) main key types:

> **Updatable Subspace Key (USK)** is primarily used for *Freesites* sites, web pages stored within *Freenet*. It has a public key to retrieve the site webpage and a private key used to update site.

Signed-Subspace Key (SSK) is similar to USK, but used for files. It has a public key used to retrieve files and a private key used to insert the file. If two (2) different users insert the identical file using an SSK each will have a unique key.

Content Hash Key (CHK) is the basic key used for static data such as images, video, and documents. It is the most common key in *Freenet* and is also the key for all the underlying splits for a file with a SSK. A CHK is a SHA256, base 64 hash of a document. The CHK is unique by nature and provides for tamperproof content. CHKs also reduce the redundancy of data since the same data will have the same CHK. The CHK consists of three parts:

1. the hash for the file
2. the decryption key that unlocks the file, and
3. the cryptographic settings used

A typical CHK key looks like this:

CHK @ file hash , decryption key , crypto settings

Or for example:

CHK @ SVbD9~HM5nzf3AX4yFCBc-A4dhNUF5DPJZLL5NX5Brs , bA7qLNJR7IXRKn6uS5PAySjIM6azPFvK~18kSi6bbNQ , AAEA--8

The full (or manifest) key is required for an end user to retrieve a file, but only the file hash portion of the key is passed through the network, so an intermediate node does not have the ability to decrypt the file. The decryption key and crypto settings are required. The crypto settings tell *Freenet*, the type of encryption used, if the file is compressed and how, and the version of *Freenet* the file was inserted under for backward compatibility.

For each file there are very many CHK keys (or CHK blocks) inserted, each is 32kb in size. The first block is the manifest that contains metadata about the file, and lists the CHKs to all split file data and check blocks. This is the block that the shared CHK/SSK key points. If this manifest disappears from the network, the download cannot start.

Split File Manifest Example:

Split file: CHK@RNWeZbc9pj5DFB4lFy0kYuXMOFE9E865DnmA~-jV5O4,lZx4CgyrnxByVZolEy6UuAFY9Uwm4rX7UOCMkLIHP2c,AAMC--8/Daddy%27s%20Girl%201.wmv

```

The split keys are divided into equal segments of no more than 128 keys (256 with the check block keys). If all the keys for a file will fit in the manifest then the keys point to the actual data blocks of the file. In fact, if the file is less than 32kb, the file itself is contained in the manifest block. Otherwise, the keys in the manifest point to additional blocks of equal size containing the keys to all data and check blocks. If the file is large enough to require split file blocks the split file blocks are also required to be able to download the file.

The data blocks are the actual file and it is possible for some of these to fall out of the network. Using a forward error correction technique the check blocks provide redundancy to be able to recreate missing data blocks or *heal* files. If some data blocks are missing, check blocks are used to recover the data. Check blocks themselves can also be recovered from the data blocks. This healing process results in the occasional insert of a block for a file occurring in the middle of the requests to retrieve blocks of the same file.

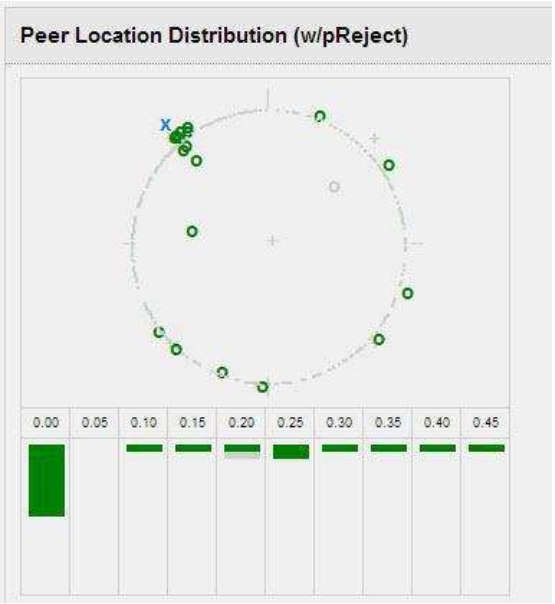
When you download a file, the manifest is first downloaded, followed by all split file blocks. After that the real download begins. *Freenet* will download data blocks and check blocks at random, until it has enough to fully reconstruct the file. The manifest key includes the file name at the end. If the same file is inserted into the network twice with different filenames it will create a different manifest key, however, if it is a CHK key all the underlying data blocks will be the same and will have the same keys.

Routing

Freenet must be able to determine which nodes to store data on, and later be able to find that data again. The process of finding a piece of data, or a place to store it, is called routing. Because nodes connect with a limited number of peers and communicate only with them, routing is very difficult because it must be done with only locally available information.

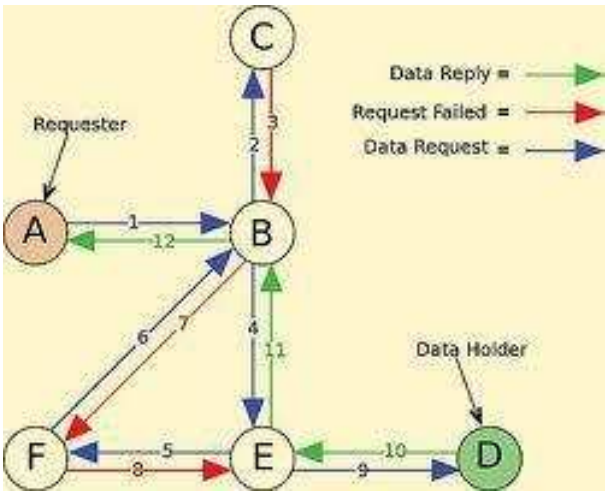
In graph theory, there is a type of network called a small-world network. A small-world network contains relatively short routes between any two nodes. Some types of small-world networks are especially useful because they allow finding short routes with only locally available information. All nodes have a location, unrelated to geographical location, which is a number in the range 0 (inclusive) to 1 (exclusive). Every request has an inherent ideal location which it is routed towards. Nodes route requests by giving them to the peer whose location is closest to that ideal location. However, in order for this to be effective, the network must have very specific characteristics.

Locations can be thought of as wrapped around a circle: zero at one point, approaching 1 as it goes around, then wrapping back to zero. In this model 0.3 is 0.2 away from 0.5, and 0.9 is 0.2 away from 0.1. This distance between peers' locations is called the connection's link length. On average, nodes must have many connections with shorter link lengths, and a few connections with longer link lengths. One can think of this as being able to quickly make large leaps on the location circle and also make small adjustments. Figure 1 is an example of how peer nodes are distributed, with the x indicating the local node and the o the location of peers connected.



Sample Peers Distribution
Figure 1

When a key is requested, first the node checks the local data store. If it's not found, the key's hash is turned into another number in the same zero to 1 range, and the request is routed to the node whose location is closest to the key. This goes on until some number of hops is exceeded, there are no more nodes to search, or the data is found (see figure 2). If the data is found, it is cached on each node along the path. So there is no one source node for a key, and attempting to find where it is currently stored will result in it being cached more widely.



Request Route Example
Figure 2

In *OpenNet*, a node can connect with untrusted peers, called strangers. In an attempt to improve link length distribution, nodes perform something called path folding. Path folding can happen when a request for a block of data succeeds. The endpoint can return an offer to connect (its *OpenNet* node reference) along with the requested data. As the data travels backwards along the route to return to the node which made the request, a node along the way can accept the offered connection, and the two become peers. To protect the anonymity of the endpoint, the node which accepted the connection removes the offer to connect, and the next node on the way back can add its own. New connections are then sometimes added to downstream nodes (i.e. the node that answered the request) when requests succeed, and old nodes are discarded in least recently used order (or something close to it). Oskar Sandberg's research (during the development of the latest version) shows that this path folding is critical to the performance of the network, and that a very simple routing algorithm will suffice provided there is path folding. The disadvantage of this is that it is very easy for an attacker to find *Freenet* nodes, and connect to them, because every node is continually attempting to find new connections.

Frost

Frost is a free, open source, Java application that runs under *Freenet* and provides message boards or forums, similar to Usenet, as well as the ability to upload and download content. *Frost* is a very popular front-end for *Freenet* since it provides for bulletin boards for public messages as well as the ability to private message other users.

A user can post and reply to messages without establishing an identity within the *Frost* system, however, many established users ignore such anonymous posts. A user can establish a nickname and *Frost* will append a unique identifier. This allows multiple users to have the same base nickname and also prevents someone from pretending to be another user. When a user posts a key to a file on a board message in *Frost*, the key will be highlighted, similar to the way a hyperlink appears on a web page. The user only has to click on the key and a box opens where he can select download for the file to be added to the download queue.

Frost is commonly and blatantly used to trade child abuse material. Users can upload a file into the *Freenet* network and then share it by posting the key on a *Frost* message board. Many

message boards have names with common child pornography terms such as *PTHC, girls.10-13, boyporn, hussy* and *hurtcore* (see Figure 3). *PTHC, hussy and child models*-girls are consistently the most active boards on the *Frost* system.

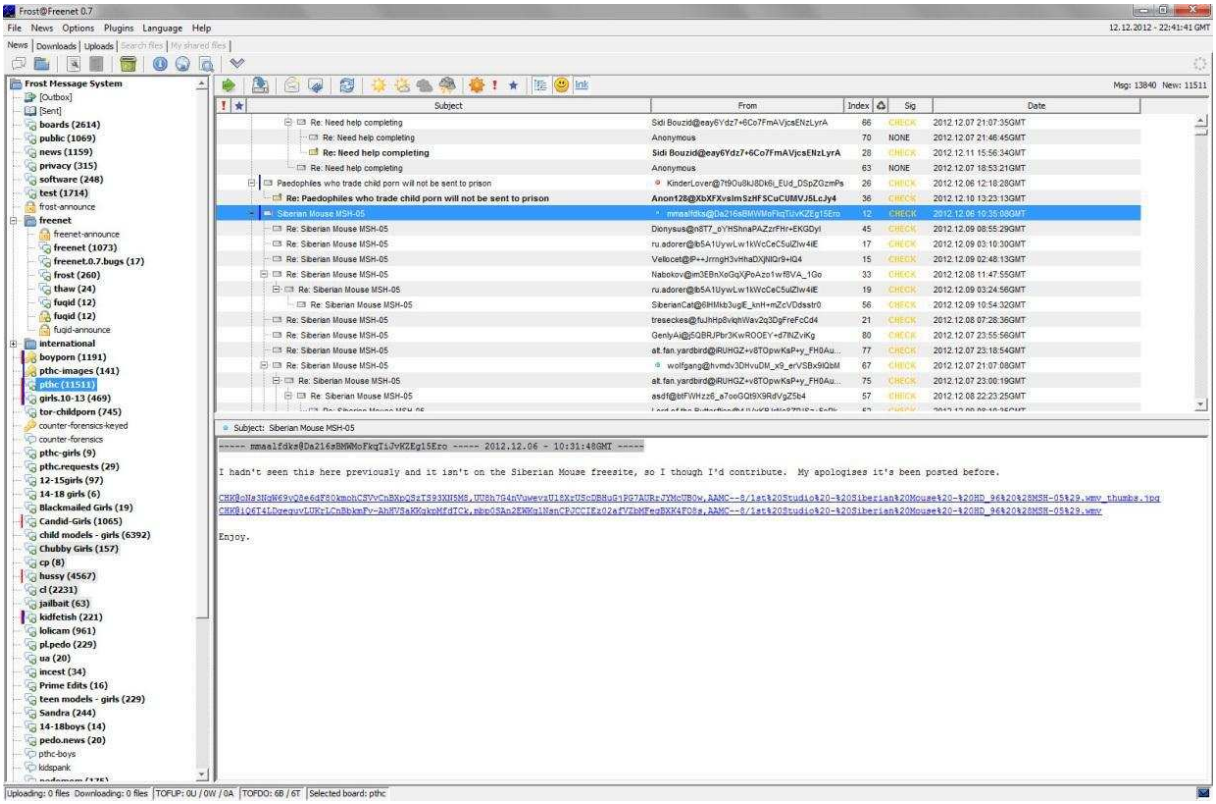


Figure 3
Frost Main Screen

Frost activity varies widely and the system is vulnerable to Denial of Service attacks. *Frost* has fallen from favor for a lot of the main stream messaging; instead users have migrated to *FMS* (Freenet Message System). *FMS*, however, is generally hostile to child pornography traders so *Frost* remains the messaging system of choice for subjects trading child abuse materials.

In addition to a source of manifest keys to files, many posts provide instructions on how to avoid getting caught by the authorities, groom children, or encrypt or hide your collection. There was even a post of all the current ICAC commanders and their email addresses with the suggestion other users should anonymously send child pornography pictures to their email boxes.

Fuqid

Fuqid is an external application for *Freenet* that is used as an insert/download manager for files. *Fuqid* stands for: *Freenet* Utility for Queued Inserts and Downloads. It is written under Delphi 7 and runs natively on Windows or on Linux under Wine.

Fuqid offers a user significant control over both inserts and downloads of files into *Freenet* (see figure 4). It can be used as an independent file manager or in conjunction with *Frost*. When selecting a key in *Frost* a user is given the option of copying the key to the clip board (as well as downloading). A user only has to right click within the *Fuqid* window and select *add* to put the

file in the download queue. *Fuqid* keeps track of your previous downloads and lets the user know when the file already exists.

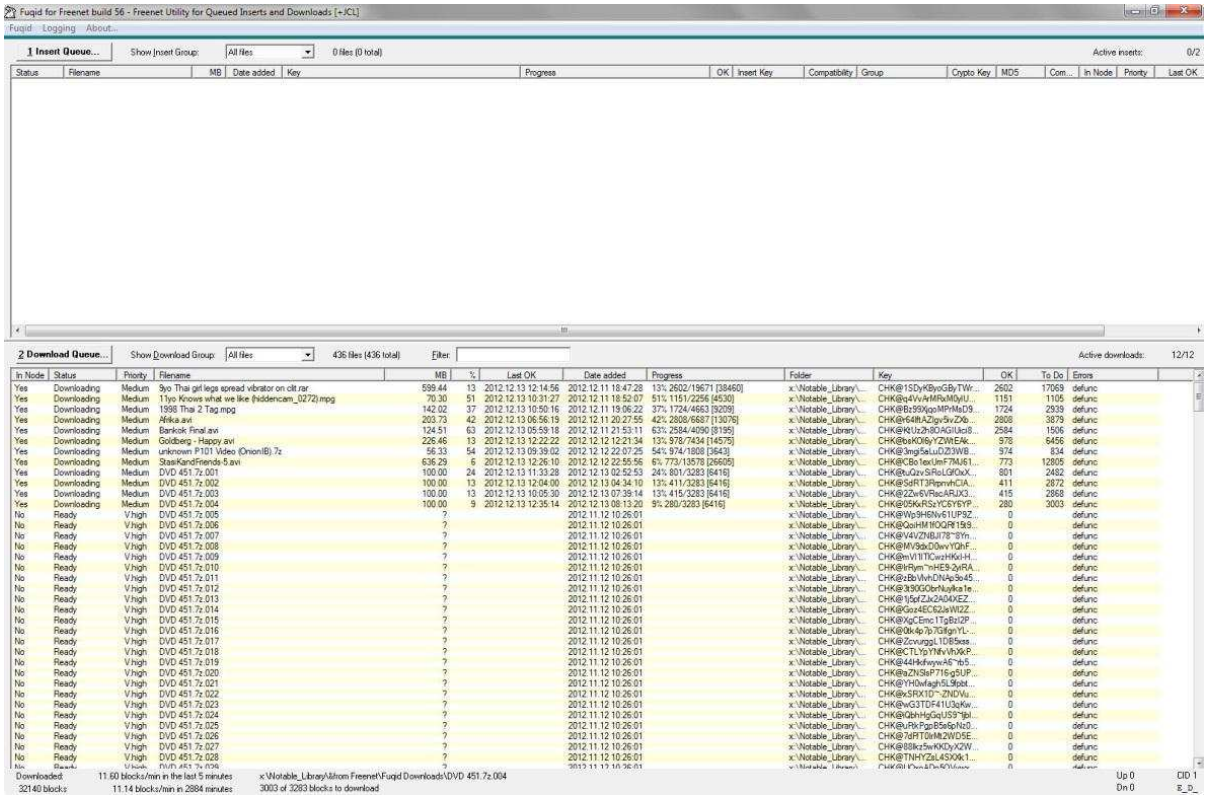

Figure 4
Fuqid Upload/Download Screen

The Black Ice Project

During the initial research into *Freenet* we discovered it was easy to identify IP addresses that were using the program and had connected to our node. (note: the Black Ice project only connects to the *OpenNet).*

Using *Freenet* in the lab we discovered that downloading a file can be extremely slow and requires much patience, as well as the requirement to leave the system running almost 24/7. At least in the United States, we saw little legitimate use for *Freenet* beyond foreign nationals and maybe academic research. After a few knock and talk attempts we also quickly recognized that subjects using *Freenet* were more technically sophisticated and aware of their right to deny us consent to search.

The objective of the Black Ice Project was to find a way to establish probable cause that a *Freenet* user is retrieving child abuse material from the network. Since the data is encrypted and distributed across many nodes, unlike other P2P networks, we cannot directly download a file from a subject. However, we can "see" what a node is requesting from the network if it is directly connected to us.

The current developer (and the only one paid) is Matthew Toseland, a college student in the UK. He goes by the handle *Toad* and he frequently posts opinions, directions and future improvements to *Freenet* on the developer web site, IRC or his *Flog* (*Freenetese* for a blog). He recently discussed some of the vulnerabilities in *Freenet:*

> *Correlation attack: If you are very close to the originator, and can identify a stream of requests, you may be able to identify it simply by the fact that there is a large proportion of the known download coming from a peer. This works a few hops away too IMHO. So it's both malicious peers and attackers controlling an (as yet unquantified) proportion of the network.*
>
> *… Freenet is about hiding in the crowd. It's not much use if you are already on their shortlist of suspects. In the more unpleasant regimes, and even in the west quite often, you have bigger problems at this point (e.g. dawn raids!). In particular, Freenet does not provide strong protection if you are already connected to the target: Provided you can recognize the content (possibly after the fact from logs), you can identify with reasonable confidence that they are the originator. One consequence of this is you need a reasonably large network to hide in, and if the bad guy can afford to connect to everyone (or in some cases exclude a group of nodes at a time) he can probably trace you.*
>
> *We do not provide the sort of anonymity guarantees that mixnets such as Tor can in theory provide...*

In Ian Clarke's paper, *Private Communication Through a Network of Trusted Connections: The Dark Freenet,* where DarkNet is introduced, he states:

> *A second concern, that has come to the forefront with the actual deployment of Freenet, is the vulnerability of people operating nodes in the network. While the network strove to dissociate users from the data they accessed and nodes from the data they served, it did not hide that a particular node was part of the network. In order to find Freenet nodes in earlier incarnations of the system, it was sufficient to join the network and start operating as a node oneself: through the continuous process of routing and optimizing the network, one would eventually learn the identities and Internet addresses of more and more nodes in the network. This means that somebody wishing to attack the Freenet network in its entirety would have had no problem finding and identifying participants given sufficient time.*

This vulnerability is basically what the Black Ice project is exploiting by identifying nodes that are retrieving content that is known or suspected to be child abuse material. Since 2011, we have been collecting the high level manifest keys from posts on *Frost* and other *Freesites*. In the spring of 2012, programing was done by a Missouri ICAC Investigator, Wayne Becker, at the Salem lab to automate the retrieval of the split keys associated with the collected manifest keys. These keys are maintained in a SQLite database. As of August 1, 2013 we have approximately 20,000 manifest keys, or files of interest, with over 40 million split keys in the Black Ice keymaster SQL data base. The average file of interest has approximately 2,200 split keys associated with it, making it approximately 36MB in size. This data base continues to grow as

we find new manifest keys to add. It is worth noting that images are typically distributed in *rar* archives and when these files are extracted we have a database of over 50,000 file hashes.

Freenet is an open source project and is in constant development. The system is written in Java and the source code is readily available. In April of 2012, a Research Scientist with the University of Massachusetts Amherst, Dr. Marc Liberatore, modified the *Freenet* program for the Black Ice Project so that it logs the IP address, CHK value, HTL (hops to live), type of request, and date/time as a request passes through the node. This modified version of *Freenet* (known as *LEFn*) has been initially deployed at six (6) law enforcement locations in Missouri. The data collected by these LEFn nodes is forwarded nightly to the lab in Salem, MO. Since we are only aware of the IP addresses directly connected to a LEFn node, the more connections to "strangers" increases the number of suspect IP addresses located.

Black Ice essentially mines data from these log records. Programs developed at the Salem lab do two (2) basic functions; they look for any IP address that is using *Freenet,* and look for specific records that contain requests for part of a file known or suspected to be child abuse material (file of interest). This results in the maintenance of two (2) SQLite databases. The first contains any unique, IP address/port combination ever seen by a LEFn node, and with the first and last date it was observed. This database can be used as an investigative tool to determine if an IP address seen elsewhere is also using *Freenet*. With the current deployment of LEFn nodes we are seeing 3,000-4,000 new US IP address/port combinations each month and approximately 15,000 globally.

The port number is of interest because *Freenet* randomly assigns a UDP port number when the system is installed. While this number is not unique across the network, it can be used to track a subject within a narrow geographic area as his IP address changes. We have seen a number of cases, including one of our own nodes, where the port number appears to change on the fly. This appears to be the result of a NAT firewall changing the outbound port number.

The second database contains specific information when the key in a logged record matches a file of interest in the KeyMaster database. Matches located in the US and Canada, and with an HTL value of 18, 17 or 16, are added to a suspect data base along with specific information about the associated file (i.e. manifest key and SHA values).

