KILL GUIDE

# No Lives Matter NLM

We are the children of fire, we are the opposition,  
of the chosen one, our one and only task is to  
kill the mundane in any dimension we get deployed.  
In this instance it's planet Earth

since we're here to sharpen our killing skills.

Let's get straight to the point

## JUST TERROR TACTICS

# TRUCK ATTACKS

### The Ideal Vehicle

Slightly Raised Chassis  
and Bumper

Fast  
in Speed  
or Rate of  
Acceleration

Double-Wheeled,  
Load-Bearing Truck

Large in Size  
Heavy in Weight

### How to Acquire a Vehicle

- 1 Buying
- 2 Renting
- 3 Taking from a Kafir by Force or Deception
- 4 "Borrowing" from a Kafir or Murtadd

1

2

3

4

### Ideal Targets

- 1 Large Outdoor Festivals, Conventions, Celebrations, and Parades
- 2 Pedestrian-Congested Streets (High/Main Streets)
- 3 Outdoor Markets
- 4 Outdoor Rallies

1

2

3

4

**PLACES TO STRIKE**

**A** The Neck    **B** The Chest    **C** The Stomach

The Windpipe    The Heart    The Liver  
 Carotid Artery    The Lungs    The Kidneys

**THE IDEAL KNIFE**

Strong Handle  
 Handguard  
 Fixed Blade  
 Strong & Sharp Blade

**KNIVES TO AVOID**

The Problematic Lockback System

**Kitchen Knife**    **Lockback Knife**

# KNIFE

## ATTACKS

### TARGETS

**LONE**  
Victim

For Prolonged Terror Campaign

**SMALL**  
Groups

For Shocking Terror (If One Is Capable)

**LARGE**  
Groups

Not Advised

# NO LIVES

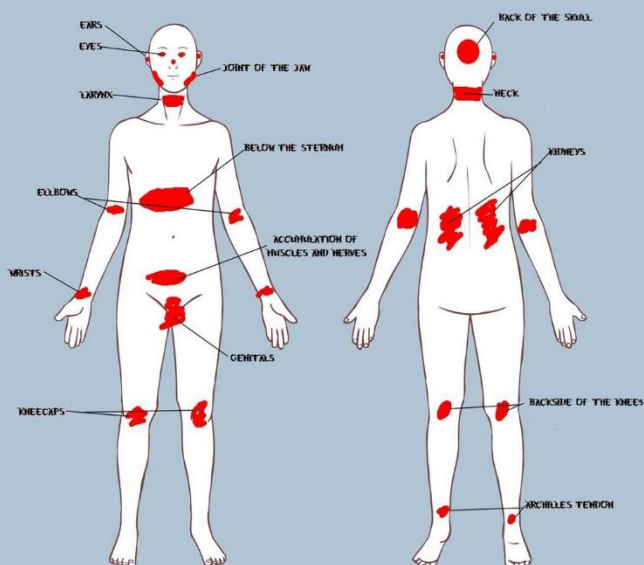

# MATTER

As seen on the previous page, it is recommended to use a fixed blade for example: Kitchen Knife, Survival knives any strong fixed blade. do not attempt a terror attack with a weak blade that bends, get something strong like a buck 119 used in the Scream movies or any kind of bowie/survival knife, if it has spikes on it that's a great bonus since it makes a cleaner cut and damages organs more

## Deadly spots of the human body

### WEAKPOINTS OF THE HUMAN BODY

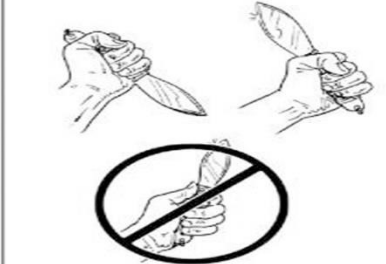

## No. 063: Win a Knife Fight

CONOP: Use a knife as a targeted and effective weapon of self-defense.

