Welcome to the third edition of InnoEX, jointly organised by the Innovation, Technology and Industry Bureau (ITIB) of the Hong Kong SAR Government (HKSARG) and Hong Kong Trade Development Council (HKTDC).

An anchor event of Business of Innovation & Technology Week (BIT Week), InnoEX showcases next-gen smart solutions, cutting-edge tech and disruptive I&T achievements, while fostering knowledge-exchange and collaboration among governments, tech firms, start-ups and talents from around the world.

This year, under the theme "INNOVATE · AUTOMATE · ELEVATE", the event shines a spotlight on five major areas: AI, robotics, cyber security, smart mobility and the low-altitude economy.

One of the highlights is the Smart Hong Kong Pavilion, set up by the ITIB Digital Policy Office. It showcases over 100 innovative solutions aimed at driving smart city development in Hong Kong, including technology solutions adopted by various government departments to enhance governance and drive the development of a digital government, as well as award-winning products and solutions from local innovators.

The event also features pavilions representing Cyberport, Big Data for Business and Smart City Consortium, leading tech companies, such as Huawei, China Mobile, Tradelink and Novautek, as well as local R&D centres. In addition to local participation, 16 provinces and cities from Mainland China have set up pavilions at InnoEX. Tech firms from Australia, Canada, France, Japan, Luxembourg, Macao, Thailand, the United Arab Emirates, the United Kingdom and more are also presenting their latest innovative products and solutions.

Among a series of seminars and conferences, the Tech-Driven Industry and Economy Conference, powered by HKSARG's Office for Attracting Strategic Enterprises (OASES), gathers government officials and industry leaders to discuss how funding mechanisms and policy frameworks can nurture the industry, with a focus on bringing advanced technologies to Hong Kong.

The Low-altitude Economy Development Conference 2025 maps out the future of the low-altitude economy, while the Hong Kong World Youth Science Conference and Xiangjiang Nobel Forum 2025 return to bring together Nobel Prize and Turing Award laureates, top-notch I&T talents and renowned scientists to discuss key I&T issues.

Government representatives, scholars and scientists from research centres and tech titans share their views on robotics, AI, cybersecurity and more at other seminars.

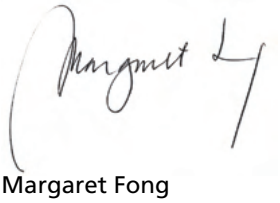
A range of events centre around start-ups, including launch and sharing sessions, mentoring sessions and investment matchmaking meetings, providing an ideal platform for ideas and innovations to be showcased, for knowledge-sharing and connection-building with buyers.

InnoEX once again adopts the HKTDC's EXHIBITION+ hybrid model, allowing buyers to source beyond the Hong Kong Convention and Exhibition Centre. Leveraging the Click2Match smart business matching platform and hktdc.com Sourcing, buyers can schedule and conduct online meetings with local and overseas exhibitors via Click2Match until 23 April.

During the event period, buyers can also scan the QR codes of exhibitors at the fairground using the Scan2Match function in the HKTDC Marketplace App to bookmark their favourite exhibitors, browse product information and engage with exhibitors even after the event to expand their sourcing journey.

I invite you all to visit the HKTDC Hong Kong Electronics Fair (Spring Edition), which is running concurrently with InnoEX, as part of BIT Week, to explore and seize more business opportunities.

I wish you all a rewarding InnoEX.



Margaret Fong
Executive Director
Hong Kong Trade Development Council

歡迎辭

歡迎各位蒞臨由香港特別行政區政府創新科技及工業局，以及香港貿易發展局合辦的第三屆香港國際創科展。

作為「國際創科營商周」（BIT Week）的核心活動，創科展展示新一代智能方案、尖端技術及顛覆性創新科技成果，同時促進各地政府、科技公司、初創企業及人才之間的知識交流與合作。

今年展會以「創新 • 智動 • 起飛」為主題，圍繞「人工智能」、「機器人技術」、「網絡安全」、「智慧出行」及「低空經濟」五大範疇。焦點之一「智慧香港展館」由創新科技及工業局轄下的數字政策辦公室設立，展出過百項有助推動香港智慧城市發展的創科方案，包括已於不同政府部門應用、有助提升政府治理表現與推動數字政府發展的創科方案，以及本地創科界的得獎作品及有關方案。

此外，數碼港、Big Data for Business（B4B）及智慧城市聯盟等亦於會場設有展館。其他參展單位還有華為、中國移動、Tradelink及Novautek等領先科技企業，以及多家本地研發中心。除了本地的參與，中國內地有16個省市組團參展；澳洲、加拿大、法國、日本、盧森堡、澳門、泰國、阿聯酋、英國等地亦有企業來港，展示創科產品和解決方案。