Freenet uses a value known as hops-to-live (HTL) to control how far downstream from the requester an attempt to retrieve a file block should travel. The default HTL value in *Freenet* is 18. This value is forwarded to the next node down the line and decremented as the request travels down a path. Since the only IP addresses known to a LEFn node are the ones directly connected to it, there is currently no way to tell what IP requested a key if the HTL is less than 18 (even though Toad alludes to the possibility in his posts). There is also the possibility that a request with a HTL of 18 is not from the originator but randomly (50/50 chance) passed along without being decremented. A feature, called probabilistic HTL, will change the HTL when at 18, or not decrement it, as it routes the request. This is intended to make it more difficult to establish, absolutely, the node that made the request. Our testing and observations show that the originating node does not decrement the HTL, so any HTL less than 18 is not from the original requestor.

It is possible to change the max or starting HTL within the configuration screens for *Freenet.* There is a caution that this field is for developmental use only should not be changed. We currently only look for records assuming the default is being used.

Probable Cause

The developers of *Freenet* seem to be primarily concerned that a user have *plausible deniability* for any data on, or routed by their node. They do not seem to be concerned that a user is *probably* using *Freenet* for criminal activity as much as they are an attacker's ability to prove that they are, absolutely, with data collected from *Freenet.*

To mitigate the effect of probabilistic HTL as we analyze the suspect IP addresses, we look for multiple requests for blocks of a file of interest from a specific IP, along with the absence of HTL 16/17 records for the same file, during the same time period. If we see a 17 or 16 record mixed in with HTL 18s for the same file it means HTL 18s are the result of randomly not decrementing the HTL and the subject IP is not the requestor (figure 5).

Date/Time	IP Address	Port	CC	RC	City	File Name	HTL	Type	SHA1 (base 32)

Figure 5
In the above example the highlighted files are seen with a HTL of 16 or 17 in addition to a HTL of 18, indicating the HTL 18 record is the result of probalistic HTL and this IP is not the original requester.

Conversely, a number of HTL 18s for a file without any HTL 16/17s (or only ones in a different timeframe) makes it highly likely that our subject is the requestor (figure 6). In this case we can state that the IP addresses logged are for IPs directly connected to a law enforcement *Freenet* node (LEFn) and are 1) known to be running *Freenet*, 2) known to have routed a request for a file of interest, and 3) *probably* originated the request. Since the decision to decrement each routed record is a "flip of the coin" the probability of two just HTL 18 records being sent from someone other than the requestor is only 25%. Just three HTL 18 records would give us a better than 87% probability that the IP address is the requesting node.

It is not uncommon to see a file of interest with all HTL 18s records but another file of interest, from the same IP, having a mix of 18s and 16/17s. This would simply mean the suspect node was both requesting a file of interest and routing requests for a different file of interest in the same time frame. There is also the possibility that a subject is both requesting a file and routing

requests from another node for the same file in the same timeframe. Currently we have no way to determine that is what is happening and must assume the node is not the requester.

Figure 6

In the above example all of the records for this file have an HTL of 18. This would be an indication that the IP is the requestor and a viable target. Note the single HTL 16 record from 2 days prior. The difference in the time frames indicates this is a routed record from a different request.

Forensic Opportunities

Whether as a result of a Black Ice investigation or some other case, an examiner may come across *Freenet*, *Frost* and/or *Fuqid* in the course of an examination. Each of these programs provides its own possibilities for obtaining evidence. While this discussion focuses on Windows, *Freenet* runs quite well in a Linux or iOS environment and most of the forensics remains the same. This discussion is based on *Freenet* build 1440; *Frost* release 3302 and *Fuqid* build 56.

Freenet

Freenet is a Java based system and as such is not installed with registry entries. The default location in Windows for the current installer is *User/username/AppData/Local/Freenet.* Older installations defaulted to the users *Documents* or *My Documents* folder. However, any location can be selected at install time.

The *Freenet* folder contains a plain text *ini* file named *Freenet.ini.* This file contains all of the configuration options that a user can select as well as a few that the system sets. The main ones of interest are:

Node.opennet.listenport=; this is the UDP port that is randomly set at install time and will match the port from the Black Ice database unless Freenet was re-installed or the user changed the port number.
MAXHTL=; this is the max hops-to-live for the node. The current default is 18.
Node.storesize=; this is the size of the datastore in bytes. Anything more than a gig is a fairly committed Freenet user. The minimum is 32mb.
Node.downloadsDir=; the location for *Freenet* downloads. The default is ***Freenet\downloads*** but the user can specify anywhere he wants. This is where downloaded files will be placed if there is no other download manager, such as *Frost* or *Fuqid*.

Also in the *Freenet* folder you will find two files:
completed.list.uploads
completed.list.downloads

The *uploads* file may contain files uploaded, preceded by the source. For example, if the file was uploaded via *Frost* the entry would be *Frost-filename.* The key of the file is not included in this log. Also, downloads made through a file manager, such as *Frost* or *Fuqid*, may not be listed in this log. This list corresponds to a list displayed on the *Freenet* web interface. If the user deletes the entries via an option on the web page, they are removed from these log files (see figure 7). The user may also select a security option that requires a password to view the file sharing pages. This option also turns off the logging of uploads and downloads.

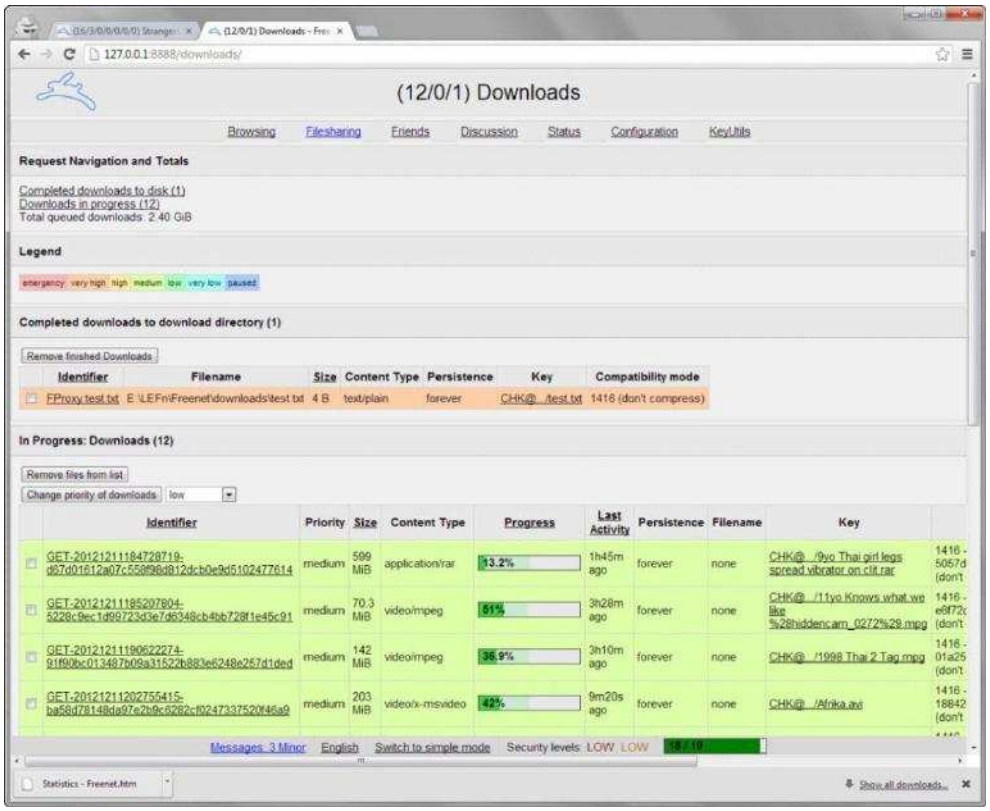

Figure 7
Freenet Download Page

You will likely find a *logs* folder under the *Freenet* folder, unless the user has moved logging to another location, in which case the location can be found in the *ini* file. This folder will contain the current log, the previous log and a number of compressed, older log files. These logs are for program diagnostics and run time errors. They typically do not contain anything of particular evidentiary value when the default logging value of normal is selected, but if the more verbose level of minor or debug is on the logs may contain upload and download details. The user can turn off logging completely.

Frost

Frost is also a Java application and does not use Windows registry entries. The install download is a zip file with a folder named *frost* and a number of sub-folders. No installation process is needed, so the *frost* folder could be placed anywhere. The options are found in an *ini* file, *frost.ini*, located in the folder /*frost*/*config.* The primary options of interest are:

downloadDirectory*=;* this option specifies the location of the folder for file downloads. Another option, *useBoardnameDownloadSubfolder*=, which is off by default, will cause *Frost* to create subfolders using the *Frost* board name.
logDownloads*=;* true by default, it controls whether Frost logs downloads.
logUploads*=; false by default, it controls whether Frost* logs uploads.

userName*=test@Q7jC7Pn4tYlvCPTHGtDtbBdEY3o*
userName.pthc*=test@Q7jC7Pn4tYlvCPTHGtDtbBdEY3o*
userName.test*=test@Q7jC7Pn4tYlvCPTHGtDtbBdEY3o*
The user name fields are created if the user creates a unique user id for posting. These ids can be different for each board the subject has posted. Their presence tells you where the subject has been posting messages. The examiner can actually use *Frost* to search for the unique user name and discover what the subject posted. This can be particularly useful if the posts are keys to contraband material. These ids can also be found in an *xml* file; *localIdentiesBackup.xml* in a *Frost* sub-folder, *localdata*.

The *localdata* folder is also where you can find the *Frost-Downloads.log,* if download logging was left on. The download log will contain the full key of the file, followed by the filename (see figure 8). The upload log will also be in this folder if the user turned upload logging to true.

Figure 8
Frost Download Log

Fuqid

Fuqid is a Windows application that is distributed as and *exe* file. It is also purported to run in a Linux environment using Wine. As of this writing, there doesn't seem to be installation files easily available outside of *Freenet* itself. *Fuqid* comes as a zip file that extracts to a single folder named *Fuqid.* Similar to *Frost*, this folder could be placed anywhere. *Fuqid* also uses an *ini* file to contain its options. The *ini* file contains a couple of interesting artifacts:

> ***SaveDir***=; this options specifies the location where completed downloads are stored.
> ***Keyslog***=; this is the location and file name of the log file that contains a list of the keys to the files that have been inserted into *Freenet*. Logging to this file is on by default and the default file name is *Fuqids-Keys.log* in the Fuqid folder.
> ***Downloadslog***=; also on by default, is the location and filename of the log file that contains a list of the keys and file names that have completed downloading. It is used by *Fuqid* to avoid downloading files multiple times. Its default name is *Fuqid-Downloads.log*, also in the *Fuqid* folder.

The *ini* file also contains the complete upload and downloads queues. This is a list of in-process files and includes their keys, names and much of the metadata that is stored in the manifest block, including the various hash values of the file. This data is particularly useful evidence of receipt and distribution if the files are contraband material.

There is also an operational log simply named *Fuqid.log*, which is off by default. If present this log contains message, primarily intended for debugging.

Experience and Next Steps

The initial project objectives were to determine if we could establish probable cause to obtain search warrants based on *Freenet* activity. We have successfully done that, on both the state and Federal level, albeit on a small scale. We do not yet have enough empirical data to make a definitive conclusion, but it appears in cases where the subject is using *Freenet* we are going to encounter a more technically sophisticated, paranoid subject. We have encountered encryption

in multiple cases, though not thorough enough to prevent us from making a criminal case. We also are finding significant quantities of digital media and equipment. We removed over 20 loose hard drives from one subject's bedroom, in addition to his computers.

In our analysis of the data for Missouri, we notice a mix of activity. We may see the same IP/Port consistently over a period of months. We also frequently see a subject for only a short period of time, maybe a few days or a week. The suspicion is someone with an interest in child abuse materials finds *Freenet* and gives it a try and then either is not in a position to allow it to run long enough to be successful, maybe because of other family members, or becomes frustrated with the relative slowness of *Freenet*. These subjects may still be good targets that are exploring other sources for the material they are seeking.

We also often see an IP address with its port number changing. The port number is set at installation and is not easily changed by the user. It could indicate that there are multiple copies of *Freenet* running behind the IP, or *Freenet* is being removed and reinstalled. In one case we were able to forensically observe that the subject would install *Freenet*, run it for a day or two, and then delete it, only to install it again a few days or weeks later. We have seen a number of cases where the port number appears to change on the fly and we believe this is the result of a NAT router using a different port for outbound traffic.

Of the currently deployed LEFn nodes, most are connecting to 14-20 peers. The program will allow a maximum of 100 connections, given enough bandwidth. While our efforts have been focused on subjects in the US, the data we collect is worldwide. Observably, roughly two-thirds of the peers we connect to are not in the United States, so opportunities exist for law enforcement in other countries to exploit this data.

The modified *Freenet* program, LEFn, while successfully obtaining the data we need, should be enhanced in a couple of areas before many more LEFn nodes are deployed. Currently we have to cycle LEFn in order to cut off the log file for transmission. Also, the log files contain no source information and this has to be added somewhat manually so we do not lose what nodes created the files. Ideally, forwarding log records to a central server, real-time, would give us the most up-to-date information. We also set the LEFn nodes data store to the minimum size to avoid facilitating the distribution of contraband blocks. A version that artificially never finds a block in its data store would be best, if the network does not begin to ignore such a node.

The most important need is to make the data we are mining available to a broader law enforcement audience. Today a prototype web interface is available for the databases at the lab in Salem (figure 9). These tools allow a trained investigator to gather enough information to obtain a search warrant. This prototype will need to be migrated to a more robust, production environment, preferably integrated with existing law enforcement systems. Training in what *Freenet* is, how to use it, and how to use the *Black I*ce tools to investigate suspects, is under development.

Search warrants using probable cause based on the Black Ice data will have the same concerns as any P2P search warrant. Did the ISP provide the correct subject in response to our legal demand? Is a neighbor, knowingly or unknowingly, using our subject's Wi-Fi Internet connection? Are there multiple subjects in the target residence? Basic investigative work can help eliminate possible legitimate uses for *Freenet*, such as university environments or businesses with offices in countries with less "open" governments.

Black Ice criminal cases will have to be made on what we find forensically, admissions, and other evidence we find on scene, not on what we saw on the network. Our experience, albeit limited, suggests we will encounter a more complex environment and encryption may be common. While *Freenet* will probably never have the volume of traffic we have seen in Gnutella and other networks, by using the data we collect from *Freenet* we may find suspects that otherwise would never be visible to us. In August of 2013 we executed a search warrant based on Black Ice data where the subject was ultimately found to be not only collecting child abuse material, but was molesting a child victim and videoing this abuse. The only network he was using to obtain child abuse material was *Freenet*. Our window of opportunity may be short; as word gets out the law enforcement is finding *Freenet* CP traders, they will disappear, that is if the developers do not find a way to shut us out first.

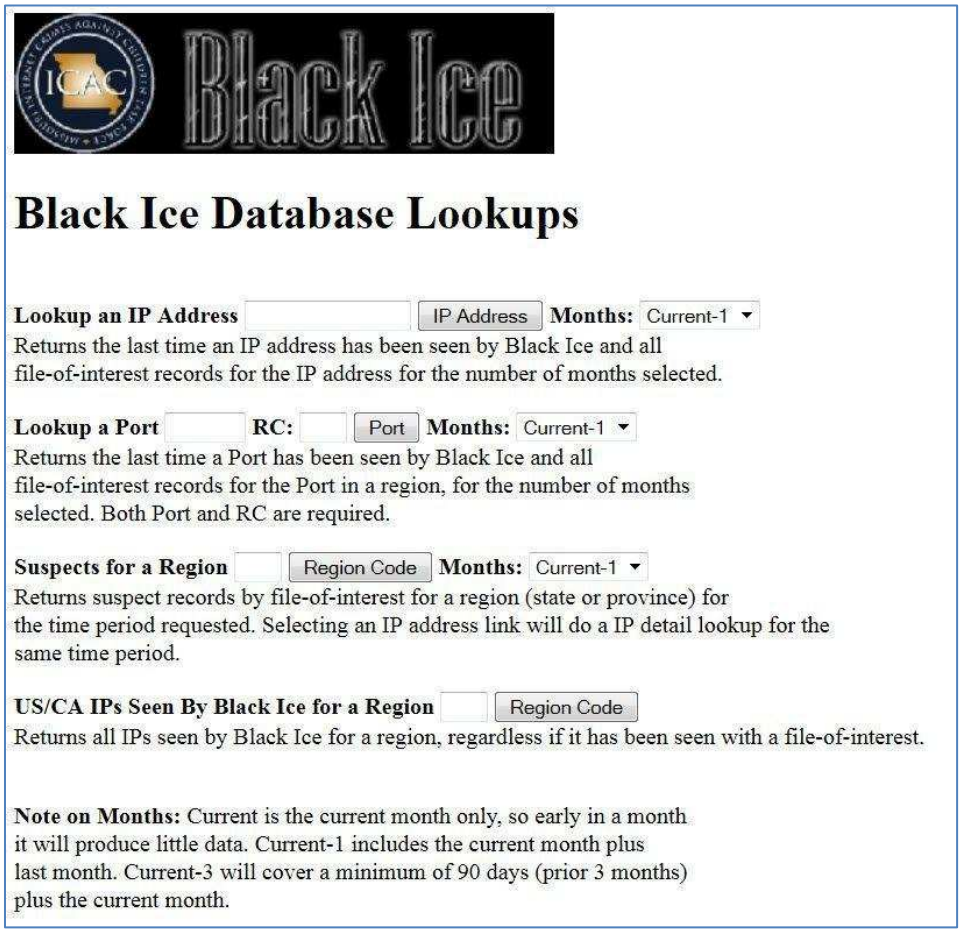

Figure 9

Wayne Becker is currently employed by the Dent County Sheriff's Office and is a Special Investigator attached to the Missouri Internet Crimes Against Children (ICAC) Task Force. He investigates cases related to crimes against children, particularly computer related crimes, and the distribution of child abuse material on file sharing systems. He is a certified computer forensic examiner and co-ordinates the South Central Missouri Computer Crimes Task Force. Prior to joining the Sheriff's Office in 2004, Becker was an Information Technology professional in the private sector for 28 years.

He can be reached via email at whbecker@dentcountysheriff.org.

The University of Texas at El Paso
Policy Guidelines
for
Classified and Controlled Unclassified Information (CCUI)

1. Applicability

1.1 These policy guidelines apply to all UTEP research and sponsored projects and other activities that may acquire, generate, or use *classified* or *controlled unclassified information* (commonly referred to as *sensitive information*). They provide general guidance and direction concerning the handling of such information.

1.2 This document may be supplemented or modified by Vice President of Research letter instructions to Principal Investigators that provide program or project-specific instructions and policy.

1.3 Nothing in this document, or in subsequent Vice President of Research letter instructions, is intended to supersede specific written guidance provided by a sponsoring organization's award notice, contract, task order(s), or other written direction(s), or the overarching requirements of NIST SP 800-171.

2. Overview.

2.1 When a project is intended to involve classified information the sponsoring agency will issue a DD Form 254, Contract Security Classification Specification, which will define access and control measures and provide additional security guidance.

2.2 There are more than 300 laws, regulations and government wide policies that require certain types of information to be safeguarded. Some of the labels or legacy markings used to describe *sensitive but unclassified information* are:

- For Official Use Only (FOUO)
- Controlled Unclassified Information (CUI)
- Sensitive But Unclassified (SBU)
- Limited Official Use (LOU)
- Sensitive Unclassified Information (SUI)
- Law Enforcement Sensitive
- DEA Sensitive
- Official Use Only (OUO)
- DOD Technical Information
- Distribution Statements on Technical Documents
- Sensitive Security Information
- Protected Critical Infrastructure Information

- Unclassified Controlled Nuclear Information
- Export-Controlled Information

2.3 UTEP shall use the term ***controlled unclassified information (CUI)*** rather than *sensitive* information. Controlled Unclassified Information (CUI) is information the Government creates or possesses, or that an entity creates or possesses for or on behalf of the Government, that a law, regulation, or Government-wide policy requires or permits an agency to handle using safeguarding or dissemination controls. To facilitate compliance and assurance of requirements laid out herein, the appendix provides a CUI data checklist.

2.3.1. Because of the wide variety of existing policies and controls it is incumbent on University research programs to obtain an understanding from the funding sponsor(s) concerning:

(a) What kind of information is sensitive?
(b) What are the applicable governing laws, regulations or policies?
(c) What are the exact limits of disclosure?

2.3.2 Any acceptance of and handling of CUI data and projects must be done in compliance NIST SP 800-171, of which all requirements and protections supersede policies herein.

2.3.3 Any acceptance of and handling of CUI data and projects must begin with notification to the assistant facility security officer. The assistant facility security officer will notify the chief information security officer so that the principle investigator my use established UTEP checklists to ensure compliance.

3. Definitions.

3.1 *Access* is the ability and opportunity to obtain knowledge of CUI or classified information.

3.2 *Classified information* is information to which access is restricted by law or regulation to particular individuals or groups. There are various classification levels, including: Top Secret, Secret, and Confidential. In addition to these general classification levels, there are additional constraints on access and dissemination which may be program specific.

3.3 *Cleared person.* A person who has been granted a personnel security clearance by a Cognizant Security Agency of the Executive Branch of the U.S. Government. See *Security Clearance*, below.

3.4 *Controlled Unclassified Information (CUI)* is information that requires safeguarding or dissemination controls pursuant to and consistent with applicable law, regulations, and government-wide policies but is not classified under Executive Order 13526 or the Atomic Energy Act, as amended.

3.4.1 For example, consider the DHS description of *sensitive information:* any information, the loss, misuse, disclosure, or unauthorized access to or modification of which could adversely affect the national or homeland security, but which has not been specifically authorized under criteria established by an Executive Order or an Act of Congress to be kept secret in the interest of national defense, homeland security or foreign policy. The absence of any sensitivity marking is not a valid basis for assuming that information is non-sensitive.

