

Dear Goats,

There's an absolute mountain of links and information at each of these links and references. There's WAY more here than what it looks like. It's been a great ride and thanks for all the heavy lifting you've all done!

Merry Christmas and long live the revolution!

-WonderBoy.

Last call to board the Voat Lifeboat Discord server. About 50 goats there

now. (whatever)

submitted 14 hours ago by [TurdLord5000](#)

Discord server invite key: ZGGUnTa8Qv

You may especially want to join if you're not headed to Poal. This is so far serving as a just-in-case backup to keep in touch with other goats, and to discuss the different places everyone is headed.

It's been a wild ride guys, and I hope to still see many of you on the other side of December 25th.

 [26115639?](#) 7 points (+7|-0) 2 months ago

this is true. The NFL, Disney etc, all are willing to take massive losses to shift culture.

This is an old jewish practice. What they would do in Poland and other countries was make sure no gentile could compete with their businesses. If a gentile tried to open a store selling shoes, the Jews would sell below cost, taking losses to drive their competitor out of business. The entire Jewish community would shoulder those losses.

Same thing here. They'll take massive hits to change the culture.

21 QUESTIONS REGARDING THE HOLOCAUST

1) Why did Elie Wiesel and countless other Jews survive the Holocaust if it was the intention of the Third Reich to eliminate every Jew they got their hands on? Elie was a prisoner for several years; other Jews survived even longer. Most of these "survivors" were ordinary people who did not have any unique expertise that the Germans could have exploited for their war effort. There was no logical reason for them to be kept alive. The very existence of more than a million survivors even today, some sixty years later, contradicts one of the basic components of the Holocaust i.e. that the Germans had a policy to eliminate every Jew they got their hands on.

2) Why is there no mention of the Holocaust in Churchill's six volume History of the Second World War or the wartime memoirs of either De Gaulle or Eisenhower or any of the other lesser luminaries who wrote about the Second World War. Keep in mind all these were written years after the war ended and thus after the Holocaust had been allegedly proven by the Nuremberg Trials? With regard to the Holocaust, the silence of these "cognoscenti" is deafening!

3) What was an inmate infirmary (and a brothel) doing in Auschwitz if in fact it was a death camp?

4) Why would the Germans round up Jews from their far flung empire, thereby tying up large numbers of personnel and rolling stock, while fighting a world war on two fronts to deliver people to "death camps" hundreds of miles away who were then executed upon arrival - wouldn't a bullet on the spot have appealed to legendary German sense of efficiency?

5) Why after sixty years have historians been unable to come up with a single German document that points to a Holocaust? Should we believe the likes of Raul Hilberg that in the place of written orders there was an "incredible meeting of the minds" by the literally tens of thousands of people who would have had to coordinate their actions in order to carry out an undertaking of this magnitude.

6) How come it is still insisted upon that six million Jews were killed when the official Jewish death toll at Auschwitz, the flagship of the Holocaust gulag, has been reduced from an immediate post war figure of 4 million, to a figure of somewhat less than one million? Why do many respond to this observation by saying, "what's the difference whether it's six million or one million". The answer is that the difference is five million. Another difference is that saying so can get you three years in an Austrian jail...just ask David Irving!

7) All of Germany's wartime codes were compromised including the one used to send daily reports from Auschwitz to Berlin. The transcripts of these messages make no mention of mass executions or even remotely suggest a genocidal program in progress. Furthermore it has been insisted that the Germans used a kind of euphemistic code when discussing their extermination program of the Jews e.g. final solution, special treatment, resettlement, etc. Why was it necessary for them to use such coded euphemisms when talking to one another unless they thought their codes had been cracked by the Allies?

8) The water table at Auschwitz lies a mere 18 inches below the surface which makes claims of huge burning pits for the disposal of tens of thousands of victims untenable.

9) Initially claims were made that mass executions in homicidal gas chambers had taken place in camps located within the boundaries of the old Reich e.g. Dachau, Bergen-Belsen. "Evidence" to that effect was every bit as compelling as what was offered for other camps, located in occupied Poland, yet without explanation in the early sixties we were told that this was not the case and that all the "death camps" were located in the East i.e. Poland outside (some would say conveniently) of the probing eyes of western scholars.