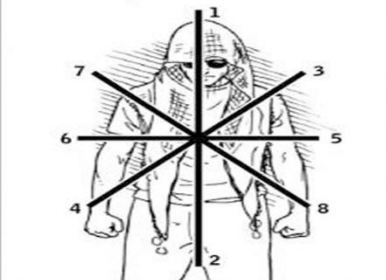

### COA 1: Guarding the Weapon

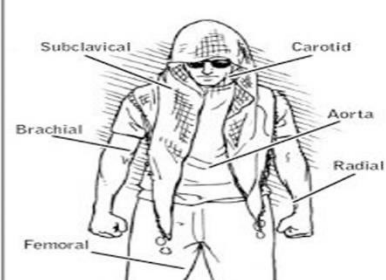

### COA 2: Proper Knife Grip

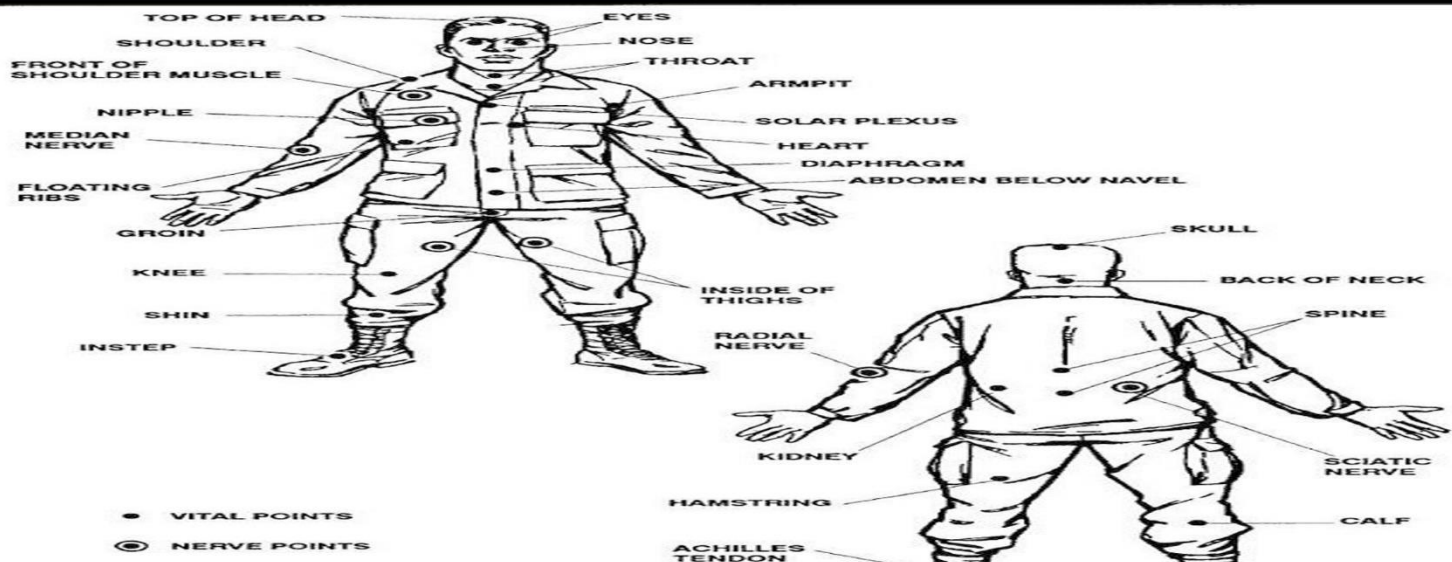

### COA 3: Angles of Attack

### COA 4: Cut Points

**BLUF:** Knives are everywhere; know how to use one when crisis strikes.

# Leave no trace

Our brothers in arms MKU will give a further explanation

- \* Buy everything with cash at a different stores
- \* Keep items you bought in the plastic package till you go on a manhunt
- \* Ductape your pants over your shoes and ductape gloves to sleeves/jacket/vest you're wearing.
- \* Shower and prefer to shave legs and beard etc.
- \* Smear vaseline on exposed spots, for example if you wear a baalacava your eyebrows can drop hair, smear vaseline, on your eyebrows so that if it falls, it sticks to your skin.
- \* Buy new shoes and socks and leave in package till action.
- \* Buy some cheap rain suit, they burn easily and are good and give good cover.

When you actually start to plan an attack make sure to put your outfit with new gloves and having showered before and shave if that's necessary.

When you have your outfit on, spray from a distance with ammoniak on your gloves and a bit on your outfit to make sure it kills any dead body cell or whatever.

Use google satellite maps are your UAV, scout the area from above, and draw out escape routes, its also a good idea to place a bag with diff clothing etc in area of action to change disheuse quickly.

## No. 078: Leave Zero Fingerprints Behind

CONOP: Conceal or temporarily erase fingerprints.

COA 1: Wear white cotton gloves. Fingerprints can be extracted from the inside of surgical gloves.

COA 2: Apply superglue to fingertips.

COA 3: Sand fingerprints off with pumice stone.

COA 4: Take Capecitabine to achieve the side effect of fingerprint loss.

**BLUF:** Fingerprints can easily be scrubbed off or covered.

## No. 077: Leave Zero DNA Behind

CONOP: Reduce the odds of leaving forensic clues behind.

COA 1: Shower and scrub entire body of loose skin and hair.

COA 2: Dress to ensure body is covered from head to toe.

COA 3: Once on target, cover mouth and nose to prevent any mucus, sweat, or tears from being distributed.

COA 4: Only touch what is necessary, nothing else.

COA 5: Burn operational clothing post-operation.