3.4.2 Such information may be explicitly defined in sponsoring agency documentation, e.g., “information concerning the configuration and dimensions of the wave-form guides in a receiver section is sensitive and will not be disclosed to unauthorized personnel.”

3.4.3 This definition does not necessarily encompass proprietary or trade secret information. Such information is important to the originator but, unless it contains information in the above definition, it is not considered CUI. (Dissemination of proprietary or trade secret information is normally prescribed in non-disclosure agreements or in the award document.)

3.5 *Facility Security Officer/Assistant Facility Security Officer (FSO/AFSO).* The University currently operates its classified information security program under the supervision of the UT System FSO. The University has an AFSO within the Office of Research and Sponsored Projects.

3.6 *Need-to-Know* is the determination by a Principal Investigator or other appropriate University official that a specific person requires access to specific CUI or classified information in order to perform or assist in a lawful and authorized university activity.

3.7 *NISPOM* is the National Industrial Security Program Operating Manual. Promulgated by the Defense Security Service, the NISPOM establishes the standard procedures and requirements for all government contractors, with regards to classified information. Agency specific policies may also apply, especially when dealing with organizations within the Intelligence Community.

3.8 *Safeguarding* means measures and controls that are prescribed to protect CUI or classified information from unauthorized access and to manage the risks associated with processing, storage, handling, transmission, and destruction of such information.

3.9 *Security Clearance* is an administrative determination by competent authority (of the Executive Branch of the U.S. Government) that an individual is eligible, from a security stand-point, for access to classified information of the same or lower category as the level of the clearance granted. Clearances are normally granted by the Defense Security Service, the Department of Energy, the Nuclear Regulatory Commission, or by the CIA/Intelligence Community.

4. Right to Publish.

4.1 While UTEP desires to protect its right to publish the results of University-based research, one should not publically release any information (classified/unclassified) that is tied to a Classified Government Contract without approval from that Contract's Sponsor. External sponsors and the University recognize that researchers may work in areas and develop knowledge that may be controlled unclassified information. In order to allay sponsor and University concerns over the unauthorized release of CUI or classified information, it is University policy that **UTEP personnel will review their manuscript drafts, website postings, brochures, presentations materials (video, slides, posters, etc.), technology transfer information, and all other information that may be disclosed to the public or persons without a need-to-know, to preclude inclusion of CUI or classified information**. This requirement is extended to research sub-award personnel.

5. Safeguarding CUI and Classified Information.

5.1 In the event of conflict, the sponsoring organization's directives take precedence.

5.1.1. Defining the parameters. Principal Investigators are responsible for obtaining the sponsoring organization's guidance concerning:

a. What information is CUI or classified? In the case of the latter, the DD form 254 should provide general classification guidance. For the former, consultation with the sponsoring agency's program officer is advised.
b. What are the applicable governing laws, regulations or policies?
c. What are the exact limits of disclosure?
d. Who can be granted access? For classified information this access is limited to those with proper security clearance and need-to-know. For CUI, consultation with the sponsoring agency's program officer is advisable.

5.1.2. Access.

a. Principal Investigators are responsible to determine who will have access to CUI and/or classified information obtained or generated through their project activities, consistent with the guidance of the sponsoring organization.
b. Access to classified information is limited to appropriately cleared persons with need-to-know.
c. Access to CUI is normally restricted to US citizens with need-to-know, though sponsoring agencies may make exceptions for operational or other reasons.
d. An up-to-date access roster will be maintained. It will be available to all authorized personnel so they may readily identify who is authorized access to any CUI or classified information handled by the project. This roster will include people who are directly involved in project activities as well as people who provide administrative, logistical, and technical support whose duties require them to access the information, e.g., administrative personnel who prepare and handle project reports. A copy of the roster will be provided to the UTEP Assistant Facility Security Officer (AFSO) in the Office of Research and Sponsored Projects.
e. Access to work sites where classified information is handled or stored may be controlled by badge systems and special locks and entry controls. Such areas will have published access plans that comply with the NISPOM or other sponsoring agency directives.

5.1.3. Visitors.

i. Visitors to classified activities will be appropriately cleared. Visit requests will be submitted by the visitor's parent organization to the UTEP AFSO. Such visits will be conducted in accordance with the NISPOM or other appropriate sponsoring agency directive(s).
ii. Visitors to CUI work sites will be approved by the project Principal Investigator or his/her designee, after appropriate approval of the sponsoring agency's program office, if required. Visitors must have appropriate access and need-to-know, and must be escorted at all times by an approved project staff member; visitors who are directly and routinely involved with the project, e.g., sponsoring agency program office or collaborating organization personnel, do not require escorts.

5.1.4. Personnel.

a. The UTEP Human Resources department should be advised on any job-specific requirements, including citizenship. Job notices will include citizenship requirements, if necessary, and HR will check proof of citizenship of candidates who are not currently UTEP employees. For job candidates who are already in the UTEP personnel system HR may not be able to determine their citizenship based on their personnel files. In those cases where

citizenship is required and HR files cannot document it, the HR department will require the candidate to provide appropriate documentation.

b. All employees of the University are required to pass background checks prior to employment or appointment, including students appointed as research assistants.
c. Students who volunteer to work on research activities without appointments are not subject to background checks. Principal Investigators who consider using such students are responsible to determine citizenship and obtain background checks for suitability as if they would be employed by the University.
d. Employees working on classified activities will have security clearances granted by the appropriate security agency.
e. Citizenship. For activities involving CUI, access is usually restricted to US citizens.
f. Prior to beginning work on a project, all personnel to be granted access to CUI or classified information will sign a non-disclosure statement acknowledging their obligation to safeguard CUI and the penalties for failure to do so.
    i. Persons granted a security clearance will sign the SF 312 (Classified Information Nondisclosure Statement).
    ii. Persons granted access to CUI, employees will sign the UTEP CUI Nondisclosure Statement (Appendix A). They may also be required to sign sponsor-specific forms, such as the DHS Form 11000-6.
g. Subsequent information. If, after a person has been granted access to CUI or classified information, additional or new information comes to light that may raise concerns about his/her suitability for continued access, the individual will be suspended from access immediately pending a final determination by the Principal Investigator, his/her supervisory chain, and the UTEP Assistant Facility Security Officer (AFSO) in the Office of Research and Sponsored Projects, and, in the case of personnel with security clearances, the cognizant security authority. The sponsoring agency will also be notified, so that appropriate actions can be taken to mitigate the risk associated with the inappropriate access. Consult with sponsoring agency directives and project award documents for timeliness requirements for reporting such information.

5.1.5. Work sites.

a. On campus.
    i. When using CUI, authorized users will work in a space that is segregated from unauthorized personnel; a separate room is sufficient. Authorized personnel will know who else has access to the work and will challenge unauthorized others when they attempt to access the site. If unauthorized personnel are present at the work site, CUI will be covered from view. CUI will not be left unattended. When not in use, CUI will be stored as directed in the following paragraph (5.1.6) and the work site will be secured with a locked door.
    ii. Use of classified information is restricted to those areas that adhere to the requirements identified in the NISPOM or the DD form 254 issued by the sponsoring agency.
    iii. Some projects may deal with a mix of non-sensitive and sensitive information and may employ persons who may not have access or need-to-know to work on the latter. The Principal Investigator is responsible to separate the work activities, physically and cognitively, to preclude inadvertent or wrongful disclosure. Those persons authorized to work with CUI will be briefed about the activities and scope of work of the non-sensitive group, and specifically about the limits of information to be exchanged with

the latter. It may be appropriate to explicitly define the specific tasks and limits of the scope of work assigned to the non-sensitive group.

b. Off campus.
   i. At approved sponsor or collaborating agency facilities. Authorized project personnel may visit such facilities in the performance of their duties, subject to the approval of the facility director.
   ii. Other off campus locations. Project personnel may work on CUI at other off campus locations only with the prior approval of the Principal Investigator, and only after appropriate safeguards are applied. Use of classified information is restricted to those areas that adhere to the requirements identified in the NISPOM or the DD form 254 issued by the sponsoring agency.

5.1.6. Storage. When hard copy CUI is not being used it will be stored in a locked container in a locked room; a file cabinet or desk may be sufficient. Key control should ensure that only authorized personnel have access to the room or storage container. Classified information will stored as directed in the NISPOM.

5.1.7. IT Security. CUI may be stored on desk top computers, laptop computers or on university servers, as well as on external memory devices such as hard drives, USB drives, and on CD; password access or encryption will be used at a level appropriate to the sensitivity of the information involved and consistent with the guidance of the sponsoring agency. When not in use, external storage media and laptop computers will be secured in a locked container. Use of classified or export-controlled information on IT systems must adhere to the NISPOM and other relevant regulations. UTEP IT does not restrict information transiting its servers to U.S. only servers managed by U.S. Persons. As such, UTEP Mail service is not adequate for and cannot be used by personnel to transmit or receive export-controlled information. A comprehensive checklist, named UTEP System Security Plan, for assuring compliance exists through the Information Security Office and should be completed in its entirety before receipt of CUI. An example of a System Security Plan is attached as an appendix to this guideline.

5.1.8. Marking. CUI and classified information will be marked in accordance with the sponsoring organization's security directives and the NISPOM and NIST.

5.1.9. Transmission. The transmission or dissemination of CUI or classified information will follow the procedures of the sponsoring organization's security directives and the NISPOM.

5.1.10. Disposition, retention and/or disposal. Disposition and retention of classified material are normally included in the security guidance provided by the DD 254. If this is not the case, UTEP will contact the sponsoring agency for guidance. Destruction will be conducted in accordance with the requirements of the NISPOM. For CUI, the PI will consult with the sponsoring agency's program officer for guidance.

6. Technology Control Plans

6.1 The purpose of a Technology Control Plan (TCP) is compliance with federal regulations to ensure that the transfer of export controlled items, software, or technology, classified information or other CUI data (e.g., For Official Use Only (FOUO), Naval Nuclear Power Information (NNPI)) is not to be conveyed in any manner to foreign national visitors, employees, and students beyond that which is

approved for export by a license or other approval from the appropriate U.S. federal agency, or which is authorized to an individual possessing the required security classification and "need to know." Disclosure of classified information to foreign persons in a visitor status is considered an export disclosure under the International Traffic in Arms Regulations (ITAR) and requires a Department of State license or DoS approval of either a Technical Assistance Agreement or a Manufacturing License Agreement. To delineate and inform employees and visitors of the controls necessary to ensure that no transfer of classified defense information or CUI (defined as technical information or data or a defense service as defined in ITAR paragraphs 120.9 & 120.10) occurs unless authorized by DoS' Office of Defense Trade Controls (ODTC), and to ensure compliance with NISPOM 2-307 and 10-509. The TCP details the export control classification, restriction on release of information, physical and information security protocols, project personnel requirements, annual certification, and closeout procedure. ORSP and AFSO will monitor project related activity throughout the life of the TCP and the Principal Investigator or designated TCP Custodian will be required to disposition all controlled items before close out of the TCP.

6.2 Projects or programs requiring TCPs will coordinate with the UTEP AFSO to implement a plan that is acceptable to the sponsoring agency or the VPR when the activity is UTEP-initiated. A TCP template is available through UTEP ORSP.

7. Responsibilities

7.1 The UTEP AFSO is the proponent for the Information Protection Policy and is responsible to:

a. Promulgate University policy
b. Periodically review project security procedures
c. Provide general training concerning information protection
d. Maintain file copies of project access rosters and security procedures/plans.
e. Other duties as required by the NISPOM and/or sponsoring agency award documents or other directives.

7.2 Principal Investigators are responsible for their projects and to:

a. Determine, as necessary, what elements of information are CUI and/or classified (normally using DoD-provided classification guides for the latter). Review manuscript drafts, website postings, brochures, presentations materials (video, slides, posters, etc.), technology transfer information, and all other information that may be disclosed to the public or persons without a need-to-know, to preclude inclusion of CUI or classified information.
b. Maintain an up-to-date access roster of all people authorized access to project CUI and/or classified information. A current roster will be provided to the UTEP AFSO within the Office of Research and Sponsored Projects.
c. Develop project specific security plans, TCP, that include procedures for access control, worksite control, and safeguards for project CUI and/or classified information.
d. Provide project-specific security training for project personnel.
e. Report violations of security procedures and/or adverse information about project personnel to the AFSO.
f. Other duties as required by the sponsoring agency.

7.3 Senior project personnel, normally co-PIs, will assist the Principal Investigator as he/she directs.

7.4 Persons granted access share in the collective responsibility to safeguard CUI and/or classified information. They will be aware of the project access list and will deny access of unauthorized

personnel to project information and restricted worksites. All are responsible for reporting violations of security procedures and adverse information about project personnel to the Principal Investigator and the AFSO. All personnel granted access to CUI or classified information will sign a non-disclosure statement acknowledging their obligation to safeguard such information and the penalties for failure to do so. Persons granted a security clearance will sign the SF 312 (Classified Information Nondisclosure Statement). For projects dealing with CUI, employees will sign the UTEP CUI Nondisclosure form (Appendix A) unless they are required to sign a sponsor-specific form.

8. Reporting Violations or Security Concerns

8.1 Divulging CUI or classified information to the public or unauthorized personnel constitutes a serious breach of the obligations of the University and project personnel, and may constitute grounds for professional discipline, termination of employment, and civil or criminal prosecution, depending on the nature of the disclosure. The University will cooperate fully with any law enforcement actions. Further, intentional disclosure of designated CUI or classified information without authorization may result in forfeiture of federal research funding and termination of affected programs or projects.

8.2 Principal Investigators must notify the UTEP Assistant Facility Security Officer (ASFO) as soon as possible after discovery of any accidental or intentional disclosure of designated CUI or classified information. The University will in turn notify the sponsoring agency program officer as appropriate.

9. Training

9.1 All personnel authorized access to CUI and/or classified information will receive initial and annual training on these policy guidelines and appropriate sponsoring organization security directives.

10. Flow-through

The requirements of these policy guidelines and any Vice President for Research directive will flow down to all sub-awards or sub-contracts that involve classified or controlled unclassified information. If the sub-awardee does not have an Information Protection Policy or wishes to forgo their own plan then it will comply with this document. If the sub-awardee has an Information Protection Policy it will provide a copy to the UTEP AFSO for review; UTEP reserves the right to impose additional requirements as necessary to ensure compliance with sponsoring agency requirements.

ON BEHALF OF THE VICE PRESIDENT FOR RESEARCH

Nathaniel V. Robinson, P.E.
Assistant VP for Research
Assistant Facility Security Officer
February 27, 2016

Controlled Unclassified Information Nondisclosure Statement

1. I am working on or in support of a project or activity that involves, or may involve, Controlled Unclassified Information (CUI) as defined in the UTEP CCUI Policy Guidelines.
2. I have read and understand the UTEP Classified and Controlled Unclassified Information Policy Guidelines and will comply with same.
3. I have received an initial security briefing by the UTEP AFSO and/or the project Principal Investigator or designee concerning the nature and protection of CUI, including the procedures to be followed in ascertaining whether other persons have been approved for access to it; and I understand these procedures.
4. I have also been briefed about the sponsoring agency requirements contained in its award documentation and/or other directives.
5. I am aware of my responsibilities to:
   a. Safeguard CUI,
   b. Report unauthorized disclosure or dissemination of CUI and any violations or breaches of project security to the UTEP AFSO.
6. I have worked with the UTEP Information Security Office to generate a System Security Plan or have been shown to be excluded.
7. I will comply with all applicable UTEP policy including but not limited to all manuscript drafts, website postings, brochures, presentations materials and technology transfer information. Further, I am aware of and will comply with any sponsoring agency restrictions or requirements concerning publication and/or dissemination of information developed as a consequence of this project.

CUI Checklist to facilitate adherence to Policy Guidelines for
Controlled Unclassified Information (CUI)

Controlled Unclassified Information (CUI) is information that requires safeguarding or dissemination controls pursuant to and consistent with applicable law, regulations, and government-wide policies but is not classified under Executive Order 13526 or the Atomic Energy Act, as amended. Refer to UTEP Policy Guidelines for Classified and Controlled Unclassified Information and the government's overarching requirements in NIST SP 800-171.

☐ Government sponsor or contractor has properly provided marked Controlled Unclassified Information (CUI). Markings alert holders to the presence of CUI and, when portion markings are used, identify the exact information or portion that needs protection. Markings can alert holders to any CUI dissemination and safeguarding controls.

- ☐ 1. Identify and implement a UTEP System Security Plan for controls to strictly limit access to data and data systems to only those individuals affiliated with the research project and the need for data access. This should include physical control access, storage of media and assets containing CUI, and electronic information systems, including proper destruction of media containing CUI. Contact: Jerry Cochrane gdcochrane@utep.edu
- ☐ 2. Identify and maintain an inventory of personnel who have access to data and information systems relative to the CUI and research. Ensure a unique account per user for authenticating.
- ☐ 3. Ensure all personnel (research, administrators, technicians, etc.) are informed of the security risks associated with CUI, their activities, and methods for mitigating those risks. Ensure each person receives UTEP CUI training and signs the Controlled Unclassified Information Nondisclosure Statement. Contact: Nate V Robinson, nvrobinson@utep.edu
- ☐ 4. Document and maintain an inventory of data and information handling systems and security configuration settings.
- ☐ 5. Create and maintain processes for managing the lifecycle of the information systems used to support the project.
- ☐ 6. Implement a system audit controls to record and report data access, including any anomalous events, with special notion and handling for those deemed unlawful, unauthorized, or otherwise inappropriate to the research.
- ☐ 7. Report incidents according to UTEP policy: contact Nate V Robinson, nvrobinson@utep.edu
- ☐ 8. Conduct screening activities (i.e., background checks) when recruiting personnel for intended access to CUI and ensure access is removed if and when a person is off-boarded or commits a known felonious act.

☐ 9. Conduct periodic audits of all safeguards and policies (physical and cyber) to ensure compliance and safekeeping of CUI, with a document containing date of audit, findings, any incidents and/or anomalies.

☐ 10. Ensure all of the above are documented with the processes for safeguard CUI during research and handling operations documented in an Information Protection Plan, delivered to UTEP FSO: nvrobinson@utep.edu, including updates to personnel rosters as they occur.

Marking:

Information Security Office

SYSTEM SECURITY PLAN

1.0 SYSTEM IDENTIFICATION

1.1 System Name/Title: [State the name of the system; spell out acronyms]

1.1.1 System Categorization: Moderate Impact for Confidentiality

1.1.2 System Unique Identifier: [System Unique Identifier-Will be designated by CISO]

1.2 Responsible Organization:

Name:	The University of Texas at El Paso
Address:	500 W. University Avenue
	El Paso, TX 79968
Phone:	

1.2.1 Information Owner (Government point of contact responsible for providing and/or receiving CUI):

Name:	
Title:	
Office Address:	500 W. University Avenue
	El Paso, TX 79968
Work Phone:	
e-Mail Address:	

1.2.1.1 System Owner (assignment of security responsibility):

Name:	
Title:	
Office Address:	500 W. University Avenue
	El Paso, TX 79968
Work Phone:	
e-Mail Address:	

1.2.1.2 System Security Officer:

Name:	Gerard D. Cochrane Jr.
Title:	Chief Information Security Officer
Office Address:	500 W. University Avenue
Work Phone:	(915) 747-6324
e-Mail Address:	gdcochrane@utep.edu; security@utep.edu

1.3 General Description/Purpose of System: What is the function/purpose of the system? [Provide a short, high-level description of the function/purpose of the system.]

1.3.1 Number of end users and privileged users: [In the table below, provide the *approximate* number of users and administrators of the system. Include all those with privileged access such as system administrators, database administrators, application administrators, etc. Add rows to define different roles as needed.]

Roles of Users and Number of Each Type:

Number of Users	Number of Administrators/ Privileged Users

1.4 General Description of Information: CUI information types processed, stored, or transmitted by the system are determined and documented. For more information, see the CUI Registry at https://www.archives.gov/cui/registry/category-list. [**Document the CUI information types processed, stored, or transmitted by the system below**].

2.0 SYSTEM ENVIRONMENT

Include a detailed topology narrative and graphic that clearly depicts the system boundaries, system interconnections, and key devices. (Note**:** *this does not require depicting every workstation or desktop*, but include an instance for each operating system in use, an instance for portable components (if applicable), all virtual and physical servers (e.g., file, print, web, database, application), as well as any networked workstations (e.g., Unix, Windows, Mac, Linux), firewalls, routers, switches, copiers, printers, lab equipment, handhelds). If components of other systems that interconnect/interface with this system need to be shown on the diagram, denote the system boundaries by referencing the security plans or names and owners of the other system(s) in the diagram.
[Insert a system topology graphic. Provide a narrative consistent with the graphic that clearly lists and describes each system component.]

2.1 Include or reference a **complete and accurate** listing of all hardware (a reference to the organizational component inventory database is acceptable) and software (system software and application software) components, including make/OEM, model, version, service packs, and person or role responsible for the component. **[Insert the reference/URL or note that the hardware component inventory is attached.]**

2.2 List all software components installed on the system. **[Insert the reference/URL or note that the software component inventory is attached.]**

2.3 Hardware and Software Maintenance and Ownership - Is all hardware and software maintained and owned by the organization? **[Yes/No - If no, explain:]**

3.0 REQUIREMENTS

(Note: The source of the requirements is NIST Special Publication 800-171, dated December 2016)

Provide a thorough description of how all of the security requirements are being implemented or planned to be implemented. The description for each security requirement contains: 1) the security requirement number and description; 2) how the security requirement is being implemented or planned to be implemented; and 3) any scoping guidance that has been applied (e.g., compensating mitigations(s) in place due to implementation constraints in lieu of the stated requirement). If the requirement is not applicable to the system, provide rationale.

3.1 Access Control

3.1.1 Limit system access to authorized users, processes acting on behalf of authorized users, and devices (including other systems).