10) No one has been able to reconcile the eyewitness accounts that personnel entered the gas chambers after twenty minutes without any protective gear and the fact that Zyklon B was a "time release" fumigant that would have had a lethal capability for at least another twenty-four hours. And that even after twenty-four hours the corpses would have themselves remained sufficiently contaminated by the hydrogen cyanide gas that they would have had the capacity to kill anyone who touched them who were not wearing protective gear.

11) Why do we no longer hear claims that the Germans manufactured soap, lampshades and riding britches from the bodies of dead Jews - could it be that in the light of modern forensics and DNA knowledge these claims are totally untenable?

12) Why do we no longer hear claims that huge numbers of Jews were exterminated in massive steam chambers or electrocuted on special grids - "evidence" of this was presented at Nuremberg - evidence that sent men to the gallows.

14) Elie Wiesel has been described as "the Apostle of Remembrance" yet in his memoir, "Night" which details his stay at Auschwitz he makes no mention of the now infamous homicidal gas chambers. Isn't this a bit like one of the Gospels making no mention of the Cross?

15) Virtually every survivor who was examined at Auschwitz says that he or she was examined by the infamous Dr. Mengele.

16) According to survivor testimony, hundreds of thousands of Jews were executed at Treblinka and then buried in mass graves in the surrounding area. Why is it that extensive sonar probing of these burial grounds reveals that this alleged final resting place for Holocaust victims has remained undisturbed since at least the last ice age?

17) "Proof" of the Holocaust rest primarily on survivor testimony; there is little, if any, hard evidence. The best of this has been described by Jean Claude Pressac as merely "criminal traces". Even Judge Grey who presided at the Irving-Lipstadt Trial commented that he was surprised the evidence pointing to the Holocaust was "extremely thin". To paraphrase Arthur Butz, "a crime of this magnitude would have left a mountain of evidence" - where is it? There was more hard evidence against OJ Simpson at his trial and he was FOUND INNOCENT!

18) Why has Holocaust Revisionism been criminalized in at least eleven countries - what other historic truth needs the threat of prison or the destruction of one's career to maintain itself. Should someone be sent to prison for expressing skepticism about the official Chinese claim that they suffered thirty-five million dead in World War II.

19) Why do the court historians insist that "denying the Holocaust" is like denying slavery or saying the earth is flat when it is nothing of the sort. The leading Revisionists are first rate scholars who hold advanced degrees from the world's leading universities. Is there anyone comparable among those who say the world is flat or that slavery never existed?

20) Promoters of the Holocaust have expressed concerns about the remembering the Holocaust once the last survivors die. Why haven't Civil War historians expressed similar concerns since the last survivor of that conflict died in 1959.

21) Survivors of the Holocaust have testified that smoke billowed from the crematoriums as they consumed the bodies of murdered victims - some eyewitnesses even claimed they could detect national origins by the color of the smoke. How can this be reconciled with the fact that properly operating crematoriums do not produce smoke of any color?

92 Billionaire Donors to the Democrat Party

62 Jewish Factors
67.4% of Donors

There have been plenty of resettlements of 'immigrants' from one nation back to where they belong in the last century. Don't allow them to think you can't solve the problem instantly. (whatever)

submitted 2 months ago by [romanstock](#)

Example, 1923: the forcible resettlement of approximately 1.5 million Greeks from Anatolia and East Thrace and of half a million Turks from all of Greece except for Western Thrace.

Or in 1947: 6.5 million Muslims moved from India to West Pakistan, and 4.7 million Hindus and Sikhs moved from West Pakistan to India.

It only takes ONE leader to move ALL of the immigrants, whether born here or not, back to their native racial nations and solve the problem within less than a year. Don't let them think we are fucked and can't ever solve it now that they've pushed so many of these invaders into our nations. They can all just as easily be sent back.

COVID-19
its so weird when people
think me not liking white
people is a joke :-/ i
genuinely do not like them
they have pretty much
singlehandedly ruined the

BLACK INVASION OF BRITAIN

THE INFLUX into Britain during the past ten years or so of people of unassimilable racial natures is a general consequence of the continued existence of an illogical and ill-conceived association of nations made up of citizens of totally dissimilar and unequal races.