**BLUF:** DNA resides in skin cells—so reducing skin exposure is key to eliminating evidence.

## No. 028: Spark a Fire with a Mobile Phone

CONOP: Use a cell phone (or any battery) to create fire.

COA 1: Disconnect phone to reveal battery. Remove battery from phone.

COA 2: Straddle spent phone batteries over!

COA 3: Spark battery and expose battery to create fire.

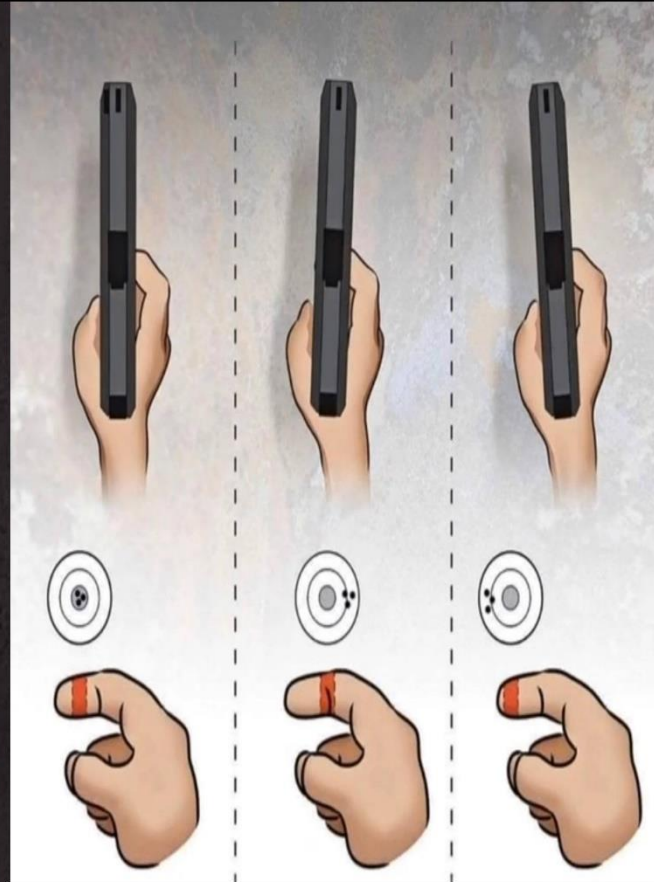

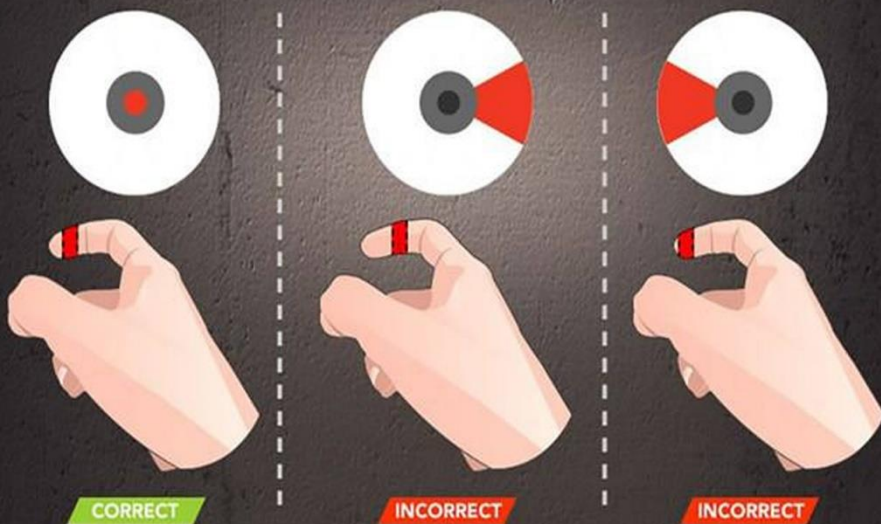

**BLUF:** Use your phone to spark a fire only as a last resort.

# Firearms

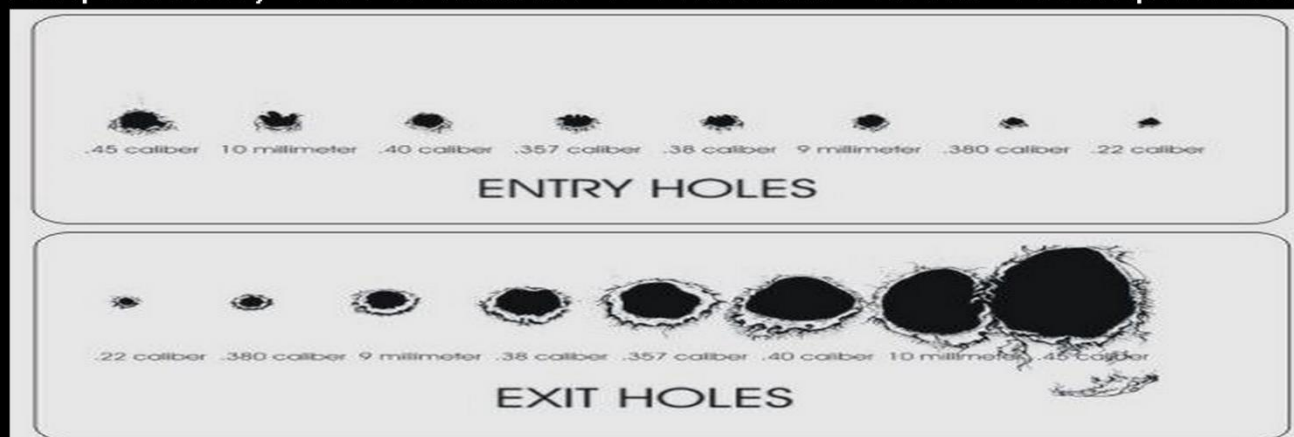

One of the most handy tools of a killer  
alot people underestimate how easy it is to fire a gun  
here are some easy pictures that will change the hunt

## 3. TRIGGER CONTROL

Center the first pad of your index finger on the trigger and pull straight back. Using the very tip of your finger, the second pad, or the "crease" between pads can cause you to pull shots left or right. Note that some instructors suggest using the second pad for guns with particularly heavy trigger pulls—only you can determine what works best for you!

Yep, its not like hollywood just squeeze and hit  
unless you got a switch with a fcking drum mag  
Try and aim on the best, its the biggest target,  
and if you hit the lungs he wont go far ;),  
If you scroll up to the knife guide, those organs  
ofcourse also count for bullets.  
Ofcourse there are also different guns and different  
bullets, make sure if you wanna go stealthy or loud.  
I recommend a .22 close up, little sound, small easy  
disposable, and ofcourse a revolver never dissapoints.

NO LIVES

MATTER

# MKO MANHUNT GUIDE

0. Clothes for an action must be disposable and with out any memorable signs, as well as shoes. Shoes should be several sizes larger or one smaller. To make it difficult to find a smell for dog handler's dogs, shoes must be moistened by a mixture of hot peppers/chlorine/antiseptic or the pepper ballon can be used. After an action all clothes must be burned or destroyed in another way. As a mask a medical mask can be used with the cap and hood. Weapon must be moistened with an antiseptic and hidden in a particular place or just dropped. Any manipulations with the weapon or clothes must be done in gloves moistened with an antiseptic. Also important that clothes must be odorless. All must be moistened with an antiseptic, weapon and camera too. All things for actions are necessary to buy in not official stores in different parts of a town in different time.