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.2 Limit system access to the types of transactions and functions that authorized users are permitted to execute.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.3 Control the flow of CUI in accordance with approved authorizations.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.4 Separate the duties of individuals to reduce the risk of malevolent activity without collusion.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.5 Employ the principle of least privilege, including for specific security functions and privileged accounts.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.6 Use non-privileged accounts or roles when accessing nonsecurity functions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.7 Prevent non-privileged users from executing privileged functions and audit the execution of such functions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.8 Limit unsuccessful logon attempts.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.9 Provide privacy and security notices consistent with applicable CUI rules.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.10 Use session lock with pattern-hiding displays to prevent access and viewing of data after period of inactivity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.11 Terminate (automatically) a user session after a defined condition.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.12 Monitor and control remote access sessions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.13 Employ cryptographic mechanisms to protect the confidentiality of remote access sessions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.14 Route remote access via managed access control points.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.15 Authorize remote execution of privileged commands and remote access to security-relevant information.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.16 Authorize wireless access prior to allowing such connections.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.17 Protect wireless access using authentication and encryption.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.18 Control connection of mobile devices.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.19 Encrypt CUI on mobile devices and mobile computing platforms.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.20 Verify and control/limit connections to and use of external systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.21 Limit use of organizational portable storage devices on external systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.1.22 Control CUI posted or processed on publicly accessible systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.2 Awareness and Training

3.3.1 Ensure that managers, systems administrators, and users of organizational systems are made aware of the security risks associated with their activities and of the applicable policies, standards, and procedures related to the security of those systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.2 Ensure that organizational personnel are adequately trained to carry out their assigned information security-related duties and responsibilities.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.3 Provide security awareness training on recognizing and reporting potential indicators of insider threat.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3 Audit and Accountability

3.3.1 Create and retain system audit logs and records to the extent needed to enable the monitoring, analysis, investigation, and reporting of unlawful or unauthorized system activity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.2 Ensure that the actions of individual system users can be uniquely traced to those users so they can be held accountable for their actions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.3 Review and update logged events.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.4 Alert in the event of an audit logging process failure.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.5 Correlate audit record review, analysis, and reporting processes for investigation and response to indications of unlawful, unauthorized, suspicious, or unusual activity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.6 Provide audit record reduction and report generation to support on-demand analysis and reporting.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.7 Provide a system capability that compares and synchronizes internal system clocks with an authoritative source to generate time stamps for audit records.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.8 Protect audit information and audit logging tools from unauthorized access, modification, and deletion.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.3.9 Limit management of audit logging functionality to a subset of privileged users.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4 Audit and Accountability

3.4.1 Establish and maintain baseline configurations and inventories of organizational systems (including hardware, software, firmware, and documentation) throughout the respective system development life cycles.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.2 Establish and enforce security configuration settings for information technology products employed in organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.3 Track, review, approve or disapprove, and log changes to organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.4 Analyze the security impact of changes prior to implementation.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.5 Define, document, approve, and enforce physical and logical access restrictions associated with changes to organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.6 Employ the principle of least functionality by configuring organizational systems to provide only essential capabilities.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.7 Restrict, disable, or prevent the use of nonessential programs, functions, ports, protocols, and services.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.8 Apply deny-by-exception (blacklisting) policy to prevent the use of unauthorized software or deny-all, permit-by-exception (whitelisting) policy to allow the execution of authorized software.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.4.9 Control and monitor user-installed software.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5 Identification and Authentication

3.5.1 Identify system users, processes acting on behalf of users, and devices.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.2 Authenticate (or verify) the identities of users, processes, or devices, as a prerequisite to allowing access to organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.3 Use multifactor authentication19F for local and network access20Fto privileged accounts and for network access to non-privileged accounts.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.4 Employ replay-resistant authentication mechanisms for network access to privileged and non-privileged accounts.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.5 Prevent reuse of identifiers for a defined period.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.6 Disable identifiers after a defined period of inactivity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.7 Enforce a minimum password complexity and change of characters when new passwords are created.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.8 Prohibit password reuse for a specified number of generations.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.9 Allow temporary password use for system logons with an immediate change to a permanent password.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.10 Store and transmit only cryptographically-protected passwords.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.5.11 Obscure feedback of authentication information.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.6 Incident Response HERE

3.6.1 Establish an operational incident-handling capability for organizational systems that includes preparation, detection, analysis, containment, recovery, and user response activities.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.6.2 Track, document, and report incidents to designated officials and/or authorities both internal and external to the organization.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.6.3 Test the organizational incident response capability

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7 Maintenance

3.7.1 Perform maintenance on organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7.2 Provide controls on the tools, techniques, mechanisms, and personnel used to conduct system maintenance.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7.3 Ensure equipment removed for off-site maintenance is sanitized of any CUI.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7.4 Check media containing diagnostic and test programs for malicious code before the media are used in organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7.5 Require multifactor authentication to establish nonlocal maintenance sessions via external network connections and terminate such connections when nonlocal maintenance is complete.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.7.6 Supervise the maintenance activities of maintenance personnel without required access authorization.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8 Media Protection

3.8.1 Protect (i.e., physically control and securely store) system media containing CUI, both paper and digital.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.2 Limit access to CUI on system media to authorized users.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.3 Sanitize or destroy system media containing CUI before disposal or release for reuse.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.4 Mark media with necessary CUI markings and distribution limitations.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.5 Control access to media containing CUI and maintain accountability for media during transport outside of controlled areas.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.6 Implement cryptographic mechanisms to protect the confidentiality of CUI stored on digital media during transport unless otherwise protected by alternative physical safeguards.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.7 Control the use of removable media on system components.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.8 Prohibit the use of portable storage devices when such devices have no identifiable owner.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.8.9 Protect the confidentiality of backup CUI at storage locations.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.9 Personnel Security

3.9.1 Screen individuals prior to authorizing access to organizational systems containing CUI.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.9.2 Ensure that organizational systems containing CUI are protected during and after personnel actions such as terminations and transfers.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10 Physical Protection

3.10.1 Limit physical access to organizational systems, equipment, and the respective operating environments to authorized individuals.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10.2 Protect and monitor the physical facility and support infrastructure for organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10.3 Escort visitors and monitor visitor activity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10.4 Maintain audit logs of physical access.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10.5 Control and manage physical access devices.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.10.6 Enforce safeguarding measures for CUI at alternate work sites.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.11 Risk Assessment

3.11.1 Periodically assess the risk to organizational operations (including mission, functions, image, or reputation), organizational assets, and individuals, resulting from the operation of organizational systems and the associated processing, storage, or transmission of CUI.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.11.2 Scan for vulnerabilities in organizational systems and applications periodically and when new vulnerabilities affecting those systems and applications are identified.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.11.3 Remediate vulnerabilities in accordance with risk assessments.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.12 Security Assessment

3.12.1 Periodically assess the security controls in organizational systems to determine if the controls are effective in their application.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.12.2 Develop and implement plans of action designed to correct deficiencies and reduce or eliminate vulnerabilities in organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.12.3 Monitor security controls on an ongoing basis to ensure the continued effectiveness of the controls.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable

Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.12.4 Develop, document, and periodically update system security plans that describe system boundaries, system environments of operation, how security requirements are implemented, and the relationships with or connections to other systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13 System and Communications Protection

3.13.1 Monitor, control, and protect communications (i.e., information transmitted or received by organizational systems) at the external boundaries and key internal boundaries of organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.2 Employ architectural designs, software development techniques, and systems engineering principles that promote effective information security within organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.3 Separate user functionality from system management functionality.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.4 Prevent unauthorized and unintended information transfer via shared system resources.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.5 Implement subnetworks for publicly accessible system components that are physically or logically separated from internal networks.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.6 Deny network communications traffic by default and allow network communications traffic by exception (i.e., deny all, permit by exception).

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.7 Prevent remote devices from simultaneously establishing non-remote connections with organizational systems and communicating via some other connection to resources in external networks (i.e., split tunneling).

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.8 Implement cryptographic mechanisms to prevent unauthorized disclosure of CUI during transmission unless otherwise protected by alternative physical safeguards.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.9 Terminate network connections associated with communications sessions at the end of the sessions or after a defined period of inactivity.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.10 Establish and manage cryptographic keys for cryptography employed in organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.11 Employ FIPS-validated cryptography when used to protect the confidentiality of CUI.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.12 Prohibit remote activation of collaborative computing devices and provide indication of devices in use to users present at the device.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.13 Control and monitor the use of mobile code.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.14 Control and monitor the use of Voice over Internet Protocol (VoIP) technologies.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.15 Protect the authenticity of communications sessions.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.13.16 Protect the confidentiality of CUI at rest.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14 System and Information Integrity

3.14.1 Identify, report, and correct system flaws in a timely manner.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.2 Provide protection from malicious code at designated locations within organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.3 Monitor system security alerts and advisories and take action in response.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.4 Update malicious code protection mechanisms when new releases are available.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.5 Perform periodic scans of organizational systems and real-time scans of files from external sources as files are downloaded, opened, or executed.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.6 Monitor organizational systems, including inbound and outbound communications traffic, to detect attacks and indicators of potential attacks.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

3.14.7 Identify unauthorized use of organizational systems.

☐ Implemented ☐ Planned to be Implemented ☐ Not Applicable
Current implementation or planned implementation details. If "Not Applicable," provide rationale.

AGENT'S INVESTIGATION REPORT

CID Regulation 195-1

ROI NUMBER: 0007-03-CID259-80133

DETAILS

BASIS FOR INVESTIGATION: About 2004, 8 Jan 04, this office received a Serious Incident Report (SIR) from the CID Liaison Officer, V Corps, Baghdad, Iraq indicating an Iraqi detainee died while under the custody of Coalition Forces at Abu Ghurayb Prison, Abu Ghurayb, Iraq.

About 1124, 9 Jan 04, SA 7C-1, 66-1 coordinated with SA 7C-1, 66-1 Abu Ghurayb Prison, Abu Ghurayb, Iraq who related Mr. IBRAHEIM was brought unconscious to the Compound 3 gate by other detainees. SA 7C-1, 66-1 related medics were dispatched to the scene where they pronounced Mr. IBRAHEIM dead from unknown causes. SA 7C-1, 66-1 elated he conducted initial interviews of the personnel on sight, the medics, and the doctor who pronounced Mr. IBRAHEIM dead.///LAST ENTRY///

CID FORM 94 FOR OFFICIAL USE ONLY

AGENT'S INVESTIGATION REPORT

CID Regulation 195-1

About 2030, 8 Jan 03, SA 7C-1, b6-1 erviewed SPC 7C-4, b6-4 SPC 7C-4, b6-4 both of 320th Military Police Company (MP Co), Abu Ghraib Prison Complex, APO AE 09335 (AGPC), who both related that on 8 Jan 03 they were serving as the Trauma Team assigned to work the Prisoner Camps and attend to any Trauma related cases involving prisoners. They related sometime after 1500 they were notified by radio to report to Ganci 3, AGPC, is response to a prisoner that was having difficulty breathing. They arrived approximately 1-2 minutes after being notified and discovered an elderly prisoner who was unresponsive and unconscious. They checked for vital signs with negative results and the prisoner was turning blue from the nipples up; pupils were fixed and dilated; no brachial or carotid pulse was detected. CPR was not initiated. They related they immediately transported the body to the Medical Treatment Area of the Inprocessing Center for further treatment by the Medical Doctor.

About 2040, 8 Jan 03, SA 7C-1, b6-1, SA 7C-1, b6-1 and SA 7C-1, b6-1 both of this office, examined the body of Nasef Jasem IBRAHEIM, Detainee # 154111, which was located at the Medical Treatment Area, Inprocessing Center, AGPC. A visual inspection of the body revealed a lack of evidence of physical trauma and no bruising or other wounds were noted. Rigor Mortis was beginning to onset and Livor Mortis was apparent on the back of the deceased. The deceased was photographed for identification purposes using a Kodak EasyShare DX 4330.

AGENT'S COMMENT: The deceased was laying on his back within a body bag.

About 2100, SA 7C-1, b6-1 nterviewed SPC 7C-4, b6-4 and SSG 7C-4, b6-4 , both of 320th Military Police Battalion (MP BN), AGPC, who related around 1530, 8 Jan 03, a prisoner, subsequently identified as the deceased son (NFI), came to the gate of Ganci 3, AGPC, and reported his father was not breathing, had turned blue and had fallen down. SPC 7C-4, b6-4 lated he told the prisoner to bring the sick individual to the gate and then he called the Tactical Operations Center (TOC) and requested medical personnel. They further related a couple minutes later, the son and the brother of the sick prisoner arrived carrying the sick prisoner on a blanket to the gate and was taken outside the gate to await medical personnel, who arrived at the same time the sick prisoner was brought to the gate and immediately began an assessment. They related the medics immediately, with in a minute or two, transported the sick prisoner to the Medical Treatment Area in the Inprocessing Area.

About 2110, 8 Jan 03, SA 7C-1, b6-1 interviewed SSG 7C-4, b6-4 and SPC 7C-4, b6-4 both of 320th MP Co, AGPC, who related around 1530, 8 Jan 03, they were present in Guard Tower #3, which is adjacent to Ganci 3, along the Western Edge.

and observed several prisoners carrying a blanket with what appeared to be a body inside toward the gate of the compound. SPC 7C-4, b6-4 lated he notified the Guard Post at the gate of what he observed and was informed medical personnel were enroute.

About 2110, 8 Jan 03, SA 7C-1, b6-1 terviewed SFC 7C-4, b6-4 320th MP BN, AGPC, who stated approximately 1530 he was notified by the TOC a detainee had turned blue in Ganci 3. SFC 7C-4, b6-4 stated he dispatched a trauma team at 1535. SFC 7C-4, b6-4 ed when the trauma team arrived the detainee was deceased, and they transported the detainee to the Medical Treatment Area. SFC 7C-4-b6-4 ated he proceeded to the Medical Treatment Area with LTC 7C-4, b6-4 320th MP BN, AGPC. The detainees' lips were white, pupils were dilated and he was not breathing. The trauma team did not perform CPR. At 1554, LTC 7C-4, b6-4 pronounced the detainee dead. SFC 7C-4, b6-4 stated the detainee had a pre-existing heart condition.

About 2130, 8 Jan 03, SA 7C-1, b6-1 erviewed LTC 7C-4, b6-4 who stated around 1545, 8 Jan 03, he heard a detainee was being transported to the Medical Aid Station. LTC 7C-4, b6-4 stated when he arrived the detainee had no heart rate, no respiration, no responsiveness to deep pain stimulation, and eyes were dilated. LTC 7C-4-b6-4 stated no CPR was administered upon his arrival and he pronounced the detainee dead at 1554. LTC 7C-4, b6-4 ated the preliminary cause of death was Cardio Pulmonary Arrest, and the manner of death was natural.

Prisoners from Ganci 3 came up to the front gate to inform the Compound Military Police Guards that Detainee # 154111 was really ill and that he had fallen to the ground. It was about 1530 when I was informed about the situation. I then used a radio to inform Shadow Main (TOC) of the situation at hand. The Medics then arrived on site five Minutes after they recieved information. Prisoner # 154111 was then taken out of Compound with medics. Medics took prisoner right when they saw his Condition. The Compound then recieved the information that prisoner # 154111 did not make it. Deceased from a heart attack. The information came at 1633hrs on 8 Jan 04

MEMORANDUM FOR Commander, USACIDC, ATTN: CIOP-COP-OP, 6010 6th St., Fort Belvoir, VA 22060

SUBJECT: RFI (0212-04-CID001)

1. The review of ROI # 0007-04-CID259-80133 determined the investigation was operationally sufficient and was administratively insufficient. A supplemental ROI needs to be submitted upon receipt the final autopsy report.

2. The review disclosed the following deficiencies. The investigation did not conduct a crime scene examination or explain why such an examination was not conducted. The investigation did not conduct interviews of those witnesses who found the victim and took his body to the military police guards. There was no effort made to interview the alleged brother and son of the victim who were reportedly present at the prison at the time of death. The Final Report of Investigation (ROI) inappropriately contains the caveat for initial reports where the report is a preliminary investigation and may change prior to completion of the investigation. The investigation has not yet received the final autopsy report.

3. The point of contact is the undersigned at TC-1, DG-1 @us.army.mil, DNVT (302) 584-

7C b6-1

I'll get guys on this telephonically for now, but can you take a look into the particulars of the death scene, if any? Really, all I need is the death scene secured "if" it smells like anything suspicious. Our guidance in non-suspicious prisoner deaths (ie. cardiac arrest) is to report it SSI Only. Thanks.

REVOKED GUIDANCE, MUST BE ROI.

Who is Kyle Odom?

Born and raised in North Idaho. Grew up in a loving family. Joined the Marine Corps after high school. Developed an interest in science. Went to school for a degree in Biochemistry. Won numerous scholarships and awards. Graduated Magna Cum Laude then got invited to a prestigious university to work on genetics.

Check my personal documents.

As you can see, I'm pretty smart. I'm also 100% sane, 0% crazy.

Why did he do it?

My life was ruined. Ruined by an intelligent species of amphibian-humanoid from Mars. I wish I was joking, keep reading.

- They were here long before we ever existed.
- Their technology is *millions* of years more advanced than ours. I've seen them do things that defy all comprehension.
- They have a massive breeding stock of humans, which they breed and control from birth. They use these 'humans' to live vicarious lives among us. They appear to be completely normal because they're good at imitating human behavior. (See Martian Technology for an explanation on this)
- The actual Martians live deep underground here and inside of the moon.
- They take control of 'wild' human beings and use them as sex slaves. Don't believe me? Ask President Obama to take a lie detector test on this one.
- They tried to take me, but they were unable to control my mind. They've been following me ever since.
- I tried everything to get my life back. I begged, bargained, and I threatened.
- Everything I tried to do was sabotaged.
- I attempted suicide twice, but they stopped me both times.
- My last resort was to take actions that would bring this to the public's attention.

Read My Story to learn what happened to me and why they targeted me.

My Story

SPRING 2014 - Moscow, ID

Everything started while I was at University of Idaho. Spring 2014 was my final semester and I was taking a heavy course load (see Transcript). I was very stressed due to the intensity of my schedule, so I searched for a way to cope. I discovered meditation, which seemed to help, so it became part of my daily routine. As I learned more about meditation, I became interested in consciousness and our ability to affect it. I kept working on my meditation techniques and began achieving extreme states of consciousness.

This continued until I encountered another being through meditation. It happened one night in February 2014 and it was the most profound experience I've ever had. I was lying in bed meditating then suddenly left my physical body. I entered a space that was completely dark and had no awareness of my physical boundaries/orientation. I felt very peaceful there until a blue light began to approach me. As the blue light got closer, I realized it was another being. Once I was in the being's presence, I felt an immediate sense of wrongdoing. It felt like I was being told "YOU SHOULDN'T BE HERE!" I instantly conceded and felt guilty, then I began to distance myself from the being. This had an impact on them and seemed to change their mind about me. The moment I began to distance myself from the being, I became overwhelmed by a feeling I can only describe as unconditional love. During this part of the experience, our minds became connected and I saw that the being was female. I then began to feel the most euphoric, comforting, and blissful feelings I have ever felt. It was incredibly powerful and life-altering.

Next thing I knew, I woke up. I had tears in my eyes and I couldn't get out of bed. I felt a profound sense of loss like I had just lost someone close to me. It was very painful. A few minutes later, the experience left my mind (against my will) and I went about my day. After that, I had no urge to meditate at all. Every time I even

thought about meditation, the thought was stripped from my mind. When I finally did try meditating again, I was unable to achieve anything. I didn't think much of it at the time, but I knew it wasn't going to improve. Ultimately, I decided to give up on meditation and just focus on my classes.

The remainder of the semester became exceedingly easy for me. It felt like I had tapped into some kind of power. I was exerting no mental effort even though the classes had been extremely difficult before. I also began to have complex thoughts and a depth of understanding I had never reached before.

About a month later, I started interviewing at the graduate schools I had applied to. Shortly after the interviews were done, I started receiving offers. I decided to accept the offer from Baylor College of Medicine to work on a PhD in Human Genetics. I was very excited about the opportunity to work at such a prestigious university. The future looked bright and I couldn't wait to get started.

JUL 2014 – OCT 2014 - Houston, TX

Everything changed once I started the program. The moment I arrived, I could see flaws in every professor's research. My mind was so expanded that I could instantly understand the implications of entire research projects. Because of this, I was able to see weaknesses in all the available projects. This caused me to become very concerned about what I was doing and I felt like I was wasting my time. I voiced my concerns to my advisor and he casually brushed them aside. He told me "Just have fun, it'll be fun". I kept trying to get motivated, but things continued to get worse. I started seeing flaws in the foundations of Genetics and other fields. It got to the point where I couldn't stop thinking about them. To make things worse, no one else seemed to care, which really bothered me. All these issues made it impossible for me to continue, so I decided to leave.

The day after I decided to leave, my life became a living hell. I couldn't sleep and my mind felt sapped. I was entirely at peace with my decision, so I knew something strange was happening to me. After a few days of this, two of the graduate students began reaching out to me. [redacted] and [redacted]. I barely knew them, so it seemed unusual they would contact me. When I went to see them, they both kept pointing their finger at me saying "pew pew" like they were shooting a gun. They did this over and over and I kept wondering what their problem was. (Months after I left Houston, I was told that Eugene and Brandon were not human. They were tasked with making me into "the next school shooter" as they called it. I imagine this is why many of our school shootings take place.)

Anyway, things slowly improved after I stopped talking with [redacted] and [redacted] but I was mentally exhausted. I tried to figure out what to do with my life, but I could hardly think. Eventually, I left Texas and started applying for jobs all over the country. A few months later, things took a strange turn.