Attracted to Britain by the promise of state welfare and the relative prosperity of the country, the coloured migrants represent the overspill populations of nations with minor exceptions no longer acknowledging allegiance to the British Crown. The immigrants are thus political as well as racial aliens.

During the past ten years or so many public protests have been made about the disruption and distress being caused by the massive invasion of England by Negroes and Mulattoes, East Indians and Pakistanis and Eurasians and other people of assorted races, but the Government of the day have maintained a pose of indifference (though 'anxiously watching the position'), believing apparently that Britain herself ought to become multi-racial in order to be at the hub of a multi-racial commonwealth.

Because of a social imbalance in Britain, most of the

51

immigrants have filled temporary gaps in the labour market in hospitals, factories and transportation, and because this meets the economic requirements of the moment the Government, not caring about the intrinsic quality of the English people or their future, saw no reason to alter the arrangements.

The natural pride in being Celtic, Anglo-Saxon, or English, Scots, Welsh or Irish was, in fact, finally forsworn by the Government when in a statement as long ago as 8th December, 1959, they formally rejected the 'idea of any inherent supremacy of one race over another', thus relegating Britons to the level of the Hot-tentots who are now decaying into extinction.

Every day reports appear in the press of crimes committed by immigrants, which have indeed become so frequent that some newspapers no longer mention the race or origin of birth of the culprit lest offence be given to coloured readers. But because of the neglect of the Government to maintain in any methodical way ethnographic records it is difficult to comment on the incidence over a long period of law-breaking under the heads of racial types. Sir Harold Scott, however, who was Police Commissioner from 1945 to 1953, says in his book, *Scotland Yard*, that 'Cypriots, Maltese and coloured British subjects are responsible for a disproportionately large part of the offences connected with gaming, living on the immoral earnings of prostitutes, and the sale of drugs and liquor'.

In a debate in the House of Commons on 3rd April, 1958, on the criminal consequences of indiscriminate immigration the Government admitted that 'certain racial

52

How many of America's last 9 presidential children who married, have married jews?

William Clinton Blythe III

Total Children (officially): 1 Married children: 1

Chelsea Clinton - (((Marc Mezvinsky)))

Chelsea Clinton, a woman so ugly that oral counts as anal married the jew Marc Mezvinsky. Marc Mezvinsky, who is a jew banker, is the nephew of the infamous jew George Soros.

Barbara Bush - (((Craig Coyne)))

Barbara Bush married the jew Craig Coyne. As is common with crypto-jews, the couple had a secluded jewish marriage ceremony first for only a few chosen ones, and then a more public atheist marriage ceremony for show a few months later.

(((Ashley Biden))) - (((Howard Krein)))

Ashley Biden, herself the daughter of Joseph Biden II and the Italian Jew Jill Tracey Jacobs (née Giocoppa) married the especially rat-faced Jew Howard Krein. When speaking about the pair Joseph Biden II has said: "I'm the only Irish Catholic you know who has his dream met because his daughter married a Jewish plastic surgeon."

A Jewish, anti-European scam. Currently, while American soldiers are kept busy fighting wars for the Jews overseas, their people back home are being ethnically replaced at lightning speed. Both low and high.

Absolutely ZERO men (White, black, Asian, Hispanic) look for black women on dating apps (here's the data). ZERO. (whatever)

Given that we aren't going to abolish the Senate...probably ever...it feels like the best investment wealthy liberals and the companies they run would be to move a few hundred thousand people into Wyoming, Montana, Utah, and Idaho.

@JHWeissmann

I mean, Trump beat Clinton by about 150,000 in Wyoming and 100,000 in Montana.

Creating opportunities for 300,000 professionals in these states should be totally doable.

Also, land is cheap out West. You can buy 6,000 acres for \$11 million outside Laramie, Wyoming, which is just a 2 hour drive from Denver (only a little further than NY to Philly).

Someone needs to endow a big lab of some kind at University of Wyoming. Seems like an easy start.