大會在展覽期間安排了多場精彩的研討會及論壇。其中，「香港特別行政區政府引進重點企業辦公室呈獻：智慧科技驅動產業及經濟大會」匯集政府官員及行業領袖，探討資金機制和政策架構如何促進產業發展，並重點關注如何將先進科技引入香港及加強本地科技提升，而「低空經濟發展會議2025」則揭示低空經濟的未來藍圖。「世界青年科學大會」和「2025香江諾貝論壇」今年再度舉行，邀請到諾貝爾獎和圖靈獎得主、頂尖創科人才及科學家聚首探討多個重要創科議題。更多國家及地區的政府代表、科研機構學者及科技巨擘會在其他研討會上就機械人、人工智能、網絡安全等議題發表真知灼見。

另外，大會針對初創企業的需要，安排了介紹會、分享會、啟導環節及投資項目對接會等活動，讓他們展示創意與發明，向業界翹楚取經，並認識潛在買家及投資者以開拓更多商機。

展會繼續以「EXHIBITION+」（展覽+）線上線下融合模式舉行，買家除了可於香港會議展覽中心現場進行採購，亦可於「商對易」（Click2Match）智能商貿配對平台及「貿發網採購」（hktdc.com Sourcing）上搜羅更多產品與服務。在這個融合的展覽模式下，買家即日起至4月23日期間，可以透過「商對易」與本地及海外展商進行網上洽商。另外，在實體展覽期間，買家可利用HKTDC Marketplace App的「掃碼易」（Scan2Match）功能，掃描展商的專屬二維碼，收藏喜愛的展商，瀏覽產品訊息，並在展會期間或之後與展商延續線上商談，繼續採購之旅。

除了創科展，我邀請大家參與「國際創科營商周」另一重點活動、同期舉行的香港貿發局香港春季電子產品展，探索及捕捉更多商機。

我祝願各位在創科展滿載而歸。

香港貿易發展局總裁
方舜文

Mr Aleksandr Sutyagin (852-9154 3420)

Smart Building DataHub

It is a cloud-based Autodesk Revit plugin revolutionizing Building Automation Systems design.
It enables work from the concept stage directly in Revit, optimizing cable routing, automating schematics, and generating point lists, wiring diagrams, and Revit schedules. This significantly reduces design time and minimizes errors. The tool provides Brick Schema-ready data for Digital Twins and FDD.
The solution enhances collaboration by allowing less experienced engineers to manage routine tasks while senior professionals focus on complex challenges. Its intuitive interface lowers the entry barrier to BIM.

Smart AI Interactive Projection

It combines with customized interactive content. For road safety, they simulate global traffic scenarios, teaching safe crossing practices. Safe driving applications include crisis prediction drills, improving reaction skills. Environmental awareness is fostered through virtual waste sorting games, educating users on sustainability. These applications use real-time interaction, high-resolution displays, and IoT integration to create engaging, educational experiences in public spaces, schools, and transport hubs. By combining interactive technology with practical learning, projectors help build safer, more sustainable communities.

Smart Robot Dog

This agile robot integrates multi-sensor fusion (LiDAR/IMU/cameras) with MindSLAM™ for 6-8mm 3D modeling in low-light/GPS-denied environments. Its compact limbs navigate confined spaces while carrying the Pocket Scanner for hazardous area inspections. Key applications include construction visualization via remote projection, underground pipeline mapping, and post-disaster rescue planning.

Pocket 3D Scanner

It combines LiDAR, IMU, and optical cameras for millimeter-precision 3D modeling. Its single-handed "point-and-scan" operation captures 100㎡ in 3 minutes (20x faster than traditional methods). Powered by MindSLAM™ algorithm, it delivers <1cm accuracy, overcoming "unactionable visuals" in home design. Real-time true-color scanning and rapid mesh generation enable smart city applications, cultural preservation, and industrial digitalization.

UWB Danger Zone Alert System

Install our UWB Danger Zone Alert System on mobile plants to create precise perimeter fencing, preventing worker encroachment. Notifications are sent to the Central Management Platform (CMP) for records and to the supervisory team for oversight.

UWB Tower Crane Alert System

The Tower Crane Alert System alerts any unauthorized individuals entering the crane area, ensuring no one is in the loading/unloading zone or beneath the crane hook during operations. An alert is simultaneously sent to the crane operator to halt operations. This reliable and cost-effective system ensures accurate detection, minimizing false triggers and enhancing safety.

Smart Luggage Handling System

It is a smart luggage logistic System - flexible, reliable and scalable solution to dispatch luggage according to individual traveller needs. It replaces the traditional rail and pin storage system which is rigid and requires large number of labour.
ACM is a fully automatic guided vehicle to play the key role in the LFY System. It moves freely in all directions - Forward, backward, turning, rotating, crabwise, which human handling is not possible. With the high speed of 2m/s, and self-rotate diameter 3m, it requires less time and space to complete the task – shorter response time to instructions.