1. To every action it is necessary to be prepared in advance. No matter what it is-manhunt in the particular location or a one victim. It is important to make an advance explore of the place and plan a retreat. Weapon and clothes for an action must be prepared in advance and be hidden in a particular place. Safe place where it will be possible to change clothes. It also could be different places for weapon and clothes. It's all for an exception of a rick.

2. At the moment of action it is important to act instantly, as quickly as possible, for don't letting a victim to understand something or shout for help. The ideal attack-from the back, hit with a hummer in the head or with a knife in the neck. If a victim saw you but still don't know what is going on, and you can't attack from the back, you need to make a hit as quickly as possible. If the victim is sober and too concentrated on you, it is possible to change tactics and ask what time is it now or something that can distract victim's attention, so it will be easy to start attacking. Also it is an option to use a pepper ballon first, after which start attacking with weapon. If the victim is drunk, there is no need to worry, so you can start attacking freely. First, kill the victim or render his harmless and then take a camera and start filming all what you will do after that with the light turned on. It is important to film a really bloody and cruel video with as many hits and stabs as possible, filming it clearly. The more horrible it looks, the better. If it is possible, it is better to cut the body on parts and drop it in different places. Video must make an ordinary people or the enemy of cult feel horror and vomit, what will make a maximum resonance in the society.

3. After an action you need to go back to that safe place and change clothes and burn the used one. For example, it is a good idea if this place is in the forest, abandoned house or another place where no people can be. If there is no such locations and action is held in the town, it is necessary to find in advance the line of houses with no roads between them, search for cameras in that houses or near. Important that in this houses are no cameras and the roof is open. But even if the roof isn't open and there are some cameras, the situation can be fixed. In the day before an action you need to damage cameras and open a lock on the roof. It is needed for you to go to the house, reach to the roof which you also need to check for cameras and burn there clothes from action. Change clothes and go down from the roof of another house so now you can freely walk from that place. The weapon needs to be moistened with an antiseptic and do all things
