Steam Powered Garden Railways

**PRODUCT SHEET**  
**ACCUCRAFT TRAINS**  
**Shay 13T Class A (1:20.3 scale)**

The 13-2 Class A straight boiler Shay locomotive was one of Lima's industrial success stories. Despite its small stature, the design was built for a wide variety of gauges. Today there is only one known survivor of this design of 13-2 Class A, as built for Queensland, Australia in 1908 and 1914. In 1948, the two much worn Shays were rebuilt into one viable locomotive to become known simply as 'Shay'. Shay was retired in 1960 and is now preserved at the Nambour Museum in Qld.

The model will be gauge adjustable for 32mm and 45mm and available as a Kit or RTR. Both straight and diamond stacks will be supplied. Liveries: Black, Green and Planished iron.

**Specifications**

|   |                                    |
|---|------------------------------------|
| Scale 1:20.3 Gauge 45 & 32mm adjustable | Butane fired                       |