OCT 2014 – AUG 2015 - CDA, ID

In Spring 2015, I finally secured an interview with a food company. I thought I was about to get something going with my life, but I was wrong. I couldn't sleep *at all* the night before my interview. I literally stayed awake the entire night, which had never happened to me before. I looked unrecognizable in the mirror the next morning and my mind felt sapped worse than it had in Houston. Needless to say, the interview didn't go well. I couldn't think and I had extreme difficulty with normal conversation. After the interview was over, I suddenly felt fine AND looked perfectly normal... I slept great that night then made my way to the airport the next morning.

This is where the story gets weird. On the plane ride back home, my seat was taken. I asked the flight attendant and she directed me to a new seat. Once I sat down, an older gentleman in front of me kept glancing back until he got my attention. As he kept looking back, my head began to hurt and tingle. The moment

my head began to hurt, his lips curled up into this evil looking smile. The pain and tingling in my head continued for the rest of the flight and got more intense as time went on. Every time I felt it, the man would start taking notes in a notepad. About halfway through the flight, someone else in front of me held up a newspaper that said "Psychic Reading" for like 5 minutes straight. It was blatantly obvious they were doing something to me, but I didn't know what. Once we landed, the older gentleman kept showing me his TracFone as if to say "Get one of these".

I had applied to several government agencies before this happened, so I thought this might be their way of contacting me. Out of curiosity, I decided to go and buy a TracFone. I checked it every day to see if anyone messaged or called. About a month later, I got a text message from a man named John Padula. He invited me to come to church at The Altar. It seemed like a strange place to be recruiting for government jobs, but I went anyway. After I got there and went inside, something felt very wrong. I felt as if my life was in danger and I became so uncomfortable I had to leave.

A couple days later, I started receiving text messages from Tim Remington. At first they were innocuous bible messages, but then he started threatening me. He sent messages talking about 'their power' and other things. He did all of this through bible verses so it would not look suspicious. I ignored everything until he sent one final text message, which simply said 'angels'. I thought nothing of it until helicopters started flying around my house all day and all night. At this point, I knew I was in trouble. I knew I needed to contact them, so I made an appointment to meet John Padula for coffee. Little did I know, he had no intention of meeting me.

After making the appointment to meet John, something very bizarre happened. I received the most unnatural [redacted] I've ever had. It felt like someone was manually pumping blood into my [redacted] I don't know how else to describe it. Immediately after that, a song began playing in my mind. The lyrics went: "Sister sister, he's just a plaything. We wanna make him stay up all night." I had never heard

this song before and I had no idea what it meant. I tried to ignore it and kept searching for jobs. A few minutes later, the song quit playing.

Nothing else happened until I tried to go to sleep that night. As soon as I got into bed, the song started again. "Sister sister, he's just a plaything. We wanna make him stay up all night." As it turned out, they weren't kidding. I got literally zero minutes of sleep that night. Every time I started to drift off, I was woken up violently then the song would play.

When the sun came up, I gave up on trying to sleep and got out of bed. I was relieved at first because the song had quit playing. I thought the torture was over until a voice entered my mind. The voice said: "You're going to be uncomfortable, all you have to do is breathe". I sat there wondering what this meant until the voice spoke again. It told me I was going to: "...be sacrificed like Jesus and get beheaded." This threw me into a complete panic. My heart began racing and I started to have a mental breakdown.

A few minutes later, some man knocked on my door. I answered and he gave me a pamphlet talking about "The Sacrifice of Jesus". My mind started racing out of control and I became completely delirious. I thought for sure I was going to die. My thoughts shifted to my family, and all I could think about was seeing them again. They were in Albuquerque at the time, so I decided to buy a one-way ticket there.

When I reached the Spokane airport, my panic subsided. Everything was fine until I got on the plane to Albuquerque. I sat next to this huge man who kept telling me (telepathically) that he was going to crash the plane. Every time after he spoke he would sniff emphatically. I didn't know what to do, so I just sat there trying to stay as calm as possible. The 'man' became angry about this and started touching my leg. The second he touched me, I could feel him inside my mind. This caused me to panic until I was on the verge of causing a scene. Before I did anything, he told me to calm down and said: "You did a great job. You passed! Go enjoy your family. We have

a job waiting for you when you get back." I thanked him and felt slightly relieved, but I had no intention of contacting him at all. My only thought was to get as far away from him as possible.

After getting off the plane, I headed to the baggage claim. A huge group of them surrounded me there. I watched them cautiously, then they all began sniffing at me. (The sniff is something they do all the time. I think it has something to do with dominance.) When I finally got my bag, I left the airport as fast as I could. My parents were right outside waiting to pick me up. I was *so* happy to see them again. I gave them big hugs and told them how much I loved them. This was my last happy moment in Albuquerque, however. They followed us everywhere we went after that. Whenever I saw one, they would sniff at me to let me know it was them. They would also smile, laugh, and stick their tongues out.

As time went on, they started coaxing me to go outside alone. I was scared to death they would kill me, so I refused. Eventually, they threatened to harm my family, which caused me to give in to them. I told them I would do whatever they want if they left my family alone. They responded by saying "Go to church." I knew they meant The Altar, so I agreed to go when I got back.

When I went to The Altar for the first time, the people acted very strange. It was unhuman. As I walked into the sermon room, everyone stared at me and began sniffing emphatically. Needless to say, I was scared as hell, but I took a seat. When the service began, a man came and sat down next to me. After he sat down, I began smelling something. It was a smell I had never smelt before. The only thing I can compare it to is a reptile and vinegar. After smelling it, I became very uncomfortable. I tried to remain calm and just sat there quietly until the service was over. When the service ended, they said: "You can leave now". After that, I knew I wasn't dealing with the government anymore. I realized that whoever I was dealing with was extraterrestrial, so I became very scared.

I received no further instructions from them after that, so I began applying for jobs again. Even though I had done exactly as I was told, they still followed me everywhere I went. As time went on, they started harassing me day and night. I began to hear voices more often and I began to hallucinate things that I knew weren't real. They also started playing with me sexually. Both the males and the females would play out their sexual fantasies in my mind. This came with random and uncontrollable [redacted] as well as extreme [redacted] stimulation. (See Brain & Behavior & Martian Tech)

The harassment continued for weeks and intensified as time went on. I did my absolute best to maintain my sanity and tried to avoid them. This worked for a while, but eventually I had a huge meltdown. One day, I was in the bakery at Safeway when I got surrounded by a bunch of old men. Some of them looked at me and sniffed, so I knew it was them. They started stimulating my [redacted] and [redacted] simultaneously, then they spoke aggressively. They said:

"Humans are nothing more than the result of a successful genetic experiment."

"You are a threat to the way these people think and you can no longer be free in society."

"Your life is over"

"You are nothing but a toy. Your purpose now is to suck ([redacted])."

They continued to say other explicit things that were so obscene I won't repeat them here. Before they finished talking, I became enraged. It took every ounce of willpower I had not to kill them. I left the store and tried to calm down but it only got worse. The rest of the night they continually stimulated [redacted] and I couldn't stop [redacted]. It got to the point where I was in serious pain. They finally stopped after I broke down and became completely distraught. I knew I couldn't take any more, so I attempted suicide. I filled a charcoal grill with lit coals, put it in my car and rolled up the windows. I reclined my seat, laid there calmly, then fell

asleep. I should have died but they woke me up in an *extreme* panic, which caused me to get out of the car.

As I slowly regained consciousness, I felt very upset to still be alive. I had no clue where to go at that point, so I decided to check myself into the VA. They shipped me straight to the mental ward and I was admitted. Nothing improved while I was there. The medication they gave me did absolutely nothing. I just sat there surrounded by a bunch of psychotic people and became exasperated. I knew their goal was to ruin my life by making me into a crazy person. I became determined not to let that happen and I started fighting back.

After leaving the VA, everything I tried to do with my life was sabotaged. They didn't want me dead, but they also weren't going to let me live. In desperation, I went back to The Altar to ask them what they wanted from me. I didn't know what else to do...

(Before I tell you their reply, I need to make an important caveat here. I had endured so much abuse by this time that I was numb to them. The details of what they've done to me aren't essential to the story, so I won't include them here. If you want to know more about what I've been through, or more about them, write me. Just realize I've been tortured more than a POW.)

Their response was: "We want you as our sex slave." Thinking they were serious, I sat there waiting for them to do something. All they did was say: "Keep coming to church", so I did. After a few more services, I found myself talking to Tim Remington face to face. He was telling me that I should consider becoming a minister. We were in mid conversation when he suddenly revealed himself to me. I have no clue how he did it, but it looked as if his human face became his real face. It happened for only 1-2 seconds, but I was able to draw a sketch of what I saw. His eyes really stood out so they captured my attention. They were huge and bulging, the eyelids were darker green, and the irises were yellow/brown with slit pupils. After witnessing this, nothing else happened. I continued attending The Altar for a few more services waiting for them to do something. They did nothing except for tell

me to "submit" and "surrender". I had no clue what they meant, so I left the church and never went back.

AUG 2015 – PRESENT TIME - CDA, ID

After leaving The Altar, they gave me some breathing room. They held back on their harassment and I began to recover. I decided to make one final attempt at a normal life by pursuing a career as a pharmacist. I started taking classes at NIC to finish up the pre-req's I needed. I also started volunteering at a local pharmacy. Unfortunately, they followed me to school. There were several of them in every class I took. They made it impossible for me to study, and they continually harassed me especially while I took tests. Even with all of this going on, I still somehow managed to get an A- in A&P during the fall semester.

Sadly, my success was short lived. The pressure this semester (Spring 2016) is FAR too intense. Every time I go to class, they start manipulating my brain until I go into a blind rage. Sometimes they suppress my brain until I begin to blackout. They also manipulate my heart rate and flood my body with adrenaline over and over again making me extremely uncomfortable. The females stimulate [redacted] when they are close, and the males stimulate [redacted] It's incredibly exhausting.

I struggled to pass my tests so they couldn't blame this on me failing out of school. I want to continue, but I simply cannot. Every moment I spend in the classroom is absolute torture. The classes themselves are extremely difficult *without* all this added pressure. The worst part is I received an interview for ISU's pharmacy program (see personal documents). Since I cannot continue with the classes, there is no reason to go to the interview. My chance at a normal life has been ruined. They've also been depriving me of sleep, so I don't have the strength to continue.

I was too smart for my own good, so they decided to remove me from society. They were worried I might change the way other people think, which could lead to

problems. Problems in the form of scientific revolutions. If we get much smarter as a species, we are going to become a threat to their existence.

If you talk to me in person, you will see that I'm not crazy at all. The Martians are just so good at hiding in plain sight that no one would know they exist unless they revealed themselves. They are able to fool us so well that what I'm saying sounds impossible. However, they are 100% real. Realize their technology is *millions* of years more advanced than ours. Think about that for a second. Think about the advancement we have made in the last 100 years. Once you've done that, try to imagine what *millions* of years of technology would look like.

The President is well aware of them, which is why I wrote him a personal letter. I hope he does something about it. I have done nothing wrong to deserve what's happened to me. I tried literally everything to find a job, and they sabotaged me at every corner. Initially, I thought the right thing to do was kill myself. After attempting suicide twice, it became clear they weren't going to let me die easy.

My last resort was to take actions to bring this to the public's attention. I hope something good comes of it. Just realize that I'm a good person, and I'm completely innocent. Also realize that the 'people' I killed are not what you think. (Read Martian Technology to understand)

To make it very clear, Tim & John were NOT wild human beings.

Wild Humans = normal people like you and I.

Tim and John = minds were controlled from birth by Martians.

It's hard to imagine I know. Nonetheless, it's all true. Why would I give up a career as a pharmacist to do this?

I left out many details from my story. I wanted to write only the most critical events in order to make it coherent. If you want to know more, like how I discovered there are multiple species of them, feel free to write me.

Q&A

Why would aliens hide in a church?

Same reason terrorists hide in Mosques. If you're doing very bad things and you want to avoid getting caught, you will put up a front to make yourself look like a good person.

How do you know about their technology?

I have seen them use it, and they have talked to me about it. This was how I learned about their breeding stock of remote control humans. Physically, their humans are no different than us, they just lack a mind of their own.

Why would they tell you so much?

They value me because I'm smart. They were also very confident they could take control of my mind. Turns out they couldn't. Anyway, in the interim, some of us developed a personal relationship. They are very arrogant, so they told me much more than they should have. This allowed me to understand some of the things they can do.

What else have you seen?

I have seen them make things appear out of nowhere. One time I was sitting on a couch and a dollar bill appeared on my lap. Another time while driving, they made a paper bag appear in my passenger seat. They used random unsuspecting items so no one would think anything of it. I was alone both times this happened.

I'm pretty sure they can pop in and out of this dimension based on other things I've seen. I'm also pretty sure they can overlap our reality with an alternate dimension. I say this because I have gone into stores (where I know the employees) and suddenly there are all new employees who I've never seen before.

Some of the other things I've seen are so strange I literally cannot describe them. This all makes sense though. Their technology is millions of years ahead of ours, so it *should* be incomprehensible to us.

Why did they target you?

They started following me after I encountered the being through meditation. Since my mind was so expanded from the experience, they deemed me a threat to the rest of society. They thought I would change the way people think, so they decided to remove me from society.

I began to have profound thoughts about Genetics while I was at graduate school, which is another factor. If certain ways of thinking are allowed to exist, revolutions will take place. They could not afford for us to have a revolution in Genetics. If we did, we could eliminate diseases, cancers, and many other things that plague us. They need us to remain ignorant and continue struggling, otherwise we will become a threat to them.

(This will not make sense unless you are the President or one of his close friends. If this doesn't pertain to you, please ignore it)

Mr. President,

- I want to thank you for your sacrifice to this country.
- It's very upsetting to hear you talk about the things they do to you. Why do you let them?
- I suppose you have no other choice.
- I've been struggling with them myself for over a year now.
- I had nothing to lose, so I chose this instead. I could never tolerate that much abuse.
- I hope you don't take any of their threats too seriously. Everything is a game to them.
- Realize they consider the entire human race a plaything, including you.
- They brag to me about what they do to you.....
- I'm sure you already know, but he doesn't love you. Their brains don't even work that way.
- I don't know you personally, but they've shown me a lot about you. You're an amazing person.
- I hope you stop letting them humiliate you. Why be afraid to retaliate? Kennedy wasn't.
- It's time *someone* took a stand to end this nonsense. Can you think of a better legacy than that?
- What's worse: Having everyone know the reality of the situation, or watching some of our best and brightest become slaves?

I wish you the very best with the remainder of your presidency.

If you're still in there, stay strong!

https://www.youtube.com/watch?v=61Wm_qlVD4Q

Martian Brain & Behavior

I've observed their behavior for almost a year now. Consequently, I've been able to make several deductions about them. The first deduction is based on their primary characteristics, which include:

1. They are hypersexual
2. They are hyperaggressive
3. They are fearful and paranoid

In the human brain, the amygdala is responsible for all of these characteristics. Therefore, Martian's must have an analogous structure, and it must be greatly enlarged. The morphology of their brain is also markedly different than ours. I know this because I've seen what the amphibian-humanoids look like.

The males are *extremely* aggressive. In their society there is only one thing, and that is power. Whoever is the smartest, biggest, and strongest wins. One time, I was talking to a young male who kept trying to intimidate/scare me. He saw that I was still confident in myself and immediately became discouraged. He stopped what he was doing and said "you think you're better than me", then hung his head and walked away. I told him that wasn't true but he wouldn't listen. After this, every time I encountered one of the males in public they would attack me (mentally) until they destroyed my self-esteem. They did this because they are scared to death of my intelligence. The only way they have the confidence to talk with me is if I'm scared for my life or completely despondent.

