ENTITY TYPE: County
NAME: Philadelphia County (101)
ST: Pennsylvania (42)

Figure 1 consists of 16 subplots arranged in two rows of eight. Each subplot shows the distribution of the number of non-zero elements in the vector z for a specific value of n , ranging from 1 to 16. The x-axis for each subplot is labeled with the number of non-zero elements (0, 1, 2, ..., n). The y-axis represents the probability or frequency. The distributions are as follows:

- $n=1$: A single bar at 0.
- $n=2$: Two bars at 0 and 1.
- $n=3$: Three bars at 0, 1, and 2.
- $n=4$: Four bars at 0, 1, 2, and 3.
- $n=5$: Five bars at 0, 1, 2, 3, and 4.
- $n=6$: Six bars at 0, 1, 2, 3, 4, and 5.
- $n=7$: Seven bars at 0, 1, 2, 3, 4, 5, and 6.
- $n=8$: Eight bars at 0, 1, 2, 3, 4, 5, 6, and 7.
- $n=9$: Nine bars at 0, 1, 2, 3, 4, 5, 6, 7, and 8.
- $n=10$: Ten bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9.
- $n=11$: Eleven bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.
- $n=12$: Twelve bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11.
- $n=13$: Thirteen bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.
- $n=14$: Fourteen bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, and 13.
- $n=15$: Fifteen bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, and 14.
- $n=16$: Sixteen bars at 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15.