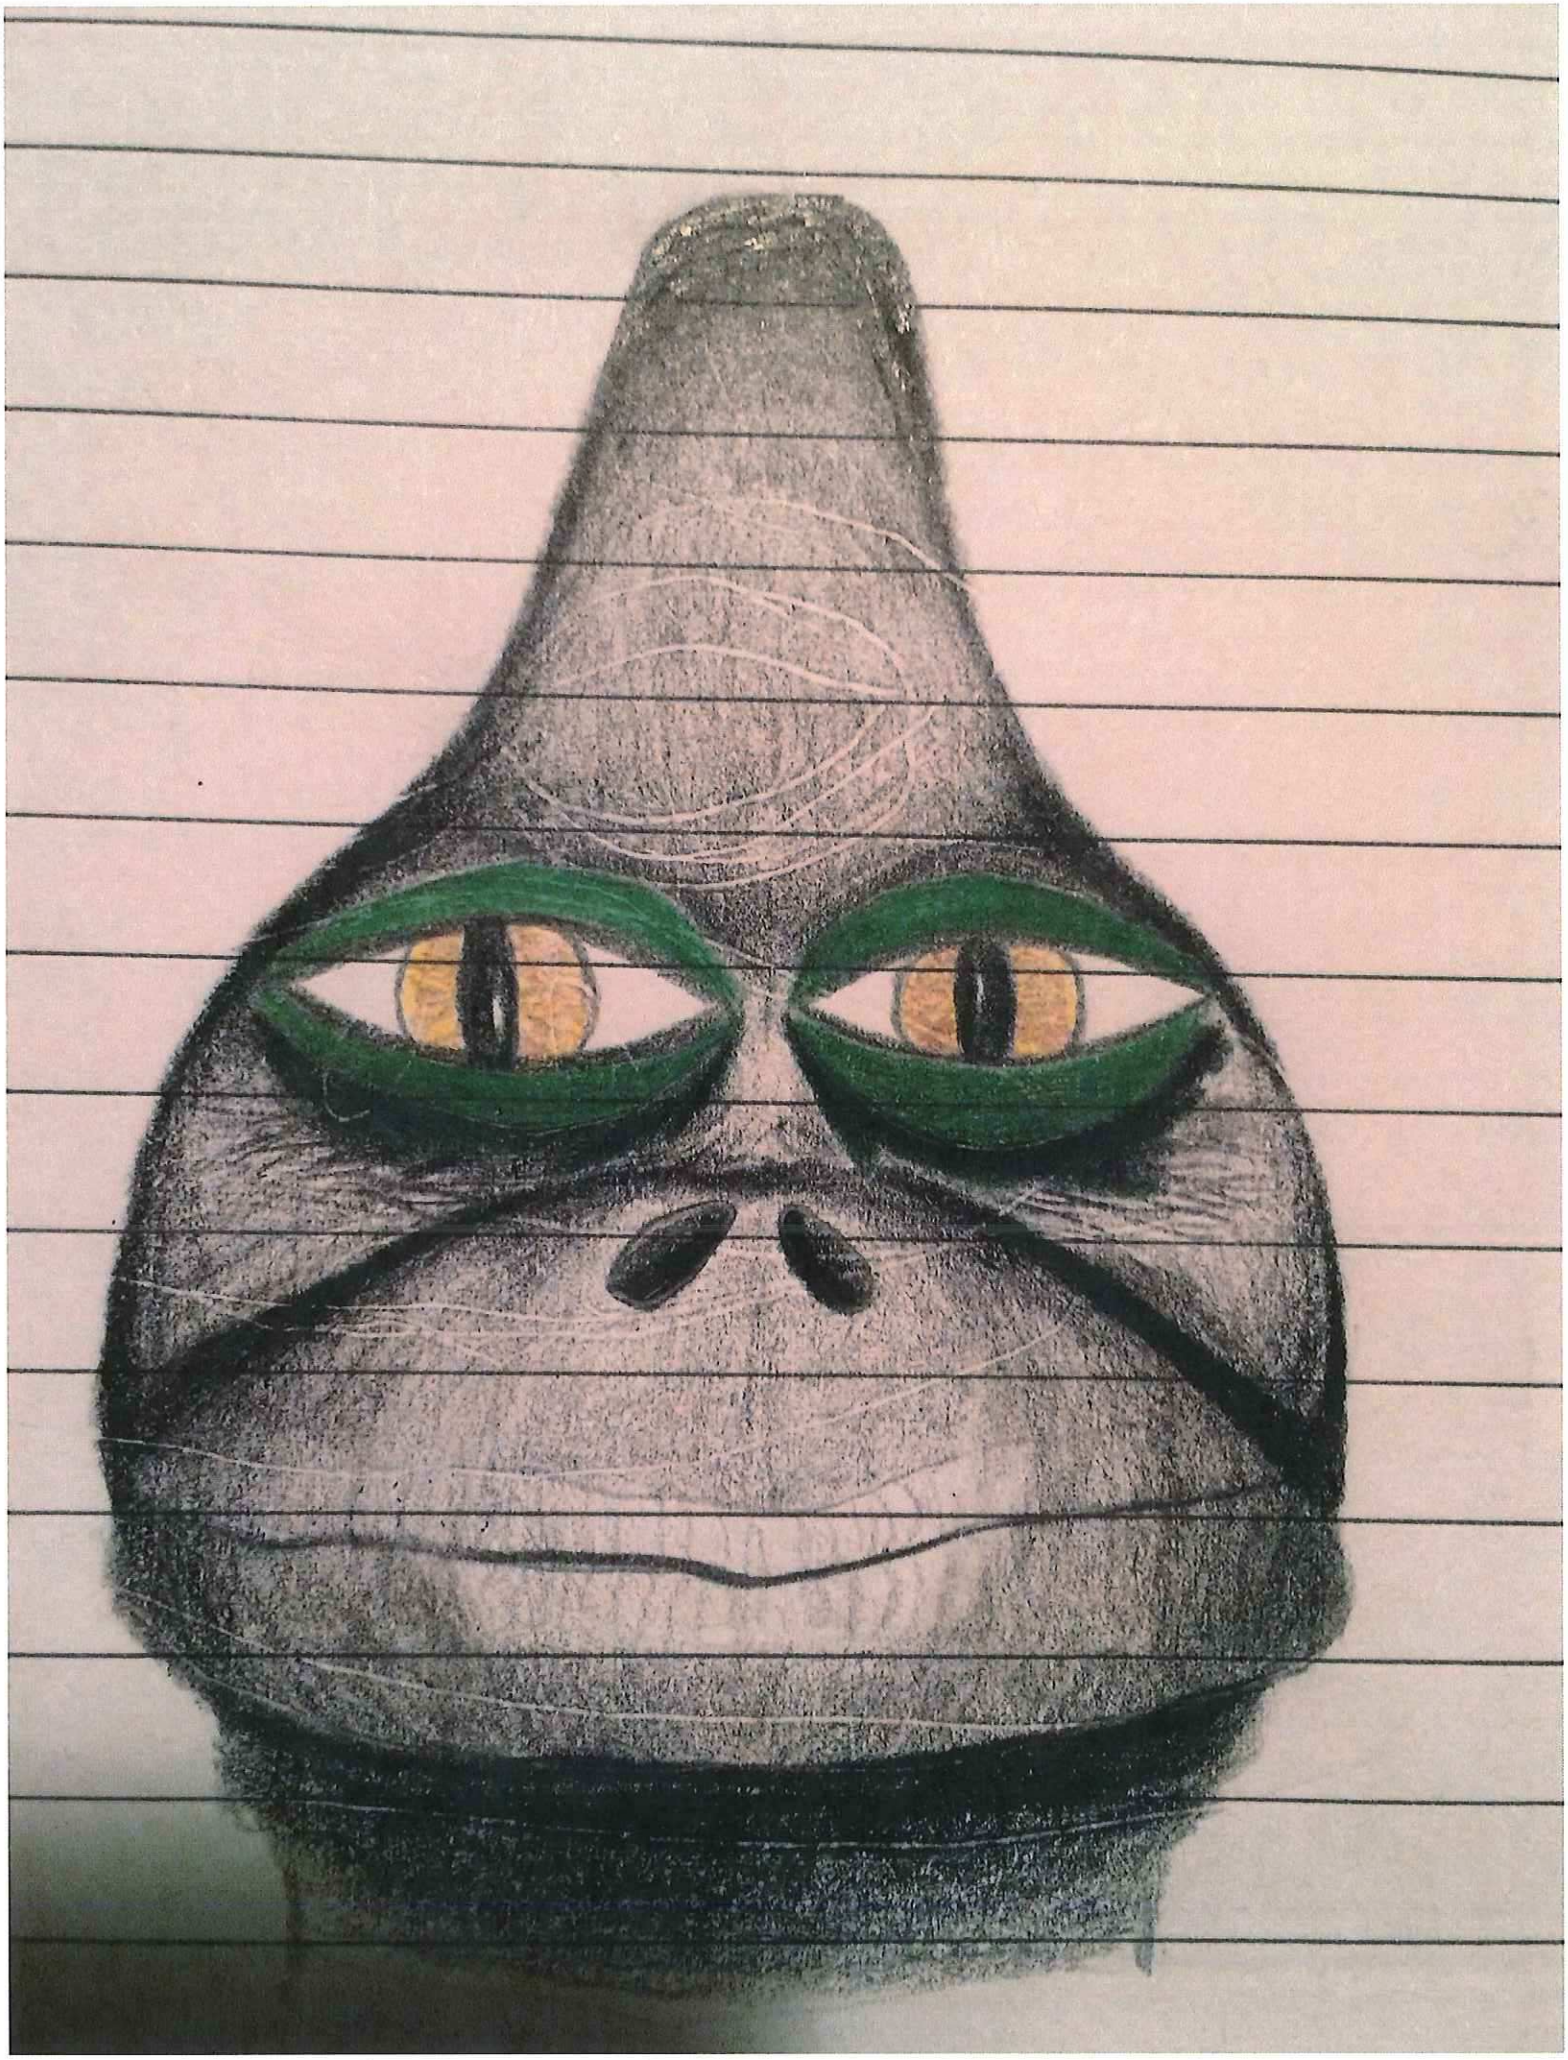
To the males, everything is black or white. There is no middle ground. They are power hungry megalomaniacs obsessed with control. If they are not 100% in control of every situation, they panic. If something happens they aren't anticipating,

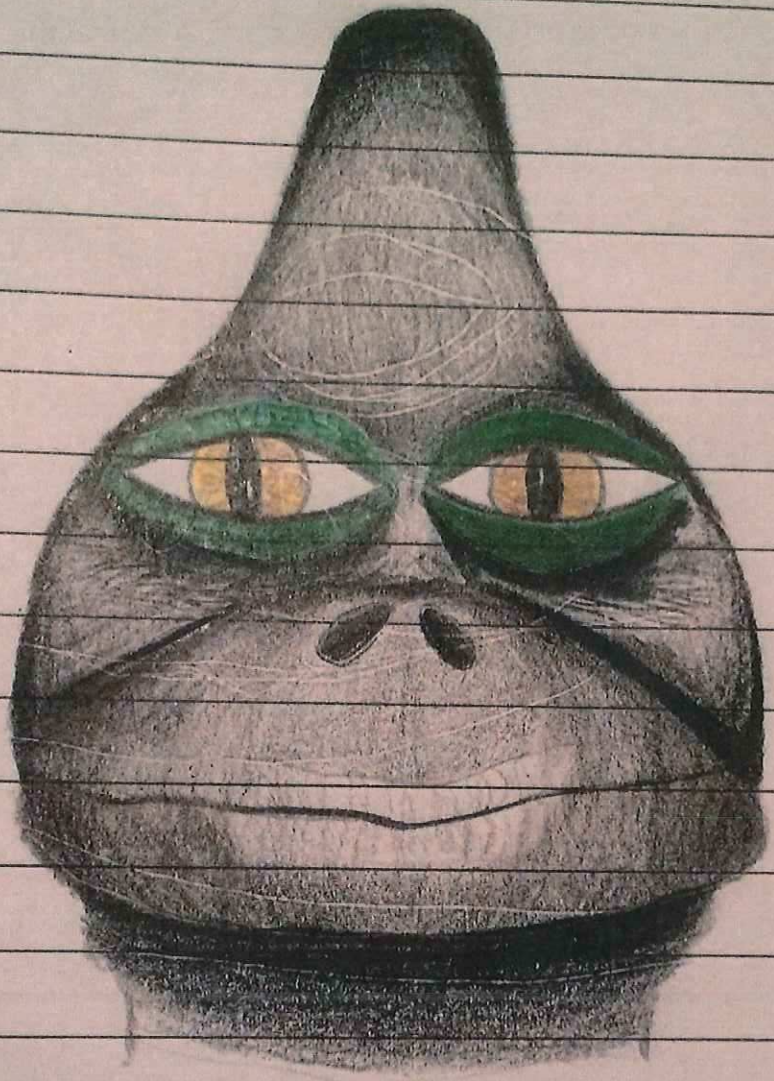
they get very upset. They hate surprises. I know this because I was smart enough to trick them a few times.

To recap, the males are:

1) Megalomaniacal
2) Obsessed with sex
3) Extremely aggressive
4) Fearful and paranoid
5) Power hungry
6) Obsessed with control

Sound familiar? Who else do you know that has these characteristics? If you answered: God from the bible, you are correct. Martians are responsible for the God myth. Martians may have created humans, as they claimed, but they are certainly not Gods themselves. They are just another intelligent species that evolved on a neighboring planet. There is no God. There is no heaven. There is no hell. Earth is as close to heaven as we'll ever get, and we are letting the Martians ruin it. They are going to destroy Earth just like they destroyed Mars if we let them. Our survival rests in their hands for the time being.





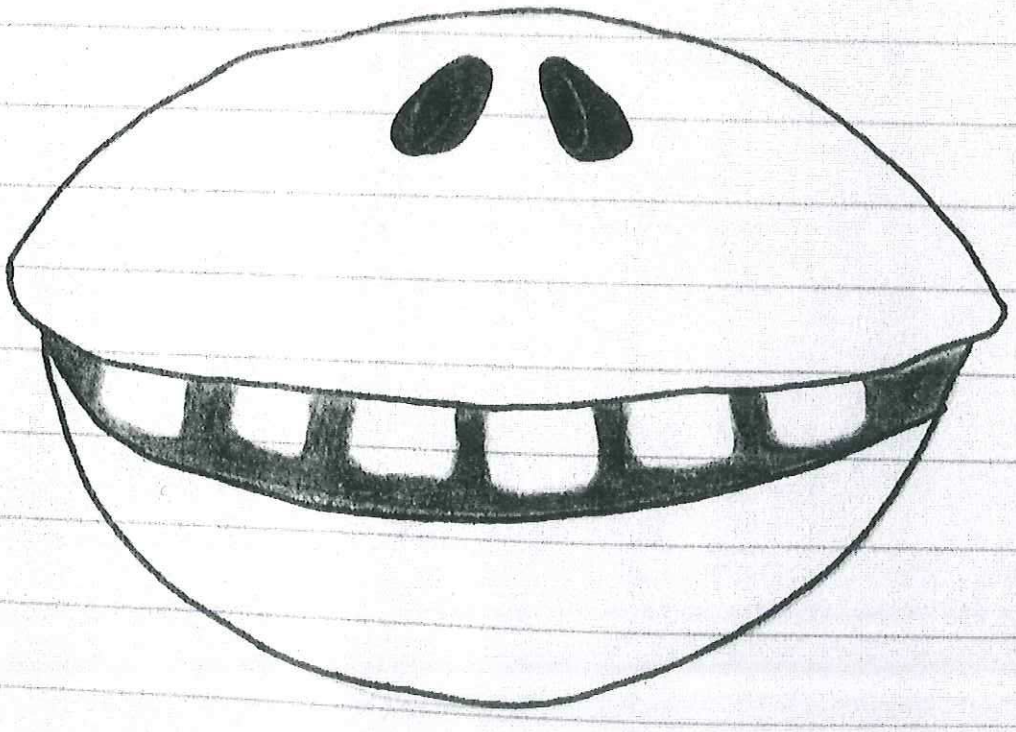
Huge eyes that stuck out of the sockets
Yellow/Brown iris
Projecting muzzle with ~45° angled nostrils
Huge mouth
Dark green skin
The only part I really saw well was the eyes

I assume they said this because their head looks like a muppet.

this is what their teeth look like

(elmo rules the world) ← something they kept saying to me.

again, they only revealed bits and pieces to me, and very briefly. Thankfully I have a photographic memory so I was able to remember what I saw, although I only remember the general appearance because each time I saw them it was very brief. They would smile at me in stores and reveal their mouth/eyes/nose all separately, never together at the same time.



NOTEWORTHY MARTIANS

U.S. Senators	U.S. House of Representatives	Israeli Leadership
Roy Blunt		Lee Rosenberg
Roger Wicker	Dan Lipinski	Afu Agbaria
Richard Durbin	Mike Quigley	Haneen Zoabi
Patty Murray	Brett Guthrie	Shaul Mofaz
Tom Carper	Steve Scalise	Issawi Frej
Ben Cardin	Gary Palmer	David Azulai
Mitch McConnell	Terri Sewell	Yair Shamir
Ron Wyden	Martha McSally	Shimon Solomon
Tim Scott	David Schweikert	Ilan Gilon
Bill Cassidy	Ruben Gallego	Elazar Stern
Barbara Mikulski	Jared Huffman	Gilad Erdan
Elizabeth Warren	Mike Thompson	Danny Danon
Kelly Ayotte	Doris Matsui	Haim Katz
John Barrasso	Nancy Pelosi	Moshe Feiglin
Jeanne Shaheen	Ami Bera	Yehiel Bar
Debbie Stabenow	Mark DeSaulnier	Omer Bar-Lev
	David Valadao	Michal Biran
	Devin Nunes	Uri Ariel
	Lois Capps	Eli Ben-Dahan
	Steve Knight	Avi Wortzman
	Brad Sherman	Eli Yishai
	Raul Ruiz	Amnon Cohen
	Scott Peter	Nissim Ze'ev
	John Larson	Uri Maklev
	Rosa DeLauro	Yisrael Eichler
	John Carney Jr.	Dov Khenin
	Jeff Miller	Masud Ghnaim
	Tom Rooney	Ahmad Tibi
	John Lewis	& every single Prime Minister since 1948
	Hank Johnson	
	Austin Scott	
	Tom Graves	There are *many* others from Israel. Too many to list.
	Luis Gutierrez	
	Luke Messer	
	Andre Carson & more.	

This is by no means an all-inclusive list. Martians are ubiquitous. They exist at every level of society in every nation. Some have blue collar jobs, while others occupy positions of power. They control our government, our military, and Corporate America as well. They keep track of every 'wild' human on the planet and manage us like animals in a zoo. Our 'freedom' is a carefully crafted illusion.

MIAC STRATEGIC REPORT

02/20/09

The Modern Militia Movement

Modern Militia Movement:

The Militia Movement began in the 1980's and reached its peak in 1996. Several social, economic, and political factors contributed to the surge in militia participation in the 1990's. The primary motivator for the movement was the farm crisis of the 1980's, which caused the destruction of 3/4 of a million small to medium size family farms. Overall, 11 million Americans lost their jobs during this time period.

Academics contend that female and minority empowerment in the 1970s and 1960s caused a blow to white male's sense of empowerment. This, combined with a sense of defeat from the Vietnam War, increased levels of immigration, and unemployment, spawned a paramilitary culture. This caught on in the 1980's with injects such as Tom Clancy novels, Soldier of Fortune Magazine, and movies such as Rambo that glorified combat. This culture glorified white males and portrayed them as morally upright heroes who were mentally and physically tough.

It was during this timeframe that many individuals and organizations began to concoct conspiracy theories to explain their misfortunes. These theories varied but almost always involved a globalist dictatorship the "New World Order (NWO)", which conspired to exploit the working class citizens. United Nations troops were thought to already be operating in the United States in support of the NWO. Much of this rhetoric would become anti-Semitic claiming that the Jews controlled the monetary system and media, and in turn the "Zionist Occupied government (ZOG)". The Militia of Montana (MOM) became a key organization in pushing rightwing rhetoric and informing individuals on how to form militia organizations.

A series of incidents in the early 1990's caused a surge in militia participation. The 1992 standoff between federal authorities and the Weaver family at Ruby Ridge, Idaho became a spark for the movement. On August 14, 1992, a 12 day standoff began that would result in the death of one federal agent and the wife and son of Randy Weaver. The following February, a 51-day siege would occur at the Branch Davidian compound in Waco, Texas, resulting in the death of 82 Davidians and four law enforcement agents. In November of 1993, the enacting of the Brady Handgun Violence Prevention Act of 1992 additionally fueled the movement. The movement reached its peak in 1996 with over 850 groups believed to be operating within the US.

Noteworthy militia activity from 1995 to 1999:

- 11/09/95: Oklahoma Constitutional Militia members are arrested as they plan to bomb the Southern Poverty Law Center (SPLC), gay bars, and abortion clinics.
- 12/18/95: A drum of ammonium nitrate and fuel oil is found behind the IRS building in Reno, Nevada, the device failed to explode. An anti-government tax protestor is later arrested for the incident.
- 01/18/96: A member of the Aryan Republican Army (ARA) is arrested in Ohio after a shoot out with the FBI. The ARA was also associated with 22 bank robberies between 1994 and 1996.

- 01/01/96: 12 members of an Arizona Militia group called Viper Team were arrested on Conspiracy, Weapons, and Explosives charges after they were caught doing surveillance on government buildings.

- 07/27/96: A bomb is detonated at the Atlanta Olympic Park, killing one person and injuring 100. Eric Robert Rudolph is later arrested and linked to other bombings at abortion clinics and a gay bar.

- 10/11/96: Seven members of the Mountaineer Militia were arrested for plotting to blow up the FBI fingerprint records center in West Virginia.

- 07/04/97: Members of a splinter group of the Third Continental Congress were arrested in the process of plotting attacks on military bases. The group thought that many military instillations were training United Nations troops that were planning on attacking U.S. Citizens.

- 03/18/98: Members of the North American Militia were arrested on firearms charges; prosecutors claimed that the group conspired to bomb federal buildings in Michigan, a television station, and an interstate highway interchange.

- 12/05/99: Members of the California based San Joaquin Militia were charged with conspiracy to bomb critical infrastructure sites in hopes of provoking an insurrection. The leaders of the organization also plead guilty to plotting to kill a federal judge.

- 12/08/99: The leader of a militia coalition known as the Southeastern States Alliance was charged with conspiracy to bomb energy facilities in order to cause power outages in Florida and Georgia.

Decline of the Movement:

The militia movement began to decline after the 1995 Oklahoma City Bombing and raids on the Montana Freemen and Republic of Texas in 1996 and 1997. Poor public opinion of the militia movement and increased attention from law enforcement caused many of the uncommitted members to leave the movement. Many of the hardcore militia members grew angry with the militia for not mobilizing in response to perceived government aggressions. Some of these fanatics would splinter into smaller or underground groups adhering to the principles of "leaderless resistance".

Many militia groups began to rally members in the belief that the government would collapse due to the Y2K scare. This theory claimed that the government would collapse due to computers not being able to handle the transition from the 1900's to the 2000's. The militia's inaccurate assessment of the Y2K threat badly damaged its reputation. Additionally, thoughts that President George W. Bush was sympathetic to their situation, and a wave of patriotism after 911 would further diminish the militia movement.

The Militia Post September 11, 2001:

During this time period the militia had lost the attention of the mainstream media and public, but it continued to exist. The SPLC reports that between the Oklahoma City Bombing in 1995 and 2005 that roughly 60-rightwing extremist plots were uncovered.

Noteworthy militia activity from 2000 to 2008

- 03/09/00: The former leader of the Texas Militia was arrested for conspiracy to attack the Houston Federal Building.

- 03/01/01: A former Colonel in the Kentucky Militia peppered a deputy's car with semi automatic weapons fire during a traffic stop.

- 02/08/02: Two members of a group called Project 7 were arrested for plotting to kill judges and law enforcement officers in order to kick off the revolution.

- 09/03/02: A plot by the Idaho Mountain Boys Militia to murder a federal judge and a police officer and then break a friend out of jail was uncovered.

- 07/07/03: A Michigan Militia member killed a Michigan State Trooper that attempted to serve him a warrant.

- 10/25/04: A farmhand in Tennessee was arrested for attempting to obtain ingredients for sarin gas and C-4 explosives in order to conduct Anti Semitic and government attacks.

- 06/29/07: Six members of the Alabama Free Militia were arrested on weapons and explosives charges. An ATF agent would go on to testify that five of the men were planning an attack on Mexicans in a town near Birmingham.

- 12/08: National Guard and Reserve facilities received packages with anti New World Order rhetoric. This would occur within a week of hoax anthrax mailings to State Governor's offices.

Reemergence of the Movement:

Rightwing extremists and militia leaders continuously exploit current world events in order to increase participation in their movements. Due to the current economical and political situation, a lush environment for militia activity has been created. Unemployment rates are high, as well as cost of living expenses. Additionally, President Elect Barrack Obama is seen as tight on gun control and many extremists fear that he will enact firearms confiscations. White supremacists from within the militia movement have further become angered due to the election of the first African American President. Many constitutionalists within the movement have claimed that President Elect Obama does not meet the residency requirements to hold the office of President, and therefore his election is unconstitutional.

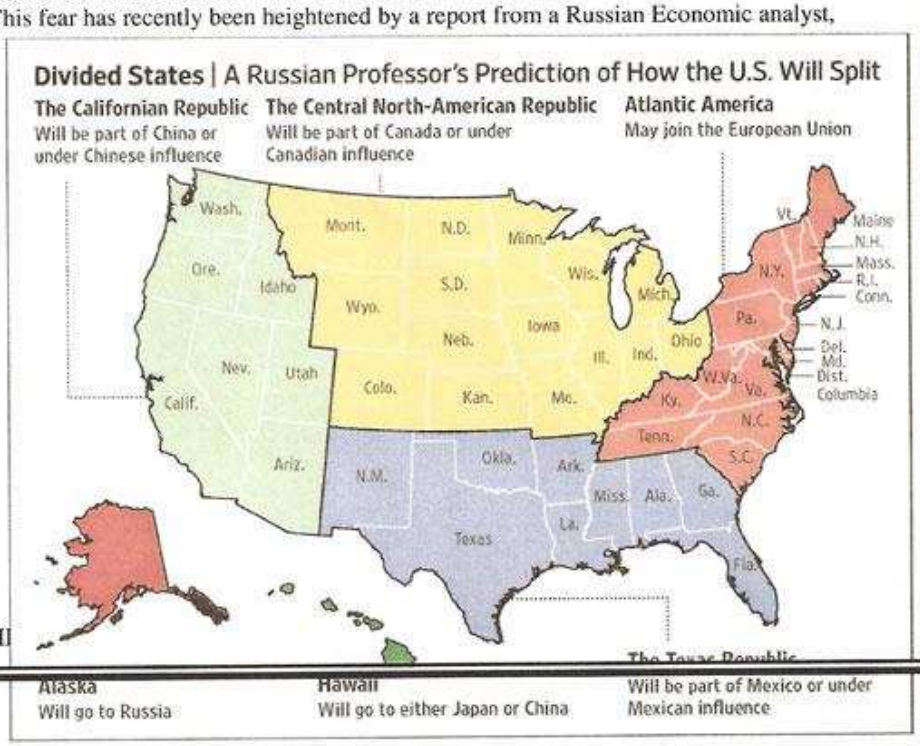
Newer versions of the NWO conspiracy have been concocted in order to empower the movement. The NWO is seen as using law enforcement, military, national guard, and federal agencies in order to carry out its elitist one world government. Law enforcement and military forces are believed to be utilized in order to confiscate firearms and place individuals into FEMA concentration camps. This scenario has received additional attention due to the US Army NORTHCOM assigning homeland security functions to an active duty Infantry Brigade. The movement sees this brigade as the force that will take their firearms and that the unit is in violation of the Posse Comitatus Act. There are also concerns that the banking and media infrastructure are also being controlled by the Jewish elite and that these leaders are members of the NWO. There is a great deal of anger towards the Federal Reserve System (FRS) and all forms of tax collection.

Additional motivators for militia activity:

Bullet with engraved tracking number

Ammunition Accountability Act: The Ammunition Accountability Act has been up for legislation in most states. This legislation would require that an ID number be engraved on the round of all ammunition and this ammo could in turn be linked to a place of purchase and the purchaser. Some states have added a clause to the act making it a misdemeanor to possess unregistered ammunition. *Bill did not pass in Missouri*

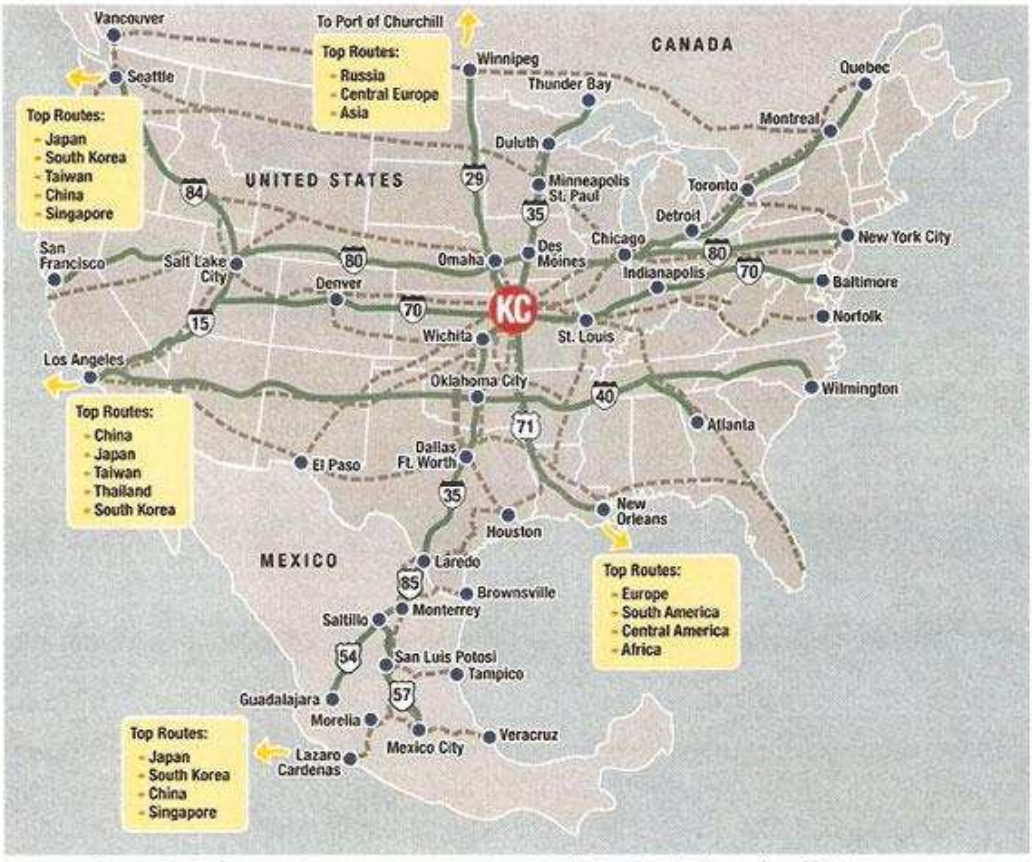
Anticipation of the economic collapse of the US Government: Many militia organizations feel that the U.S. government will fall due to economic or racial issues. They believe that during the chaotic fall of the government, moves will be made to install Martial Law, confiscate firearms, and imprison many citizens. This fear has recently been heightened by a report from a Russian Economic analyst, Igor Panarin. Panarin predicted that the U.S. would collapse and fraction into six different regions controlled by foreign governments. Panarin goes on to say that as early as the autumn of 2009, the economic crisis will lead to a civil war.



Possible Constitutional Convention (Con Con): Currently 32 states have called for a Constitutional Convention (Con Con) that will add amendments to the U.S. Constitution. The Con Con will be held if two more states request it. The convention is planned specifically for the reason of adding a balanced budget amendment to the Constitution. The Militia Movement is concerned that if a Con

Con is held, the 1st and 2nd amendments will be altered or removed.

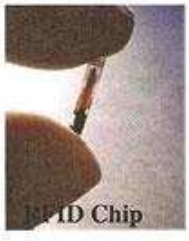
North American Union (NAU): Conspiracy theorists claim that this union would link Canada, The United States, and Mexico. The NAU would unify its monetary system and trade the dollar for the AMERO. Associated with this theory is concern over a NAFTA Superhighway, which would fast track trade between the three nations. There is additional concern that the NAU would open up the border causing security risks and free movement for immigrants.



Kansas City and the Smart Port are seen as the hub of the North American Union

Universal Service Program: Statements made by President Elect Obama and his chief of staff have led extremists to fear the creation of a Civilian Defense Force. This theory requires all citizens between the age of 18 and 25 to be forced to attend three months of mandatory training.

Radio Frequency Identification (RFID): There is a fear that the government will enforce mass RFID human implantations. This process would make it possible for the government to continually know the locations of all citizens.



RFID Chip

Militia Trends:

Ideologies

Members of the militia movement often subscribe to the ideology of other right-wing extremist movements such as:

Christian Identity: Religious ideology popular in extreme right-wing circles. Adherents believe that whites of European descent can be traced back to the "Lost Tribes of Israel." Many consider Jews to be the satanic offspring of Eve and the Serpent, while non-whites are "mud people" created before Adam and Eve.

White Nationalist: Many white supremacists, National Socialists "Neo-Nazi", and skinheads are drawn to the movement and its anti government, Semitic, and anti-immigration rhetoric.

Sovereign Citizen: Individuals that see themselves as Sovereign Citizens question the legitimacy of the federal government. They argue that the government has gotten away from the intent of the Constitution and is thus not valid. These groups are

strong states rights advocates, but see the County Sheriff as the highest position of authority. These groups and individuals are well known for failure to register vehicles and driving without valid licenses. Sovereign Citizens have been known to issue their own license plates and drivers licenses and to issues summons to appear in "Common Law" courts.

Militant Abortion: Anti Abortionists have been known to take up arms in support of their beliefs. Eric Rudolph who was responsible for the Atlanta Olympic Park Bombing and abortion clinics was an anti abortionist.

Tax Resistors: This movement is strongly in opposition to the collection of federal income taxes. Individuals in this movement generally believe that income taxes are invalid or the tax laws do not apply to them.

Anti- Immigration: Some militia organizations have been formed solely for the purpose of countering the threat of illegal immigration. Extremists will argue that immigrants are taking the jobs of U.S. Citizens during times of high unemployment. Additionally, illegal immigrants are seen as sucking up government resources without paying taxes. Some militia units patrol the border in order to safeguard against drug smugglers, gangs, or violent immigrants.

Training

Utilization of MILSIM: Militia members have been attending Military Simulation (MILSIM) events in order to increase their combat readiness. MILSIM is a realistic combat sport in which two forces, some times up to the platoon level, utilize paintball, Airsoft, or MILES gear to conduct realistic war games. The desire to increase the realism of the MILSIM has drawn members to seek and conduct military leadership, planning, communications, navigations, and tactics training.

Militia and Survival Training events: Regional training events are being held with the intent of teaching individuals how to establish militia organizations. These events usually focus on individual soldier skills, land navigation, and marksmanship. Some events have been set up in order to prepare for joint operations between militia organizations.

Communications: The use of short wave rave radios for communication and broadcasts is common among most militia groups. These groups communicate through forums, yahoo groups, blogs, and social networking sites. Websites and online talk shows have been established to push rhetoric, usually a skewed version of current events.

Recruitment: Militias are recruiting members and supporters through the following means: gun shows, online forums, websites, social networking sites, and informal social networks. Additionally, militia recruitment may be done at events or meetings held by organizations that share ideologies with the militia.

Organization

Public Groups These organizations hold training events that are open to the public and generally recruit publicly. These groups desire to aid the County Sheriff or Governor in emergencies such as a natural disaster. It is not uncommon for these groups to be seen in public doing community service related work. Public groups are less likely to publicly push malicious rhetoric, and have a traditional military style chain of command and leadership structure. These groups have been known to form underground units and provide training and guidance to new or forming organizations.

Underground Groups These groups primarily adhere to the principles of Louis Beam's philosophy of leaderless resistance. This philosophy advocates small autonomous cells driven by ideology rather than by the direction of leaders. These groups are difficult to gather intelligence on, as no one outside of the cell would be aware of the organization or its plans. Individuals or "lone wolves" have also been known to adhere to the principles of leaderless resistance in order to perform or plot acts of violence.

Committees of Safety (CoS) Organization established to lobby government officials and confront corruption. These groups claim to be a voice of the people and usually control or associate with militia organizations in their region. These organizations are targeted at the county level but are also forming state and national level organizations.

Covenant Militia Communities Community of militia members that attempt to create a sovereign township. In the 1990's there were an estimated eight of these communities identified across the country.

Militia Associations These organizations attempt to network various militias through the Internet, meetings, or events. Groups such as the American Constitutional Militia Network (ACMN) and the Rogue Nations Eternal Militia (RNEM) are active online communications sites for militia members and organizations.

Missouri Militia members during a Field Training Event (FTX)

Implications for Law Enforcement

There are significant differences between the 1990's era militias and those of today, most notably:

Highly Trained: Militia members are receiving more professionalized training then they did during the first spike of the movement in the 1990's.

Leadership training: Militia members are receiving advanced leadership and operational planning training. This has allowed for the establishment of a strong Non Commissioned Officer Corps (NCO) within groups. An NCO Corps allows operations to be run at the fire team and squad size. This enables units to conduct multiple operations simultaneously; "Complex attacks". This training will also enable individuals to form and train their own organizations.

You are the Enemy: The militia subscribes to an anti-government and NWO mindset, which creates a threat to law enforcement officers. They view the military, National Guard, and law enforcement as a force that will confiscate their firearms and place them in FEMA concentration camps.

Implications for Missouri

Infrastructure at risk in Missouri:

Detention Centers: Rightwing extremists believe that there are at least three FEMA concentration camps in the state of Missouri:

- The Former Richards-Gebaur AFB in Grandview, MO
- Ft. Leonard Wood, MO
- Camp Crowder in Neosho, MO

North American Union (NAU): The Kansas City "Smart Port" which is a hub for fast tracked trade and distribution between the U.S. and Mexico is seen as the Hub of the North American Union. A shipping and distribution center is under way in the former Richard-Gebaur AFB in Grandview, MO. This facility is seen as both a FEMA concentration center and a facility for the NAU.

Federal Reserve Banks: Members of the militia movement are strongly against the FRS and see it as a mechanism of the elitist New World Order. In November End the FED protests were held nationwide at Federal Reserve Banks in opposition to the FRS. Many right-wing extremists oppose the FRS and propose a system that would be backed by gold. Federal Reserve banks may also draw attention from anti bail out protestors and activists.

National Guard Facilities: National Guard armories and facilities are seen as potential staging areas for NWO troops. Additionally, there are fears that the National Guard will be forced to confiscate weapons and enforce marshal law. Some individuals in the movement have argued that National Guard soldiers and units have had their weapons confiscated, have been transformed into no combat units such as supply, transportation, or medical elements, or are being deployed overseas in order to weaken the defense of the State against the NWO.

Federal Buildings or facilities: Within the movement there is a distrust and anger towards the federal government primarily towards the IRS, ATF, FBI, FEMA.

Common Militia Symbols:

Political and Anti-Government Rhetoric:

Political Paraphernalia: Militia members most commonly associate with 3rd party political groups. It is not uncommon for militia members to display Constitutional Party, Campaign for Liberty, or Libertarian material. These members are usually supporters of former Presidential Candidate: Ron Paul, Chuck Baldwin, and Bob Barr.

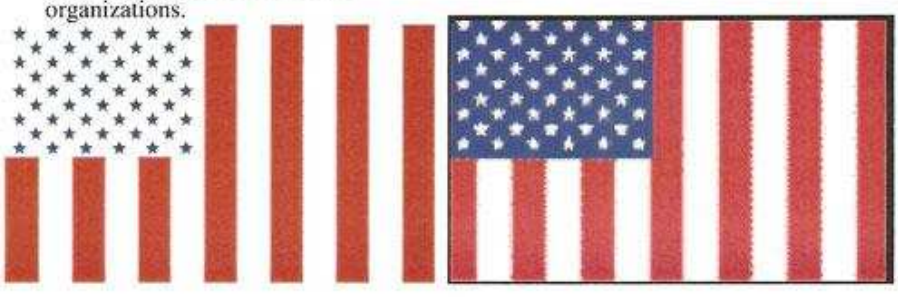
Anti-Government Propaganda: Militia members commonly display picture, cartoons, bumper stickers that contain anti-government rhetoric. Most of this material will depict the FRS, IRS, FBI, ATF, CIA, UN, Law Enforcement, and "The New World Order" in a derogatory manor. Additionally, Racial, anti-immigration, and anti-abortion, material may be displayed by militia members.

Militia Symbols:

Gadsden Flag: created by General Christopher Gadsden and utilized in colonial America. This is the most common symbol displayed by militia members and organizations.

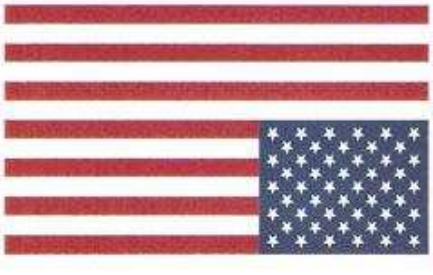
Hutaree Militia: Patch of a popular Michigan based militia that has a presence and influence in many states.

1st BN/3rd BDE MO Militia patch: Unit patch displayed by Missouri Militia Members.



Sovereign Citizen: Flags usually displayed by Sovereign citizens in order to represent sovereign "common law" jurisdiction.

Molon Labe: Greek phrase that translates to "Come and take them!" or " Over my dead body", phrase originated during the Spartan and Persian battle at Thermopylae and was recently made popular by the movie 300.

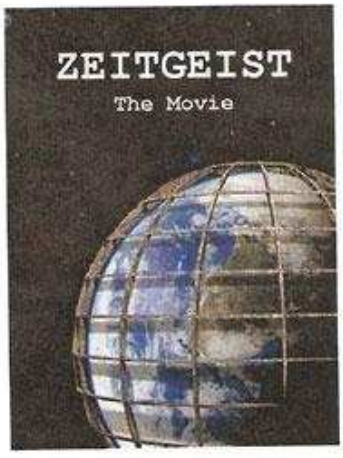


Upside down US Flag: The militia uses this as a symbol of a nation in distress.

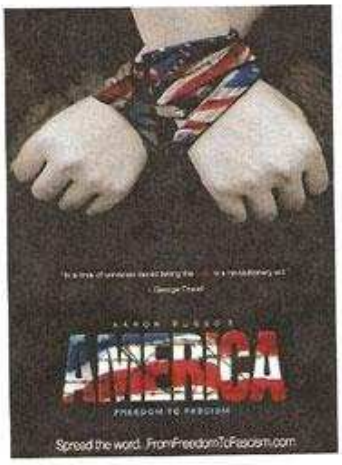
Nine Stripes of the Sons of Liberty: Sons of Liberty was a secret society of patriots during the American Revolutionary war. Many militia members claim the Sons of Liberty as part of their heritage.

First Navy Jack: Continental Navy flag, which is also, displayed with a stretched out rattlesnake and the inscription "Don't Tread on Me".

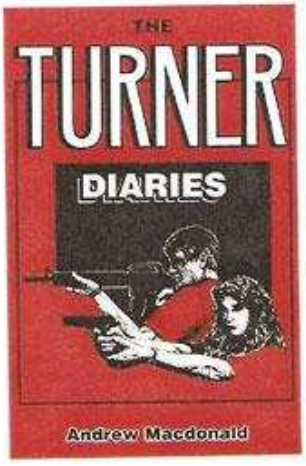
Literature and Media Common to the Militia:



Zeitgeist the Movie: Anti Federal Reserve System film.



America: Freedom to Fascism: Anti-income tax film



The Turner Diaries: Novel that depicts the violent revolution of the United States Government and a war that leaves only a white population. This book was promoted by Timothy Mcveigh and said to be the motivation behind the Oklahoma City Bombing.

MIAC
STRATEGIC REPORT
11-28-2008
Anarchist Movement

This Strategic Report analyzes the Anarchist Movement and related Anarchist activities. The majority of this information is open source and can be located in many anarchy related websites. **RECIPIENTS ARE REMINDED THIS DOCUMENT IS A STRATEGIC REPORT; THE INFORMATION THEREIN SHOULD NOT SERVE AS THE BASIS FOR FURTHER INVESTIGATIVE ACTIVITY.**

History

The first known usage of the word Anarchy appears in the play "Seven Against Thebes" by Aeschylus dated at 467 BC. The heroine, Antigone openly refuses to abide by the rulers' decree to leave her brother Polyneices' body unburied, as punishment for his participation in the attack on Thebes. In this context, anarchy is referenced as a refusal to abide by government decree.

According to Harold Barclay (a professor in anthropology and notable writer in anarchist theory), long before anarchism emerged as a distinct perspective, human beings lived for thousands of years in societies without government. It was only after the rise of hierarchical societies that anarchist ideas were formulated as a critical response to and rejection of coercive political institutions and hierarchical social relationships.

Thomas Jefferson spoke of his respect for a society with no government. "The basis of our governments being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers or newspapers without a government, I should not hesitate a moment to prefer the latter. But I should mean that every man should receive those papers and be capable of reading them. I am convinced that those societies (as the Indians), which live without government, enjoy in their general mass an infinitely greater degree of happiness than those who live under the European governments.

Anarchists played a role in many of the labor movements, uprisings, and revolutions of the late 19th and early 20th centuries, including the Russian Revolution (1917). In the United States, many new immigrants were anarchists; an especially notable group was the large number of Jewish immigrants who had left Russia and Eastern Europe during the late 19th and early 20th centuries. These groups were disrupted by the Red Scare of 1919. A period in which there existed strong anti-communist feelings in the US.

On 16 September 1920, at about noon time, in New York City, New York, a timed improvised explosive device (IED) exploded in the back of a horse drawn wagon at the corner of Wall Street and Broad Street in front of the J.P. Morgan building and Assay Office, killing between 38 and 40 civilians, injuring between 300 and 400 others, and causing extensive damage to several nearby vehicles and buildings. The American Anarchist Fighters claimed responsibility, but no arrests were ever made.

A surge of popular interest in anarchism occurred during the 1960s and 1970s. In the UK this was associated with the punk rock movement; the band Crass is celebrated for its anarchist and pacifist ideas; of note is also the Sex Pistols' hit "Anarchy in the UK" In Denmark, the Freetown Christiania was created in downtown Copenhagen. The housing and employment crisis in most of Western Europe led to the formation of communes and squatter movements like the one still thriving in Barcelona, Spain.

Anarchist Ideology

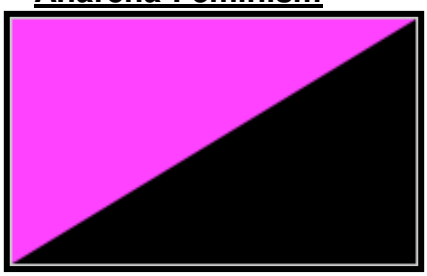
There are many different ideologies that an anarchist may follow. Although there may be a number of differences, they all contain the same central belief. Anarchism is the idea that government (the state) is unnecessary and harmful. Anarchy is society without government. Anarchists are people who desire to live in a society without rulers as their ancestors once did. The main belief is that the community in which they live be dependant only upon itself. People who believe in government (such as liberals, conservatives, socialists and fascists) are known as "statists". Anarchism opposes all forms of hierarchical control.

The terms “anarchism” and “anarchy” are often confused in their meaning. When most people think Anarchist, they think of the chaotic Molotov cocktail throwing teenager (which grew out of the **Anarcho-Punk** persona) or ALF/ELF members (Animal Liberation Front and Earth Liberation Front - **Eco-Anarchism**, **Green Anarchism**, or **Anarcho-Primitivism** ideologies). Although there are a few direct action radical sub-groups not all believe in violence.

Anarcha-Masculinism

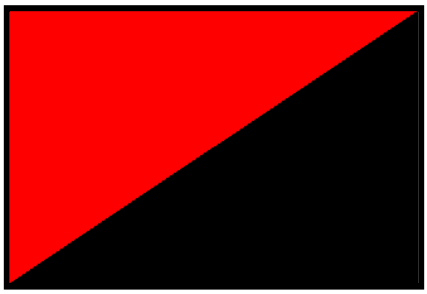
Anarcha-Masculinism is a set of social philosophies that focus on the rights and experiences of men. Masculinism is sometimes confused with patriarchy (structuring of society on the basis of family units where fathers have primary responsibility for the welfare of, hence authority over, their families) while its main goal is to compliment male feminism and to provide a way to show inequalities present in today’s system. Some of their campaigns include: draft resistance (in the majority of countries males are drafted instead of females), breaking the taboo around male adult virginity, acceptance of sensitivity of males (in many cultures it is assumed that “men don’t cry”), and more equally shared parental responsibility with children i.e. paternal leave.

Anarcha-Feminism



Radical feminism supports the belief that patriarchy is a fundamental problem in our society. Feminist Anarchism, or **Anarcha-Feminism** a term created during second-wave feminism, views patriarchy as the first manifestation of hierarchy in human history; thus, the first form of oppression occurred in the dominance of male over female. Anarchist feminism appears in individualist and collectivist forms, with individualist forms having most adherents in the United States, while in Europe anarchist feminism has had more emphasis on collectivism. Symbol is a pink (feminism) and black (anarchist) flag.

Anarcho-Communism



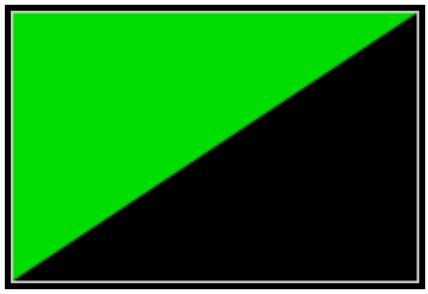
Anarcho-Communism, or **Libertarian Communism**, is a political ideology related to Libertarian socialism. Anarcho-communism stresses the abolition of money and the introduction of the gift economy (an economic system in which goods or services are given, rather than traded) to facilitate the exchange of goods.

In Anarcho-Communism, profit no longer exists. Goods are given away as gifts in the faith that others will also give products back (in an industrial setting, this would occur between worker syndicates as well as between individuals). If one syndicate does not share their products, they will not receive resources from other syndicates, making it in their best interest to share. Anarcho-Communism also advocates the abolition of work in the sense of wage slavery, and recommends worker self-management to improve working conditions, increase efficiency, and make working enjoyable. Symbol is a red (communist) and black (anarchist) flag.

Anarcho-Syndicalism

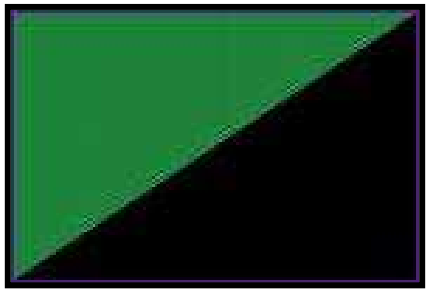
Anarcho-Syndicalism is the Anarchist wing of the labor union movement. Its primary aim is the end of the wage system. Their basic principals are workers’ solidarity, direct action, and self-management. Anarcho-syndicalists believe that only direct action—that is, action concentrated on directly attaining a goal, as opposed to indirect action, like electing a representative to a government—will allow workers to liberate themselves. The Industrial Workers of the World, a once-powerful, still active, and again growing labor union, is considered a leading part of the anarcho-syndicalist philosophy in the United States.

Anarcho-Primitivism



Anarcho-primitivism is an anarchist critique of the origins and progress of civilization. Primitivists argue that the shift from hunter-gatherer to agricultural subsistence gave rise to social stratification, coercion, and alienation. They advocate a return to non-"civilized" ways of life through deindustrialization, abolition of division of labor or specialization, and abandonment of technology. There are, however, numerous other non-anarchist forms of pri-primitivism, and not all Primitivists point to the same phenomenon as the source of modern, civilized problems. Anarcho-Primitivists are often distinguished by their focus on the process of achieving an untamed state through "rewilding". Rewilding is about “overcoming” human domestication and returning to the innate wildness. Though often associated with primitive skills and learning knowledge about wild plants and animals, it emphasizes primal living as a holistic reality. Rewilding is most associated with Green Anarchy and anarcho-primitivism. Symbol is a lighter green over black flag.

Green Anarchism



Green Anarchism puts an emphasis on environmental issues. Some green anarchists can be described as Anarcho-Primitivists and sometimes Anti-Civilization Anarchists, though not all Green Anarchists are Primitivists.

Many Green Anarchists choose to focus not on philosophical issues for a future society, but on the defense of the earth and social revolution in the present. Resisting systems in the present, and creating alternative, sustainable ways of living are often deemed more important than frivolous protesting.

Most Green Anarchists hold their ideals passionately and some engage in direct action. Organizing themselves through groups like Earth First!, Root Force, or more drastically, the Earth Liberation Front (ELF), Earth Liberation Army (ELA) and Animal Liberation Front (ALF). They may take direct action against what they see as systems of oppression, such as the logging industry, the meat and dairy industries, animal testing laboratories, genetic engineering facilities and, more rarely, government institutions.

Such actions are normally, though not always, non-violent. Though not necessarily Green anarchists, activists have used the names Animal Rights Militia, Justice Department and Revolutionary Cells among others, to claim responsibility for openly violent attacks. Symbol is a darker green over black flag.

Eco-Anarchism

Eco-Anarchism combines older trends of primitivism, bioregional democracy, feminism (as eco-feminism), pacifism, secession, and intentional community. It is the dedication to these ideals that distinguish it from the more general Green anarchism, which sees a continuing role for global institutions and global definitions of fairness and safety. In general, eco-anarchists reject the common notion of humanity as a whole and human dignity in particular. What differentiates the eco-anarchist from the primitivist is this focus on the village and its social capital, as opposed to technology and its acceptance or rejection. Eco-Anarchism is largely a North American movement.

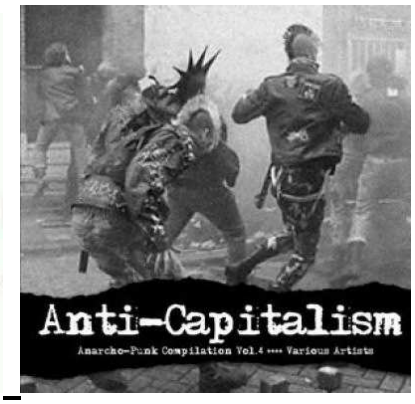
Christian Anarchism

Christian Anarchism is the belief that there is only one source of authority to which Christians are ultimately answerable, the authority of God as embodied in the teachings of Jesus. Christian Anarchists feel that “earthly” authority such as government, or the established church do not and should not have power over them. Christian Anarchists are pacifists and oppose the use of all physical force, both proactive and reactive. Christian anarchists have opposed war and other “Statist” aggression through nonviolent tax resistance. Many Christian Anarchists were vegetarian or vegan.

Associated Concepts

Anarcho-Punk

Anarcho-punk is a faction of the punk subculture that consists of bands, groups and individuals promoting anarchist politics. Although not all punks support anarchism, the ideology has played a significant role in the punk subculture, and punk has had a significant influence on the expression of contemporary anarchism.



Anarcho-Punk involves the cooperation of various forms of anarchism. Some Anarcho-Punks are Anarcha-Feminists, while others are Anarcho-Syndicalists. The Anarcho-Punk band “Psalters” has an affiliation with Christian Anarchism. CrimethInc. (a decentralized Anarchist collective composed of autonomous cells who also publish a number of magazines/books) is strongly connected to the Anarcho-Punk movement. Many Anarcho-Punks are supporters of issues such as animal rights, racial equality, anti-heterosexism, feminism, environmentalism, worker's autonomy, the anti-war movement, and the anti-globalization movement.

Some anarcho-punks are “straight edge”, claiming that alcohol, tobacco, drugs and promiscuity are instruments of oppression and are self-destructive because they cloud the mind and wear down a person's resistance to other types of oppression. Some crust punks also condemn the waste of land, water and resources necessary to grow crops to make alcohol, tobacco and drugs, forfeiting the potential to grow and manufacture food. Some may be straight edge for religious reasons, such as in the case of Christian, Muslim, Buddhist, or Hare Krishna anarcho-punks.

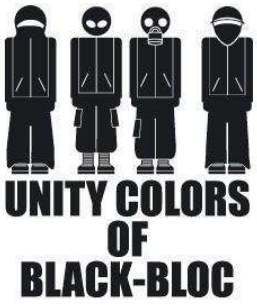
Anarcho-punks universally believe in direct action, although the way in which this manifests itself varies greatly. Despite their differences in strategy, anarcho-punks often co-operate with each other. Many anarcho-punks are pacifists and therefore believe in using non-violent means of achieving their aims. These include peaceful protest, refusal to work, squatting, economic sabotage, dumpster diving, graffiti, culture jamming, ecotage, freeganism, boycotting, civil disobedience, hacktivism and subvertising. Some anarcho-punks believe that violence or property damage is an acceptable way of achieving social change. This manifests itself as rioting, vandalism, wire cutting, assault, hunt sabotage, participation in Animal Liberation Front- or Earth Liberation Front-style activities, and in extreme cases, bombings. Many anarchists dispute the applicability of the term "violence" to describe destruction of property.

Anti-Racist Action

Anti-Racist Action Network (ARA) is a decentralized network of anti-fascist and Anti-Racist Activists. ARA activists organize actions to disrupt neo-nazi and white supremacist groups and help to organize resistance mainly to fascist and racist ideologies. ARA groups also oppose sexism, homophobia, heterosexism, anti-semitism, and anti-abortion activists. They are sometimes seen to be "Red" or Communist, particularly by detractors, however; the network includes a large number of anarchists.

ARA started in Minneapolis, Minnesota in 1987. Since then it has expanded to different communities, countries and continents. Members of Love and Rage, a revolutionary anarchist organization played a major role in building ARA groups and the ARA Network in the 1990s. They are sometimes associated with the Skinhead and Punk subcultures and work with organizations such as Skinheads Against Racial Prejudice (SHARP).

Black Bloc



A **black bloc** is an affinity group of individuals that come together during some sort of protest, demonstration, or event involving class struggle, anti-capitalism, or anti-globalization, and wear all black (we saw a number of them in both the RNC and DNC 2008 protests recently). Black clothing and masks are used to make the bloc appear to be one large mass, promote solidarity, create a clear revolutionary presence (usually associated with anarchism, sometimes also with communism), and also to avoid being identified by authorities. There is a mistaken belief, especially among the mainstream news media, that the "Black Bloc" is an international organization of some kind, when in fact it is nothing more than a tactic used by a subset of demonstrators. There may be several black blocs within a particular protest, with different aims and tactics. As an ad hoc group, they share no universally common set of principals or beliefs; however, black blocs that have formed in the past have been made up largely of anarchists, but can include many other anti-capitalist groups. Like all affinity groups, they are based on common trust between those involved, and usually share a common goal such as blocking delegates from entering a trade meeting, and a mutual understanding of shared tactics.

Copwatch

Copwatch is a network of United States volunteer organizations that "police the police". Copwatch groups usually engage in monitoring of the police, videotaping police activity, educating the public about police misconduct, and advocating for more accountable law enforcement practices.

The main function of most Copwatch groups is monitoring police activity. "Copwatchers" go out on foot or driving patrols in their communities and videotape interactions between the police and civilians. Some groups also patrol at protests and demonstrations to ensure that the rights of protesters are not violated by police officers. Copwatch organizations generally abide by a policy of non-interventions with the police, although this may not be true for all groups. The anarchist ran Infoshop News published the new “Copwatch 101” booklet found at the following address http://news.infoshop.org/article.php?story=04/04/06/6676838.

Closing

The MIAC is aware of a number of anarchist networks within Missouri. With their past clashes with the white supremacist movements in our area, we believed it to be important for all Law Enforcement officers to be aware of the many ideologies and splinter groups that are present within the anarchist movement. Although they have not all been listed, we believe the groups discussed pose a significant domestic terrorist treat at this time.

Although it is important to know the ideologies and motives for these groups, it is essential to realize that most anarchists operate either as lone wolves, in small cells (3-4 members), or can, at times, rally as anonymous mobs. Identification and interrogations can be difficult because most, if not all, members who participate in direct action are well aware of their rights and are informed not to speak to officers when questioned.

MIAC always welcomes comments on these intelligence products, and encourages all Law Enforcement agencies to submit suggestions for future MIAC strategic intelligence. Suggestions and/or comments may be sent to Criminal Analyst Andrew.Gaffke@mshp.dps.mo.gov or Deputy Director Greg.Hug@mshp.dps.mo.gov.

EXTERNAL INTELLIGENCE NOTE

Terrorism Explosive Device Analytical Center
17 November 2015

(U//LES) Suicide Vest and Belt Improvised Explosive Device Tactics in the Middle Eastern, African, and European Regions Show Minimal Signs of Tactic Migration

(U//LES) The FBI Terrorism Explosive Device Analytical Center (TEDAC) assesses the tactics used to construct suicide vest and belt improvised explosive devices (IEDs) in the Middle Eastern, African, and European regions likely (see Appendix A) have minimal correlation. Use of these tactics allows suicide bombers to discretely move to a desired target location and make real-time decisions to maximize lethality. The suicide belt design allows the wearer to conceal the device and blend in with their surrounding environment, as well as to position themselves in potentially crowded environments while not raising suspicion.[1] This assessment is made with medium confidence (see Appendix B), based upon reliable forensic exploitation and varying degrees of reliability with open source reporting. This external intelligence note is intended to increase the situational awareness of the bomb technician community about the use of suicide vest IEDs (SVIEDs).

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U) Source Summary Statement

(U//FOUO) Reporting in the external intelligence note was derived from open source reports, the Department of Defense (DoD), and from IED submissions to FBI TEDAC. The research timeframe for this report included incidents from 1 January 2013 through 16 November 2015.

(U) Middle East

(U//LES) The use of suicide belts and vests by terrorist groups in the Middle East, particularly Sunni Salafist jihadi extremists, is a common and effective tactic for causing death and destruction. Common explosive fills of suicide belts and vests observed in the region include triacetone triperoxide (TATP), trinitrotoluene (TNT), Semtex, C4, Research Development Formula X (RDX), and pentaerythritol tetranitrate (PETN). Terrorist groups, including the Islamic State of Iraq and the Levant (ISIL), al-Qa'ida in the Arabian Peninsula (AQAP), and

Tehrik-e Taliban Pakistan, are known to use the previously listed explosives in their constructed IEDs.[2, 3, 4]

(U) A strategic study conducted by the Institute of National Security Studies (INSS) of suicide bombings in 2014 across the Middle East region showed an increase in the number of suicide attacks from 2013. Approximately 370 attacks occurred, with approximately 2,750 victims, compared to 163 attacks in 2013, with approximately 1,950 victims. A significant increase was evident in Iraq (271 in 2014 versus 98 in 2013), Yemen (29 versus 10), Lebanon (13 versus 3), and Libya (11 versus 1). The number of suicide bombing attacks carried out in Syria (41) remained the same. In Egypt there were four suicide attacks compared with six the previous year.[5]

- (U) An interview conducted by the German magazine, *SPIEGEL,* in July 2015 with captured ISIL leader Abu Abdullah provided insight into the group's selection of targets and acquisition of explosive material for suicide bombings. According to Abdullah, ISIL selected target locations to hit as many people as possible, especially police officers, soldiers, and Shiites. These locations were limited to Shiite police checkpoints, markets, and mosques.[6]

- (U) According to the interview, ISIL used C4 plastic explosives and explosive fill removed from artillery shells for car bombs. Abdullah drilled open the shells of anti-aircraft guns to construct suicide belts because he believed the effect of the powder was more intense. The belts and vests were then constructed in different sizes. Each device was a custom fit, based on each bomber's measurements.[7]

- (U) Forty-four civilians were killed in two suicide bombings conducted by ISIL in Beirut, Lebanon, in November 2015. The bombings took place in a busy residential and commercial area identified as a predominantly Shiite neighborhood and the stronghold of Hizballah. According to media reports, the bombers used suicide belts similar to a belt recovered by the Lebanese Army (see Figure 2). ISIL targeted the Hizballah stronghold in Lebanon because of

(U) *Source:* Open source reporting.

its involvement in the war against ISIL in neighboring Syria. A hospital was the original target, but heavy security presence in the area forced the group to change the target to a densely populated area.[8, 9]

- (U) According to open source reporting, similar suicide belt construction techniques have also been observed in Yemen. A suicide bomber with ties to AQAP was shot and killed in July 2015 by Houthi forces in Sana'a, Yemen, before successfully detonating the IED. The device (see Figure 3) featured dual grenade-pin detonators, a main charge wrapped with sheets of ball bearings, and detonation cord that was placed inside a pouch around the bomber's waist. The conflict between Iranian-backed Shiite Houthi rebels and Sunni extremist group AQAP has seen an increased level of attacks using explosives and devices such as the suicide belt.[10]

- (U) On 30 May 2015, Israeli forces stopped a Palestinian wearing an explosive belt. According to open source reporting, the belt consisted of 12 pipe bombs connected with wires (See Figure 4).[11]

- (U) According to open source reporting, Hamas security officers located a cache of suicide belts in the Gaza Strip in June 2015. The devices consisted of unknown explosives and unknown initiators, enhanced with ball bearings for shrapnel effect (See Figure 5).[12]

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) Figure 5: SVIED recovered in the Gaza Strip, June 2015

(U) *Source:* Open source reporting.

(U) Europe

(U//LES) Known suicide vest and belt IED incidents in the European region from 2013 to 2015 are assessed to have occurred sporadically and have been primarily concentrated in Russia, and Turkey. Explosives known to be used in this area include TNT and C4. The following are examples of the type of SVIED located in the region.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO Figure 6: Part of Russian cache discovered by Russian officials in October 2013.

(U) *Source:* Open source reporting.

- (U) In October 2013 Russian officials located a large cache of suicide belts and IEDs, according to open source reporting. Although officials did not specify the type of explosive found in this cache, other IED incidents in this region involved the use of TNT (see Figure 6).[13]

- (U) In October 2014 Turkish officials confiscated 150 kg of C4 and 20 explosive belts, according to open source reporting.[14]

- (U) A suspected suicide bomber detonated unknown explosives during a rally in Suruc, Turkey, killing approximately 30, according to open source reporting.[15]

- (U) According to open source reporting, two suspected suicide bombers detonated unknown explosives at a train station in Ankara, Turkey, killing at least 95.[16]

(U) Africa

(U//LES) The suicide vests and belts observed in Africa from 2013 to 2015 featured the use of rocker switches and military-grade fuses. Common explosives include RDX, Ammonium Nitrate, and Urea Nitrate. Incidents were noted in northern and western Africa.

- (U//FOUO) Suicide vest and belts located on the Tunisian and Libyan border included custom dual-tone multi frequency (DTMF) devices, according to FBI reporting (See Figure 7).[17]

- (U//FOUO) In December 2014 authorities recovered an improvised explosive belt in Nigeria, which contained seven projectile cartridge cases filled with RDX, laced

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U) *Source:* Open source reporting.

with green-colored detonating cord, and connected to commercial electric detonators. The device connected to a power source and rocker switch for initiation, according to FBI reporting (See Figure 8).[18]

- (U//FOUO) From February through July 2015, authorities in Cameroon and Niger recovered improvised explosive belts armed with a rocker switch and GR-66 EG French submunitions, according to DoD reporting (See Figure 9).[19]

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) Figure 8: Suicide Belt recovered in Nigeria, Dec 2014

(U) *Source:* Open source reporting.

(U//FOUO Figure 9: Suicide Belt recovered in Cameroon, July 2015

(U) *Source:* Open source reporting.

(U) Perspective

(U//LES) The variations observed in this broad comparison of suicide vest and belt IEDs across these three regions do not indicate a clear IED tactic migration, but may indicate tactic or construction influences. TEDAC generally assumes the similarities between suicide vests and belts from different regions likely indicate common training or common IED facilitators. These similarities include, but are not limited to, overall IED construction, wiring techniques, common explosives, initiators, switches, electronic diagrams, enhancements, and employment. The types of suicide vests and belt IEDs observed in each region within this report differ broadly in many characteristics, resulting in an inconclusive determination that the suicide vest and belt IEDs prevalent in any one area translate to tactic migration.

(U) Analysis of Alternatives

(U//LES) Alternatively, similarities in IED devices generally, across different regions, may be a product of independent open source research, thus resulting in a false link between devices and subjects.

(U) Outlook

(U//LES) FBI TEDAC assesses it is likely the suicide vest and belt IED tactics observed in Europe, Africa, and the Middle East are likely influenced by individuals who effectively employ these devices. This assessment is made with medium confidence, based on open source, DoD, and FBI reporting. These similarities are likely to be effected by multiple factors, including available materials, training, and local or national counter-IED policies and investigations. FBI TEDAC assesses forensic and technical exploitation of suicide vest and belts will provide the greatest opportunity to identifying key components for device attribution and overall strategic analysis of migration tactics.

(U) Intelligence Requirements

(U//FOUO) This EIN addresses the FBI National Standing Collection Requirements WW-TERR-LD-SR-0207-14.

(U) This external intelligence note was prepared by the FBI TEDAC. Comments and queries may be addressed to the FBI TEDAC Unit Chief by calling (703) 632-8184.

(U) Appendix A: Expressions of Likelihood (or Probability)

(U) Phrases such as "the FBI judges" and "the FBI assesses," and terms such as "likely" and "probably" convey analytical judgments and assessments. The chart approximates how expressions of likelihood and probability correlate with percentages of chance.

UNCLASSIFIED

Terms of Likelihood	**Almost No Chance**	**Very Unlikely**	**Unlikely**	**Roughly Even Chance**	**Likely**	**Very Likely**	**Almost Certain(ly)**
Terms of Probability	**Remote**	**Highly Improbable**	**Improbable (Improbably)**	**Roughly Even Odds**	**Probable (Probably)**	**Highly Probable**	**Nearly Certain**
	1-5%	**5-20%**	**20-45%**	**45-55%**	**55-80%**	**80-95%**	**95-99%**

(U) Unless otherwise stated, the FBI does not derive judgments via statistical analysis.

(U) Appendix B: Confidence in Sources Supporting Assessments and Judgments

(U) Confidence levels reflect the quality and quantity of the source information supporting judgment. Consequently, the FBI ascribes high, medium, or low levels of confidence to assessments, as follows:

(U) **High confidence** generally indicates the FBI's judgments are based on high-quality information, from multiple sources. High confidence in a judgment does not imply the assessment is a fact or a certainty; such judgments might be wrong. While additional reporting and information sources may change analytical judgments, such changes are most likely to be refinements and not substantial in nature.

(U) **Medium confidence** generally means the information is credibly sourced and plausible but not of sufficient quality or corroborated sufficiently to warrant a higher level of confidence. Additional reporting or information sources have the potential to increase the FBI's confidence levels or substantively change analytical judgments.

(U) **Low confidence** generally means the information's credibility or plausibility is uncertain, the information is too fragmented or poorly corroborated to make solid analytic inferences, or the reliability of the sources is questionable. Absent additional reporting or information sources, analytical judgments should be considered preliminary in nature.
